HERRMANS

H-TRACE MINI E-BIKE 6-12V

HERRMANS® H-Trace Mini rear light was developed to meet the growing need for rear lights that can be mounted on mudguards. With clean and sophisticated design, this tiny light (24 x 34 mm) for e-bikes fulfills German StZVO, French TP RBi and Danish requirements, whilst the reflector is E I A & K approved. Also compatible with 6–12 V DC, this modern rear bike light is easy to assemble with a power input slide, one screw fastening and a no-wires-visible assembly option. This electric bike rear light is also available with a seat stay bracket for mounting on a 14–22 mm tube.

Not all products are available in all markets. During continuous improvement specifications and design are changing. All values are nominal values. Illustrations do not necessarily show the design of every version and some features are version specific.

TECHNICAL DATA

Power Source	**E-bike**
Nominal Voltage DC	**6 - 12 V**
Power Consumption	**0.2 - 0.4 W**
Input connector type	**power-input-slide**
Number of LED's	**1**
Operating modes	**On**
Mounting Options	**Mudguard/seatstay**

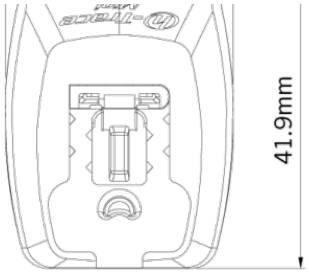

Housing	**Plastic**
Salt Spray Test	**ISO 9227 NSS 240H**
Type approval (light)	**Germany (StVZO), France (TP LBi)**
Type approval (reflector)	**E-IA, K**
EMC	**EN 15194**
Packaging Amount	**500 Pce**

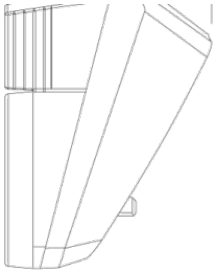

KEY FEATURES

- Compact and up-to date style
- Easy assembly
- Fulfills regulations in most demanded markets
