Description

The equip® 333310 PDU is a robust infrastructure solution designed to solve the problem of power distribution within 19-inch server cabinets. By providing eight dedicated IEC C13 sockets, it enables the synchronized powering of multiple rack-mounted servers and networking switches, ensuring a clean and professional cable management setup.

Optimized for high-intent IT environments, this PDU features an IEC320 C14 inlet, making it a definitive choice for use with Uninterruptible Power Supplies (UPS). The 1U horizontal installation design allows for seamless integration into any standard rack, providing a stable and reliable power source for critical hardware that requires consistent energy flow.

Built with stability at its core, the 333310 utilizes a high-quality Aluminum shell for

enhanced durability and heat dissipation. The master ON/OFF switch allows for quick manual control, while the heavy-duty 1.8m cable and 2500W capacity ensure that your professional digital assets remain safe and fully operational.
