Jonsbo FR-131 (RGB) - 3er Set - 120mm - 256 Farben

## FR-131 (RGB) - Set of 3

### Technical Data

|                     |                               |
|---------------------|-------------------------------|
| Height              | 120 mm                        |
| Width               | 120 mm                        |
| Depth               | 25 mm                         |
| Voltage             | 12 Volt                       |
| Fan speed           | 1,000 - 1,500 rpm             |
| Rated power         | 3.6 W                         |
| Airflow             | 45.4 - 68.3 m <sup>3</sup> /h |
| Noise               | 18.0 - 25.4 dB(A)             |
| Bearing             | Hydraulic Bearing             |
| Connector           | RGB-Controller (S-ATA Power)  |
| Code                | 4250140344076                 |
| Manufacturer number | FR131 RGB                     |
| Order number        | 200400407                     |

### Logistical Data

Jonsbo FR-131 (RGB) - 3er Set, 120 mm RGB-Lüfter, max. 1.500 U/Min, max. 25,6 dB(A), max. 68,3 m<sup>3</sup>/h, Controller

With the FR-131 (RGB) - Set of 3 Jonsbo presents an RGB fan set consisting of three RGB fans, an internal controller and a practical slot cover. The focus was aimed at impressive LED and the fans offer a very attractive design with uniform and clean light effects.

The fans combine high airflow with very impressive RGB-LED effects. A total of 18 long-life high-light-LEDs are installed in the fan frame. With the included controller the user can choose between different colors and lighting modes.

The controller offers a total of 12 different modes: Color circle of 256 different colors within a time span of approx. 50 seconds; single color mode Red, Green, Blue, White, Yellow, Purple, Pink, Cyan, Orange; color circle (9 colors), 7 seconds per color; light off. Using the LOCK key, users can stop the color circle and lock in one of the colors, while a second click will "unlock" the color circle once again.

Using the controller, it is possible to change the fan speed of the connected fans. There is a high-speed mode (1,500 rpm, 25.4 dB(A), 68.3 m<sup>3</sup>/h) and a low-speed mode (1,000 rpm, 18.0 dB(A), 45.4 m<sup>3</sup>/H). It is also possible to switch off the fans.

Included is a slot cover, allowing it users to regulate the RGB fans without the need to open up the case.
