

Quick Start Guide

1. Connect Your Orbi Router

Unplug your modem and remove and replace the backup battery if it uses one. Plug the modem back in.

Use the included Ethernet cable to connect your modem to the yellow Internet port on your Orbi router.

Connect your Orbi router to a power source. The Power LED on the back of the Orbi router lights green. If the Power LED does not turn on, press the **Power On/Off** button.

Wait for the Orbi router's ring LED to light white.

2. Place Your Orbi Satellite

Place the Orbi satellite in the middle of your house to get the best WiFi coverage.

Connect the Orbi satellite to a power source. The Power LED on the back of the Orbi satellite lights green. If the Power LED does not turn on, press the **Power On/Off** button.

Wait for the Orbi satellite's ring LED to light white and then light magenta. The Orbi satellite's ring LED lights magenta for about one minute while the satellite attempts to sync with the Orbi router.

NETGEAR

2. Place Your Orbi Satellite (Continued)

After the Orbi satellite's ring LED lights magenta, it lights one of the following colors for 10 seconds and then turns off:

● **Blue**

The connection between the Orbi router and Orbi satellite is good.

● **Amber**

The connection between the Orbi router and Orbi satellite is fair. Consider moving the Orbi satellite closer to the Orbi router.

Note: If the Orbi satellite's ring LED still lights magenta after about one minute, and you already moved the Orbi satellite closer to the Orbi router, press the **Sync** button on the back of the Orbi router and on the back of the Orbi satellite.

If the Orbi satellite successfully syncs with the Orbi router, the Orbi satellite's ring LED lights white, then lights blue to indicate a good connection, and then turns off.

3. Connect to the Internet

Connect your computer or mobile device to the Orbi router or satellite with an Ethernet or WiFi connection.

To connect with WiFi, find the preset WiFi network name (SSID) and password on the label on the Orbi router or satellite and connect to that network from your WiFi-enabled computer or mobile device.

Visit <http://orbilogin.com> and follow the onscreen instructions to set up your Orbi network.

The Orbi router's ring LED turns off after the setup is complete.

All Set Up!

Package Contents

Orbi router
(Model RBR50)

Orbi satellite
(Model RBS50)

Ethernet cable

Power adapters (2) (varies by region)

Orbi Router Overview

- 1 Ring LED (not shown in image)
- 2 Sync button (also used for WPS connection)
- 3 Internet port (the Orbi satellite does not include an Internet port)
- 4 Ethernet ports
- 5 USB port
- 6 Power On/Off button and Power LED
- 7 DC Power connector
- 8 Reset button

Orbi Satellite Overview

- 1 Ring LED (not shown in image)
- 2 Sync button (also used for WPS connection)
- 3 Internet port (the Orbi satellite does not include an Internet port)
- 4 Ethernet ports
- 5 USB port
- 6 Power On/Off button and Power LED
- 7 DC Power connector
- 8 Reset button
