

Gaming Keyboard | RGB Illumination | USB 2.0 | US International | Metal Design

General information

Who says the gaming has to stop just because the lights have gone out? Add a new dimension to your gaming experience with this backlit keyboard from Nedis® that lets you keep playing long into the night. The illuminated keys simply stand out even more the darker that it gets, and all that extra gameplay is allowed by the 10 million key stroke life span that's built into this keyboard.

Features

- US International keyboard layout
- Multi-colour illuminating LEDs
- Long key stroke life of over 10 million
- Multimedia keys
- Phone holder
