

GRÖDEN 30 SL

Colour:	petrol-arctic
Article ID:	3430216-3325
Weight:	1140 g
Volume:	30 litres
Size:	52 / 42 / 26 (H x W x D) cm
MSRP:	99,95 €

The renaissance of a classic! Our Gröden and Zugspitze have been there from the very start, back in 1984, when we revolutionised the backpack market with our much copied, fully ventilated mesh Aircomfort System. They now almost outshine the youngsters with their elegant look reminiscing good old times.

HIGHLIGHTS OF GRÖDEN 30 SL

SL Women's Fit

On average, women's backs are not quite as long as men's. The SL carry system is thus slightly shorter than that of Deuter's standard rucksacks.

Aircomfort System

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 Deuter invented & patented the first mesh back system worldwide.

Spring Steel Frame

The round spring steel frame is very lightweight and flexible. It is extremely durable, provides stable tension for the back mesh and transfers the load to the hip belt. Its flexibility guarantees great freedom of movement and a perfect fit.

Pockets on the outside

stretch pockets on the side and in the front provide additional storage space

Padded Hip Belt

An additional padding on the hip belt provides more carrying comfort.

Sternum Strap

The sternum strap stabilizes the pack on the shoulders.

Rain Cover

removable rain cover with special pocket

Valuables Pocket

special pocket on the inside of the pack to keep valuable items safe

Stretch Compartment

stretch compartment on the inside of the back to stow sweaty/wet clothes

SOS-Label

provides the most important tips in case of emergency

Hiking Pole Attachment

Attachment loops for hiking poles

Lid pocket

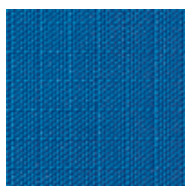

This pocket integrated into the lid guarantees quick access to your gear.

BACK SYSTEM: AIRCOMFORT SYSTEM

- 1 **LESS SWEATING THANKS TO MAXIMUM VENTILATION**
The tensioned Aircomfort special mesh creates an effective ventilation space between the backpack and the wearer's back to allow moist air to disperse freely. The patented Deuter 3-side ventilation reduces the loss of fluids by up to 25 %*. (*tested and verified by the reputable Hohenstein Institute)
- 2 **ERGONOMICALLY S-SHAPED SHOULDER STRAPS**
fit like gloves – comfortably padded and with Soft-Edges
- 3 **ROBUST AND RELIABLY TENSIONED BACK MESH**
even under load. It is guaranteed by a lightweight frame made of break-proof spring steel. Extremely resilient and permanently elastic, it always jumps back to its original shape after deformation.

MATERIAL

600D PES Ripstop

We use this material in two different strengths – the 600D Ripstop Polyester is a more robust version of the Super Polytex, and the 225D Ripstop Polytex it's finer variation. Both materials feature a PU coating with a water protection of 2.000mm WS.
