[1] Part of the capacity of FLASH storage products will be used for formatting or other functions, and the displayed capacity in the operating system will be less than the actual storage capacity due to unit conversion. It is recommended to calculate the actual storage capacity based on this equation: total bytes/1024/1024/1024.

[2] Transmission speed will vary according to different hardware / software conditions, therefore the data can only be used for basic reference.

※The format for optimal usage might be different based on the devices. To ensure the proper work of the card, please do the formatting before applying to the device. We reserve the right to modify product specifications without prior notice.
