FR-101 - Green

Technical Data

Height	120 mm
Width	120 mm
Depth	25 mm
Voltage	12 Volt
Fan speed	1,200 U/min
Rated power	3.6 Watt
Air flow	ca. 68.3 m ³ /h
Noise	28.4 dBA
Bearing	Hydraulic Bearing
Connector	3-Pin auf 4-Pin
Code	4250140344038
Manufacturer number	FR101G

Jonsbo - FR101 Green, 120 mm Lüfter, Hydraulic-Bearing, 28,4 dB(A), 1.200 U/min, 68,3 m³/h, 3-Pin auf 4-Pin

With the FR-101, Jonsbo presents its new fan series. The Focus has been set on the impressive LEDs and the attractive design, which combines a uniform and clean light effect.

The high air throughput and the unique effect of the LED lighting are the outstanding features of the FR-101 fan series. With the transparent fan blades, they carry the effect during operation and gives the whole an almost lively impression.

This 120 mm model of the FR-101 series rotates at 1,200 rpm max, producing an airflow rate of approximately 68.3 m³/h at 25.4 dB(A). Included in the package are a set of fan screws, and practical silicone washers for the decoupled installation of the fan.

The fan is connected via a 3-pin to a 4-pin adapter, which can be connected directly via the power supply.
