# Important Information

## Important safety instructions

Ensure you carefully read all the safety information before you setup this product.

TCL King Electrical Appliances (Huizhou) Co., Ltd. bears no responsibility for accidents or damages caused by unauthorized changes, modifications or improper use of the product.

### Warnings

- **WARNING:** Keep away from water sources or water places such as bathrooms, kitchens, basements, swimming pools, etc.
- **WARNING:** Ensure that the equipment is mounted and placed in a stable place, if it falls, it may cause personal injury or equipment damage.
- **WARNING:** Keep away from sources of radiation and heat, please store and use in a cool, dry and ventilated place.
- **WARNING:** Do not cover or block the ventilation holes in the back case, and do not use it on the surface of a bed, sofa, blanket or similar object.
- **WARNING:** Do not overload the outlet as this may cause fire or electric shock.
- **WARNING:** Do not put foreign objects into the machine, otherwise it may cause a short circuit and lead to fire or electric shock.
- **WARNING:** Do not disassemble or repair this product by yourself. If there is any trouble, please contact the after-sales service personnel directly.
- **WARNING:** Do not pull or twist the power cord excessively.

- **WARNING:** The power supply voltage range for operation of the unit is indicated on the rear case label. If you are unable to confirm the voltage supplied, consult your dealer or local power company.
- **WARNING:** When the equipment is not used for a long period of time, disconnect the power supply to prevent damage from electric shock and abnormal power supply voltage during thunderstorms.
- **WARNING:** Sockets should be mounted near the equipment and should be easily accessible.
- **WARNING:** Sockets should be mounted near the equipment and should be easily accessible.
- **WARNING:** The power plug or appliance coupler serves as the disconnecting device, make sure that the disconnecting device is easily accessible during normal use of the equipment.
- **WARNING:** Zero power consumption can only be achieved when the product is not connected to any external input power source.

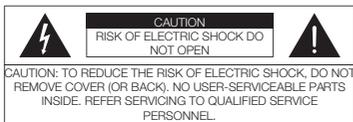

If your equipment uses an AC adapter:

- Only use the AC Adapter provided with your TCL product.
- Do not use the power cord with other products.

Ensure that the power outlet is as close as possible to the monitor and that it is easy to plug in and unplug the power adapter (power cord). Always unplug the power adapter (power cord) from the power outlet when you disconnect the device.

## Important safety instructions

The lightning flash with arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated dangerous voltage within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

This symbol indicates that the fuse may be in the neutral, and that the mains shall be disconnected to de-energize the phase conductors.

To prevent injury, this apparatus must be securely attached to the desk/floor/wall in accordance with the installation instructions.

### Monitor screen

The monitor screen used in this product is made of glass. Therefore, it can break when the product is dropped or impacted upon by other objects.

The monitor screen is a very high technology product, giving you finely detailed pictures. Occasionally, a few nonactive pixels may appear on the screen as a fixed point of blue, green or red. This does not affect the performance of your product.

### ESD regulation

This apparatus meets ESD performance criteria. In case the apparatus does not recover in Ethernet connection mode or USB playing mode due to electrostatic discharge, user intervention is required.

### Hanging the monitor on the wall

**Warning: This operation requires at least two people depending on your monitor dimension.**

To ensure a safe installation, observe the following safety notes:

- Check that the wall can support the weight of the monitor and wall mount assembly.
- Follow the mounting instructions provided with the wall mount. For certain models, make sure to screw the hexagonal VESA wall mounting screw bosses (and screws) provided with the set into the nuts for the wall mount at the back of your set before your wall mounting.
- The monitor must be installed on a vertical wall.
- Make sure to use only screws suitable for the material of the wall.
- Make sure that the monitor cables are placed so that there is no danger of tripping over them.

All other safety instructions about our monitor are also applicable here.

### Multi product user manual

The features described in this manual are common to most models. Some features may not be available on your monitor and/or your monitor may include features that are not described in this user manual. The illustrations in this manual may differ from the actual product. Please refer to the actual product.

## Using Electrical Power

This product should be used with the type of power supply specified on the label. If you are uncertain about the type of power supply available, check with your dealer or local power supply company.

### Warning

- Do not place any objects on the power adapter (power cord), and do not place this product where people will step on the power adapter (power cord).
- If a power extension cord is used, make sure that the total amperage of the appliances connected to it does not exceed the amperage of the power extension cord. Care should also be taken that the total rating of all appliances plugged into the same wall outlet does not exceed the fuse rating. (Applies to monitors equipped with power cords).
- Do not plug in too many devices, as this will cause overloading of the power outlets and power boards. The overall system load must not exceed 80% of the branch circuit rating. If a patch panel is used, the load must not exceed 80% of the patch panel input rating.

## Advice on Eye Health

To avoid the possible eye fatigue and pains in the neck/arms/back/shoulders caused by long-time use of the Monitor, please keep the following suggestions in mind while using:

- Place the Monitor at a distance of 20~28 inches (approximately 50~70 cm) from your eyes.
- When using the Monitor, increase the blinking frequency appropriately to keep your eyes moist, and use water to moisten your eyes after long-time use of the Monitor.
- After using the Monitor for two hours, take a 20-minute break.
- Take frequent breaks: keep your eyes away from the Monitor and look at a distant target for at least 20 seconds.
- During breaks, stretching activities may be performed to soothe the neck, arms, back and shoulders.

## Cleaning Your Monitor

Please carefully follow the guideline below when cleaning your monitor:

- Before cleaning the product, ALWAYS make sure disconnect the power cord.
- When cleaning, use a soft cotton or a microfiber cloth and mild detergent to clean the product. ALWAYS make sure the cloth be damp or almost dry, do not allow liquid into the cabinet front and side.

# Product Disposal and Recycle

## Information of Disposal of Old Product

Your product is designed and manufactured with high quality materials and components, which can be recycle and reused. This product may contain lead and mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal to recycling information, please contact your local authorities.

### WEEE Statement

#### [European Union]

Under the European Union ("EU") Directive on Waste Electrical and Electronic Equipment, Directive 2012/19/EU, products of "electrical and electronic equipment" cannot be discarded as municipal waste anymore and manufacturers of covered electronic equipment will be obliged to take back such at the end of their useful life.

#### [Business users]

If you wish to dispose of this product, please contact your supplier and check the terms and conditions of the purchase contract.

### [Other Countries outside the European Union]

These symbols are only valid in the European Union. If you wish to dispose of these items, please do so in accordance with applicable national legislation or other rules in your country for the treatment of old electrical equipment.

## CE Conformity

This device complies with the requirement set out in the Council Directive on the Approximation of the Laws of the Member States relating to Electromagnetic Compatibility (2014/30/EU), Low-voltage Directive (2014/35/EU), ErP Directive (2009/125/EC) and RoHS directive (2011/65/EU). This product has been tested and found to comply with the harmonized standard for Information Technology Equipment published under Directive of Official Journal of the European Union.

*Figures and illustrations in this User Manual are provided for reference only and may differ from actual product appearance. Product design and specifications may be changed without notice.*

# Preparing and Assemble

## Warning

Before take out and assemble the monitor, please read carefully read this:

- Always use genuine components supplied from the box to ensure safety and product performance.
- For the damage or injury by unauthorized components, the product warranty will not cover.
- Generic cables not certified by TCL, display or image noises on the screen may occur.
- Illustration in this user manual represent typical procedures, it may have differences of vary monitor
- Do not use excessive force to tighten screws, otherwise damage may caused to the monitor. Such damage will not be covered by the product warranty.
- Fall-off or personal injury may happened if you only holding the base upside down. Such damage will not be covered by the product warranty.
- Do not apply excessive force to the screen when lifting or moving the monitor, damage may caused to the screen if so.
- Negligence, lack of supervision, lack of maintenance or maintenance of the Product not in accordance with the manufacturer's instructions for use are not cover by the product warranty.
- Modifications, adaptations and alterations of the monitor for use in a country different from those for which it was originally designed and manufactured and any deterioration caused by these modifications are not cover by the product warranty.
- Modifications, adaptations, interventions and alterations of the monitor (opened or disassembled), carried out by a third party, by an enterprise not authorized by the manufacturer or by an individual. Such changes are not cover by the product warranty.
- Maintenance and repairs made or attempted by persons other than the manufacturer or a service center approved by the manufacturer are not cover by the product warranty.
- An installation or use of the monitor that does not conform to the technical or safety standards and regulations in force in the country where it is installed and used are not cover by the product warranty.
- Virus infections or monitor use with software not provided or incorrectly installed are not covered by the product warranty.
- To aesthetic defects, especially scratches, traces of shocks etc. caused to external parts of the monitor that do not interfere with its operation are not covered by product warranty.
- Defects caused by infestation with parasites or insects are not covered by product warranty.
- It is specified that the Products are always equipped with the or, where appropriate, the latest versions of software available on the date of production. It is up to the final purchaser to regularly update the product software to ensure the latest compatibility and functionality.

## Wall mounting

### Warning

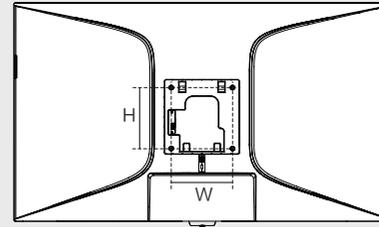

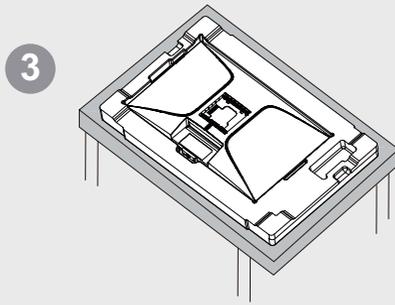

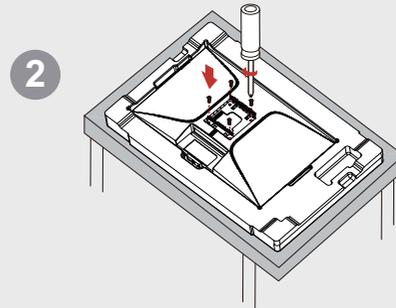

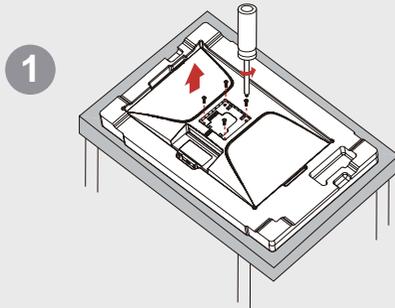

Never place a monitor set in an unsuitable location. A monitor set may fall, causing serious personal injury or death. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

- Check that the wall can support the weight of the monitor and wall mount assembly.
- Follow the mounting instructions provided with the wall mount. For certain models, make sure to screw the hexagonal VESA wall mounting screw bosses (and screws) provided with the set into the nuts for the wall mount at the back of your set before your wall mounting.
- If the screws missing by personal accident, ensuring to use only screws recommended in wall mounting part of the User Manual or Quick Start Guide(attach in accessory box) and suitable for the material of the wall.
- Only using furniture that can safely support the monitor set recommended in wall mounting part of the User Manual or Quick Start Guide(attach in accessory box).
- Ensuring that the monitor must be installed on a vertical wall.
- Ensuring the monitor set is not overhanging the edge of the supporting furniture.
- Not placing the monitor on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the monitor set to a suitable support.
- Not place the monitor set on cloth or other materials that may be located between the monitor set and supporting furniture.
- ALWAYS route all cords and cables connected to your monitor so that there is no danger of tripping.

**Note:** All other safety instructions about our monitor are also applicable here. If your existing monitor set is being retained and relocated, the same considerations as above should be applied.

# Other Information

## Troubleshooting

Please check the following list before requesting service.

### The power indicator is off:

- Make sure the power cord is properly inserted in the power outlet and power socket on monitor.
- Make sure the power button is pressed properly to switch the monitor on.

### Plug and play does not work:

- Make sure your PC is properly matched.
- Make sure your graphic card is properly matched.

### Picture is too dark, too light or tinted:

- Check the colour adjustment.
- Check the brightness setting.
- Check the sharpness function.

### Screen flickers or ripples on the picture:

- Consider whether your monitor is interfered by electrical equipment.

### No picture appears when the power indicator is on:

- Make sure the computer power is turned on.
- Make sure the graphic card is properly inserted.
- Consider whether the computer is running by pressing the CapsLock button of PC keyboard and observing the indicator.

### The colour or sound is abnormal:

- Reset colour or sound to factory default settings in setting.

**Note:** *If the above suggestions do not solve your technical issue, please refer to the warranty card for service information.*
