Securing the Installation Space

Ensure some space around the product for ventilation. An internal temperature rise may cause fire and damage the product. Be sure to allow the amount of space as shown below or greater when installing the product.

The exterior may differ depending on the product.

Precautions for storage

High-glossy models can develop white stains on the surface if an ultrasonic wave humidifier is used nearby.

Contact your nearest Samsung Customer Service Center if you want to clean the inside of the product (Service fee will be charged.)

Safety Precautions

Caution

RISK OF ELECTRIC SHOCK DO NOT OPEN
Caution: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. (OR BACK)
THERE ARE NO USER SERVICEABLE PARTS INSIDE.
REFER ALL SERVICING TO QUALIFIED PERSONNEL.

This symbol indicates that high voltage is present inside.
It is dangerous to make any kind of contact with any internal part of this product.

This symbol alerts you that important literature concerning operation and maintenance has been included with this product.

Symbols

Warning

A serious or fatal injury may result if instructions are not followed.

Caution

Personal injury or damage to properties may result if instructions are not followed.
Cleaning

- Exercise care when cleaning as the panel and exterior of advanced LCDs are easily scratched.
- Take the following steps when cleaning.

1. Power off the product and computer.
2. Disconnect the power cord from the product.
   - Hold the power cable by the plug and do not touch the cable with wet hands. Otherwise, an electric shock may result.
3. Wipe the monitor with a clean, soft and dry cloth.
   - Do not apply a cleaning agent that contains alcohol, solvent, or surfactant to the monitor.
   - Do not spray water or detergent directly on the product.
4. Wet a soft and dry cloth in water and wring thoroughly to clean the exterior of the product.
5. Connect the power cord to the product when cleaning is finished.
6. Power on the product and computer.

Electricity and Safety

**Warning**

- Do not use a damaged power cord or plug, or a loose power socket.
- Do not use multiple products with a single power socket.
- Do not touch the power plug with wet hands.
- Insert the power plug all the way in so it is not loose.
- Connect the power plug to a grounded power socket (type 1 insulated devices only).
- Do not bend or pull the power cord with force. Be careful not to leave the power cord under a heavy object.
- Do not place the power cord or product near heat sources.
- Clean any dust around the pins of the power plug or the power socket with a dry cloth.

**Caution**

- Do not disconnect the power cord while the product is being used.
- Only use the power cord provided with your product by Samsung. Do not use the power cord with other products.
- Keep the power socket where the power cord is connected unobstructed.
  - The power cord must be disconnected to cut off power to the product when an issue occurs.
- Hold the plug when disconnecting the power cord from the power socket.
Installation

**Warning**

- DO NOT PLACE CANDLES, INSECT REPELLANTS OR Cigarettes ON top OF THE PRODUCT. DO NOT INSTALL THE PRODUCT NEAR HEAT SOURCES.
- Do not install the product in poorly ventilated spaces such as a bookcase or closet.
- Install the product at least 10 cm away from the wall to allow ventilation.
- Keep the plastic packaging out of the reach of children.
  - Children may suffocate.
- Do not install the product on an unstable or vibrating surface (insecure shelf, sloped surface, etc.)
  - The product may fall and become damaged and/or cause an injury.
  - Using the product in an area with excess vibration may damage the product or cause a fire.
- Do not install the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke.
- Do not expose the product to direct sunlight, heat, or a hot object such as a stove.
  - The product lifespan may be reduced or a fire may result.
- Do not install the product within the reach of young children.
  - The product may fall and injure children.
- Edible oil (such as soybean oil) may damage or distort the product. Keep the product away from oil pollution. And do not install or use the product in the kitchen or near the kitchen stove.

**Caution**

- Do not drop the product while moving.
- Do not set down the product on its front.
- When installing the product on a cabinet or shelf, make sure that the bottom edge of the front of the product is not protruding.
  - The product may fall and become damaged and/or cause an injury.
  - Install the product only on cabinets or shelves of the right size.
- Set down the product gently.
  - Product failure or personal injury may result.
- Installing the product in an unusual place (a place exposed to a lot of fine dust, chemical substances, extreme temperatures or a significant presence of moisture, or a place where the product will operate continuously for an extended period of time) may seriously affect its performance.
  - Be sure to consult Samsung Customer Service Center if you want to install the product at such a place.
**Warning**

- There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.
  - Contact Samsung Customer Service Center for repairs.
- To move the product, first disconnect all the cables from it, including the power cable.
- If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact Samsung Customer Service Center.
- Do not let children hang from the product or climb on top of it.
  - Children may become injured or seriously harmed.
- If the product is dropped or the outer case is damaged, turn off the power and disconnect the power cord. Then contact Samsung Customer Service Center.
  - Continued use can result in a fire or electric shock.
- Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product.
  - The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.
- During a lightning or thunderstorm, power off the product and remove the power cable.
- Do not drop objects on the product or apply impact.
- Do not move the product by pulling the power cord or any cable.
- If a gas leakage is found, do not touch the product or power plug. Also, ventilate the area immediately.
- Do not lift or move the product by pulling the power cord or any cable.
- Do not use or keep combustible spray or an inflammable substance near the product.
- Ensure the vents are not blocked by tablecloths or curtains.
  - An increased internal temperature may cause a fire.

**Operation**

- Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).
  - Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Center.
- Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.
  - Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Center.
Caution

- Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.
  - Activate power-saving mode or a moving-picture screen saver if you will not be using the product for an extended period of time.
- Disconnect the power cord from the power socket if you do not plan on using the product for an extended period of time (vacation, etc).
  - Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.
- Use the product at the recommended resolution and frequency.
  - Your eyesight may deteriorate.
- Do not put AC/DC adapters together.
- Remove the plastic bag from the AC/DC adapter before you use it.
- Do not let water enter the power device or get the device wet.
  - An electric shock or fire may result.
  - Avoid using the product outdoors where it can be exposed to rain or snow.
  - Be careful not to get the AC/DC adapter wet when you wash the floor.
- Do not put the AC/DC adapter near to any heating apparatus.
  - Otherwise, a fire may result.
- Keep the AC/DC adapter in a well-ventilated area.
- If you place the AC/DC power adapter so that it is hanging with the cord input facing upwards, water or other foreign substances could enter the Adapter and cause the Adapter to malfunction. Make sure to rest the AC/DC power adapter flat on a table or the floor.
- Do not hold the product upside-down or move it by holding the stand.
  - The product may fall and become damaged or cause an injury.
- Looking at the screen too close for an extended period of time can deteriorate your eyesight.
- Do not use humidifiers or stoves around the product.
- Rest your eyes for more than 5 minutes for every 1 hour of product use.

- Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.
- Store small accessories out of the reach of children.
- Exercise caution when adjusting the product angle or stand height.
  - Your hand or finger may get stuck and injured.
  - Tilting the product at an excessive angle may cause the product to fall and an injury may result.
- Do not place heavy objects on the product.
  - Product failure or personal injury may result.
- When using headphones or earphones, do not turn the volume too high.
  - Having the sound too loud may damage your hearing.

Chapter 02

Parts

Control Panel

The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

Icons | Description
---|---
JOG Button | Multi directional button that helps navigate.
  - The JOG button is located on the rear left side of the product. The button can be used to move up, down, left or right, or as Enter.
Function Key Guide | Press the JOG button when the screen is turned on. The Function Key Guide will appear. To access the onscreen menu when the guide is displayed, press the corresponding direction button again.
  - Function Key Guide may vary depending on the function or product model. Please refer to the actual product.
Direct Key guide

The shortcut button screen (OSD menu) shown below is displayed only when the monitor screen is turned on, the computer resolution changes, or the input source changes.

- UP/DOWN: Adjust Brightness, Contrast, Eye Saver Mode.
- LEFT/RIGHT: Adjust Volume.
- PRESS(ENTER): Display Function Key Guide.
Function Key Guide

To enter the main menu or to use other items, press the JOG button to display the Function Key Guide. You can exit by pressing the JOG button again.

UP/DOWN/LEFT/RIGHT: Move to the item you want. The description for each item will appear when the focus changes.
PRESS(ENTER): The selected item will be applied.

Return

Icons Description

Selects \( \rightarrow \) to change the input signal by moving the JOG button in the Function Key Guide screen. A message will appear on the top left corner of the screen if the input signal has been changed.

Selects \( \boxed{\text{Select}} \) by moving the JOG button in the function key guide screen.
The OSD (On Screen Display) of your Monitor’s feature appears.
OSD control lock: Maintain the current settings, or lock the OSD control to prevent unintended changes to settings.
Enable/Disable: To lock/unlock the OSD control, press the LEFT button for 10 seconds when the main menu displayed.
If the OSD control is locked, Brightness and Contrast can be adjusted. PIP/PBP is available.
Eye Saver Mode is available. Information can be viewed.

Selects \( \boxed{\text{Select}} \) by moving the JOG button in the function key guide screen.
Press the button when configuring settings for the PIP/PBP function is required.

Selects \( \boxed{\text{Select}} \) to turn the Monitor off by moving the JOG button in the function key guide screen.

Actual models because of functional variation, Function key guide options will be different.
When the monitor displays nothing (i.e. Power saving mode or Non-signal mode), 2 direct keys for control source and power could be used as below.

<table>
<thead>
<tr>
<th>JOG Button</th>
<th>Power saving/Non-signal mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>UP</td>
<td>Source Change</td>
</tr>
<tr>
<td>Down</td>
<td></td>
</tr>
<tr>
<td>PRESS(ENTER) for 2 seconds</td>
<td>Power Off</td>
</tr>
</tbody>
</table>

When the monitor displays the Main menu the JOG Button could be used as below.

<table>
<thead>
<tr>
<th>JOG Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>UP/DOWN</td>
<td>Move the option</td>
</tr>
<tr>
<td>LEFT</td>
<td>Exit the Main menu.</td>
</tr>
<tr>
<td></td>
<td>Close Sublist without saving value.</td>
</tr>
<tr>
<td></td>
<td>Value decreases in the slider.</td>
</tr>
<tr>
<td>RIGHT</td>
<td>Move to next depth.</td>
</tr>
<tr>
<td></td>
<td>Value increases in the slider.</td>
</tr>
<tr>
<td>PRESS(ENTER)</td>

</tbody>
</table>
Configuring Eye Saver Mode, Brightness and Contrast from the Initial Screen

Adjust the Brightness, Contrast and Eye Saver Mode by moving the JOG button.

<table>
<thead>
<tr>
<th>▲ Contrast</th>
<th>▼ Brightness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eye Saver Mode</td>
<td>Off</td>
</tr>
</tbody>
</table>

* The displayed image may differ depending on the model.

**Eye Saver Mode**
- Not available when PIP/PBP Mode is set to On.

**Brightness**
- This menu is not available when MAGIC Bright is set to Dynamic Contrast mode.
- This menu is not available when Eco Saving Plus is enabled.
- This menu is not available when Eye Saver Mode is enabled.

**Contrast**
- This menu is not available when MAGIC Bright is in Cinema or Dynamic Contrast mode.
- This menu is not available when Game Mode is enabled.
- This menu is not available when PIP/PBP Mode is set to On and the Size is set to Extra Large (PBP Mode).

Configuring Volume in the Initial Screen

Adjust the Volume by moving the JOG button when the Direct Key Guide is displayed on the screen.

Volume 50

* The displayed image may differ depending on the model.

- If the audio quality of a connected input device is poor, the Auto Mute function on the product may mute the sound or cause choppy audio when applying the headphones or speakers. Set the input volume for the input device to at least 20% and control the volume using the volume control (JOG button LEFT/RIGHT) on the product.
- **What is Auto Mute?**
  - The function mutes the audio to improve sound effect when there is sound noise or when the input signal is weak, usually due to a problem with the volume of an input device.
- To activate the Mute function, access the Volume control screen, then use the JOG button to move the focus down. To deactivate the Mute function, access the Volume control screen, then increase or decrease the Volume.
Reverse Side

The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

<table>

</tbody>
</table>

Adjusting the Product Tilt

The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

-2.0° (±2.0°) – 20.0° (±2.0°)

- You can adjust the product tilt.
- Hold the lower part of the product and adjust the tilt carefully.
Anti-theft Lock

An anti-theft lock allows you to use the product securely even in public places. The locking device shape and locking method depend on the manufacturer. Refer to the user guide provided with your anti-theft locking device for details.

To lock an anti-theft locking device:

1. Fix the cable of your anti-theft locking device to a heavy object such as a desk.
2. Put one end of the cable through the loop on the other end.
3. Insert the locking device into the anti-theft lock slot at the back of the product.
4. Lock the locking device.

- An anti-theft locking device can be purchased separately.
- Refer to the user guide provided with your anti-theft locking device for details.
- Anti-theft locking devices can be purchased at electronics retailers or online.
Installing a Wall-mount Kit or Desktop Stand

1. Power the product off and remove the power cable from the power socket.
2. Attach the wall-mount kit or desktop stand here
3. Bracket (sold separately)
4. Align the grooves and tightly fasten the screws on the bracket on the product with the corresponding parts on the wall-mount kit or desktop stand you want to attach.

Notes
- Using a screw longer than the standard length can damage the internal components of the product.
- The length of screws required for a wall mount that does not comply with the VESA standards may vary depending on the specifications.
- Do not use screws that do not comply with the VESA standards. Do not attach the wall-mount kit or desktop stand using excessive force. The product may get damaged or fall and cause personal injury. Samsung shall not be held liable for any damage or injury caused by using improper screws or attaching the wall-mount kit or desktop stand using excessive force.
- Samsung shall not be held liable for any product damage or personal injury caused by using a wall-mount kit other than the one specified or from an attempt to install the wall-mount kit on your own.
- To mount the product on a wall, ensure you purchase a wall-mount kit that can be installed 10 cm or farther away from the wall.
- Be sure to use a wall-mount kit that complies with the standards.
- To install the monitor using a wall mount, disconnect the stand base from the monitor.

Unit: mm (inches)

<table>
<thead>
<tr>
<th>Model name</th>
<th>VESA screw hole specs (A * B)</th>
<th>Standard Screw in millimeters</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>U28E570D</td>
<td>75.0 x 75.0 (3.0 x 3.0)</td>
<td>M4</td>
<td>4</td>
</tr>
</tbody>
</table>

Do not install your Wall Mount Kit while your product is turned on. It may result in personal injury due to electric shock.
Installation

Attaching the Stand

Before assembling the product, place the product down on a flat and stable surface so that the screen is facing downwards.

1. Insert the stand neck into the stand base in the direction shown in the figure.

2. Check that the stand neck is firmly connected.

3. Tightly fasten the connecting screw at the bottom of the stand base.

4. Place a soft cloth over the table to protect the product and place the product onto the cloth so that the front of the product is facing downwards.

5. Hold the main body of the product with your hand as shown by the figure. Push the assembled stand into the main body in the direction of the arrow as shown in the figure.

- Caution
Do not hold the product upside down only by the stand.
Removing the Stand

Before assembling the product, place the product down on a flat and stable surface so that the screen is facing downwards.

The exterior may differ depending on the product.

1. Place a soft cloth over the table to protect the product and place the product onto the cloth so that the front of the product is facing downwards.

2. To disassemble the stand from the monitor, make sure to press the lower part of the monitor with one hand, and pull and sway sideways the stand with the other hand, as shown in the picture.

3. Turn the connecting screw at the bottom of the stand base to separate it.

4. Remove the stand neck from the stand base by pulling it in the direction of the arrow as shown in the figure.
Chapter 03
Connecting and Using a Source Device

Pre-connection Checkpoints

- Before connecting a source device, read the user manual provided with it.
  The number and locations of ports on source devices may differ from device to device.
- Do not connect the power cable before connecting all other cables.
  Ensure you connect a source device first before connecting the power cable.
  Connecting the power cable during connection may damage the product.
- Check the types of ports at the back of the product you want to connect.

Connecting and Using a PC

Select a connection method suitable for your PC.
- Connecting parts may differ in different products.
- Provided ports may vary depending on the product.

Connection Using the HDMI Cable

Connection Using an HDMI-DVI Cable
Connection Using an DP Cable

Connecting to Headphones

Tidying Up the Connected Cables

Connecting the Power

1. Connect the power cable to the AC/DC adapter. Then, connect the AC/DC adapter to the DC 14V port on the back of the product.

2. Next, connect the power cable to the power outlet.

3. Press the JOG button on the back of the monitor to turn it on.

   - The input voltage is switched automatically.
Correct posture to use the product

Use the product in the correct posture as follows:

- Straighten your back.
- Adjust the angle so light does not reflect on the screen.
- Keep your forearms perpendicular to your upper arms and level with the back of your hands.
- Keep your elbows at about a right angle.
- Adjust the height of the product so you can keep your knees bent at 90 degrees or more, your heels attached to the floor, and your arms lower than your heart.

Driver Installation

- You can set the optimum resolution and frequency for this product by installing the corresponding drivers.
- To install the latest version of the product driver, download it from the Samsung Electronics website at http://www.samsung.com.

Setting Optimum Resolution

An information message about setting optimum resolution will appear if you power on the product for the first time after purchase.

Select a language on the product and change the resolution on your PC to the optimum setting.

- If the optimum resolution is not selected, the message will appear up to three times for a specified time even when the product is turned off and on again.
- The optimum resolution can also be selected in Control Panel on your PC.
Chapter 04
Screen Setup

Configure the screen settings such as brightness.
A detailed description of each function is provided. Refer to your product for details.

SAMSUNG MAGIC Bright

This menu provides an optimum picture quality suitable for the environment where the product will be used.

- This menu is not available when Eco Saving Plus is enabled.
- This menu is not available when SAMSUNG MAGIC Angle is enabled.
- This menu is not available when Game Mode is enabled.
- This menu is not available when Eye Saver Mode is enabled.
- Not available when PIP/PBP Mode is set to On.

You can customize the brightness to suit your preferences.

In PC mode

- Custom: Customize the contrast and brightness as required.
- Standard: Obtain a picture quality suitable for editing documents or using Internet.
- Cinema: Obtain the brightness and sharpness of TVs suitable for enjoying video and DVD content.
- Dynamic Contrast: Obtain balanced brightness through automatic contrast adjustment.

In AV mode

When the external input is connected through HDMI and PC/AV Mode is set to AV, SAMSUNG MAGIC Bright has four automatic picture settings (Dynamic, Standard, Movie and Custom) that are preset at the factory. You can activate either Dynamic, Standard, Movie or Custom. You can select Custom which automatically recalls your personalized picture settings.

- Dynamic: Select this mode to view a sharper image than in Standard mode.
- Standard: Select this mode when the surroundings are bright. This also provides a sharp image.
- Movie: Select this mode when the surroundings are dark. This will save power and reduce eye fatigue.
- Custom: Select this mode when you want to adjust the image according to your preferences.

The displayed image may differ depending on the model.
Brightness

You can adjust the general brightness of the picture. (Range: 0~100)
A higher value will make the picture appear brighter.

- This menu is not available when MagicBright is set to Dynamic Contrast mode.
- This menu is not available when Eco Saving Plus is enabled.
- This menu is not available when Eye Saver Mode is enabled.

Contrast

Adjust the contrast between the objects and background. (Range: 0~100)
A higher value will increase the contrast to make the object appear clearer.

- This option is not available when MagicBright is in Cinema or Dynamic Contrast mode.
- This menu is not available when Game Mode is enabled.
- This menu is not available when PIP/PBP Mode is set to On and the Size is set to PBP (PBP Mode).

Sharpness

Make the outline of objects more clear or blurry. (Range: 0~100)
A higher value will make the outline of objects clearer.

- This option is not available when MagicBright is in Cinema or Dynamic Contrast mode.
- This menu is not available when Game Mode is enabled.
- Not available when PIP/PBP Mode is set to On.

Color

Adjust the tint of the screen.

- This menu is not available when MagicBright is set to Cinema or Dynamic Contrast mode.
- This menu is not available when Game Mode is enabled.
- This menu is not available when Eye Saver Mode is enabled.
- The Color Tone and Gamma menu is not available when MagicAngle is enabled.
- Not available when PIP/PBP Mode is set to On.

- Red: Adjust the red saturation level. Values closer to 100 mean greater intensity for the color.
- Green: Adjust the green saturation level. Values closer to 100 mean greater intensity for the color.
- Blue: Adjust the blue saturation level. Values closer to 100 mean greater intensity for the color.
- Color Tone: Select a color tone that best suits your viewing needs.
  - Cool 2: Set the color temperature to be cooler than Cool 1.
  - Cool 1: Set the color temperature to be cooler than Normal mode.
  - Normal: Display the standard color tone.
  - Warm 1: Set the color temperature to be warmer than Normal mode.
  - Warm 2: Set the color temperature to be warmer than Warm 1.
  - Custom: Customize the color tone.
- When the external input is connected through HDMI/DP and PC/AV Mode is set to AV, Color Tone has four color temperature settings (Cool, Normal, Warm and Custom).

- Gamma: Adjust the middle level of luminance.
  - Mode1 / Mode2 / Mode3
SAMSUNG MAGIC Angle

SAMSUNG MAGIC Angle allows you to configure the settings to obtain the optimum picture quality according to your viewing angle.

• This menu is not available when SAMSUNG MAGIC Bright is set to Cinema or Dynamic Contrast mode.
• This menu is not available when Game Mode or Eye Saver Mode is enabled.
• Not available when PIP/PBP Mode is set to On.

You can customize the angle to suit your preferences.

- Off 1: Select this option to view directly in front of the product.
- Lean Back Mode 1 2: Select this option to view from a place slightly lower than the product.
- Lean Back Mode 2 3: Select this option to view from a place lower than Lean Back Mode 1.
- Standing Mode 4: Select this option to view from a place higher than the product.
- Side Mode 5: Select this option to view from either side of the product.
- Group View: Select this option for more than one viewer to view from places 1, 4, and 5.
- Custom: Lean Back Mode 1 will be applied by default if Custom is selected.

HDMI Black Level

If a DVD player or set-top box is connected to the product via HDMI, image quality degradation (contrast/color degradation, black level, etc.) may occur, depending on the connected source device. In such case, HDMI Black Level can be used to adjust the image quality.

If this is the case, correct the degraded picture quality using HDMI Black Level.

• Normal: Select this mode when there is no contrast ratio degradation.
• Low: Select this mode to reduce the black level and increase the white level when there is a contrast ratio degradation.

- HDMI Black Level may not be compatible with some source devices.

Eye Saver Mode

- Not available when PIP/PBP Mode is set to On.

Set to an optimum picture quality suitable for eye relaxation.

TÜV Rheinland “Low Blue Light Content” is a certification for products which meet requirements for lower blue light levels. When Eye Saver Mode is ‘On’, the blue light that wavelength is around 400nm will decrease, and it will provide an optimum picture quality suitable for eye relaxation. At the same time, the blue light level is lower than in the default settings, and it was tested by TÜV Rheinland and certified as it met the requirements of TÜV Rheinland “Low Blue Light Content” standards.
Game Mode

Configure the product screen settings for game mode.
Use this feature when playing games on a PC or when a game console such as PlayStation™ or Xbox™
is connected.
- This menu is not available when Eye Saver Mode is enabled.
- Not available when PIP/PBP Mode is set to On.

Response Time

Accelerate the panel response rate to make video appear more vivid and natural.
- It is best to set Response Time to Standard or Faster when you are not viewing a movie.
- This menu is not available when PIP/PBP Mode is set to On and the Size is set to (PBP Mode).

Picture Size

Change the picture size.
- This menu is not available when PIP/PBP Mode is set to On and the Size is set to (PBP Mode).
- This option is not available when FreeSync is enabled.

In PC mode
- Auto: Display the picture according to the aspect ratio of the input source.
- Wide: Display the picture in full screen regardless of the aspect ratio of the input source.

In AV mode
- 4:3: Display the picture with an aspect ratio of 4:3. Suitable for videos and standard broadcasts.
- 16:9: Display the picture with an aspect ratio of 16:9.
- Screen Fit: Display the picture with the original aspect ratio without cutting off.
- The function may not be supported depending on the ports provided with the product.
- Changing the screen size is available when the following conditions are satisfied.
  - A digital output device is connected using the HDMI/DP cable.
  - The input signal is 480p, 576p, 720p, or 1080p and monitor can display normally (Not every model can support all of these signals.).
  - This can only be set when the external input is connected through HDMI/DP and PC/AV Mode is set to AV.
Screen Adjustment

This menu is only available when Picture Size is set to Screen Fit in AV Mode. When a 480P or 576P or 720P or 1080P signal is input in AV mode and the monitor can display normally, select Screen Fit to adjust horizontal position in 0-6 levels.

Configuring H-Position & V-Position

H-Position: Move the screen to the left or right.

V-Position: Move the screen up or down.
Chapter 05
Configuring the PIP/PBP Settings
A detailed description of each function is provided. Refer to your product for details.

PIP/PBP

The PIP (Picture in Picture) function separates the screen into two parts. One source device is displayed on the main screen at the same time another source device is displayed in inset windows. The PBP (Picture by Picture) function separates the screen in half displaying output from two different source devices simultaneously on the left and right sides of the screen.

![PIP/PBP Mode Configuration](image)

- **Turn PIP/PBP Mode on or off.**

- **Size**

- **Position**

- **Sound Source**

- **Source**

- **Picture Size**

- **Contrast**

- **DisplayPort**

- **Auto**

- **Return**

The displayed image may differ depending on the model.

---

- Compatible with Windows 7 and Windows 8.

- The **PIP/PBP** function may not be available depending on the specifications of the graphics card used. If the screen is blank in **PIP/PBP** mode when the optimum resolution is selected, go to `Control Panel → Display → Screen Resolution` and click `Detect` on the PC. (Instructions are based on Windows 7.) If the screen is blank when the resolution is set to the optimum resolution, change the resolution to 1280 x 1024.

- The screen may flicker briefly or appear after a delay when you enable or disable the **PIP/PBP** function or when you change the screen size with the **PIP/PBP** function activated. This can typically arise when a PC and a monitor are connected to two or more input sources. It has nothing to do with the performance of a monitor. The issue is mainly caused when the video signals are delayed in transmission to the monitor depending on the graphics card performance.

- To maximize the picture quality and sound can be normal output it is recommended to use a graphics card or DVD that supports 4K (3840 x 2160 at 30Hz) resolution when connect **HDMI 1** port.

- To maximize the picture quality and sound can be normal output it is recommended to use a graphics card or DVD that supports 4K (3840 x 2160 at 60Hz) resolution when connect **HDMI 2** port.

- When the **PIP/PBP** function is enabled, the resolution will not be able to automatically switch to the optimum resolution due to a compatibility issue between the graphics card and the Windows system. Set **PIP/PBP Mode** to **Off**. Alternatively, restart the monitor, then set the resolution to the optimum setting using the Windows interface.
Configuring PIP/PBP Mode

Enable or disable the PIP/PBP Mode function.

Configuring Size

Select the size and aspect ratio of the sub-screen.

- \(1920 \times 2160\): Select the icon image if you want to use PBP mode where the optimum resolution for the left and right sides of the screen is \(1920 \times 2160\) (width x height).
- \(720 \times 480\): Select the icon image if you want to use PIP mode where the optimum resolution for the sub-screen is \(720 \times 480\) (width x height).
- \(1280 \times 720\): Select the icon image if you want to use PIP mode where the optimum resolution of the sub-screen is \(1280 \times 720\) (width x height).
- \(1920 \times 1080\): Select the icon image if you want to use PIP mode where the optimum resolution of the sub-screen is \(1920 \times 1080\) (width x height).

Configuring Position

Select the position of the sub-screen from the available options.

- Not available when PBP is selected.
- The screen may flicker if the input signal is unstable.

Configuring Sound Source

Set which screen you want to hear the sound for.

**PIP mode**

- [ ]

**PBP mode**

- [ ]

Configuring Source

Select the source for each screen.

**PIP Mode (available in PIP mode)**

- The input source for the main screen changes.
- The screen may flicker if the input signal is unstable.
- When the Function Key Guide appears, move the JOG button LEFT to select the icon and then press the JOG button. The main screen will switch in the order DisplayPort → HDMI 1 → HDMI 2.

**PBP Mode (available in PBP mode)**

- The input source for the main screen changes.
- The screen may flicker if the input signal is unstable.
- When the input signal of the left and right screens are the same, the operation cannot be performed.
- When the Function Key Guide appears, move the JOG button LEFT to select the icon and then press the JOG button. The same PBP source setting menu appears.
Configuring Picture Size

**PIP Mode (available in PIP mode (Size [ ] / [ ] / [ ]))**

In **PC mode**
- **Auto:** Display the picture according to the aspect ratio of each screen input source.
- **Wide:** Display the picture in full screen regardless of the aspect ratio of each screen input source.

In **AV mode**
- **4:3:** Display the picture of the sub-screen with an aspect ratio of 4:3. Suitable for videos and standard broadcasts.
- **16:9:** Display the picture of the sub-screen with an aspect ratio of 16:9.
- **Screen Fit:** Display the picture of the sub-screen with the original aspect ratio without cutting anything off.

**The function may not be supported depending on the ports provided with the product.**

**Changing the screen size is available when the following conditions are satisfied.**
- A digital output device is connected using the HDMI/DP cable.
- The input signal is 480p, 576p, 720p, or 1080p and monitor can display normally (Not every model can support all of these signals.).
- This can only be set when the external input is connected through HDMI/DP and **PC/AV Mode** is set to **AV**.

**PBP Mode (available in PBP mode (Size [ ] / [ ]))**

In **PC mode**
- **Auto:** Display the picture according to the aspect ratio of each screen input source.
- **Wide:** Display the picture in full screen regardless of the aspect ratio of each screen input source.

In **AV mode**
- **4:3:** Display the picture of the sub-screen with an aspect ratio of 4:3. Suitable for videos and standard broadcasts.
- **16:9:** Display the picture of the sub-screen with an aspect ratio of 16:9.
- **Screen Fit:** Display the picture of the sub-screen with the original aspect ratio without cutting anything off.

**The function may not be supported depending on the ports provided with the product.**

**Changing the screen size is available when the following conditions are satisfied.**
- A digital output device is connected using the HDMI/DP cable.
- The input signal is 480p, 576p, 720p, or 1080p and monitor can display normally (Not every model can support all of these signals.).
- This can only be set when the external input is connected through HDMI/DP and **PC/AV Mode** is set to **AV**.

Configuring Contrast

**PIP Mode**
Adjust the contrast level for sub-screen. (available in PIP mode (Size [ ] / [ ] / [ ]))

**PBP Mode**
Adjust the contrast level for each screen. (available in PBP mode (Size [ ]))
Chapter 06
Adjusting OSD (On Screen Display) settings
A detailed description of each function is provided. Refer to your product for details.

Transparency
Set the transparency for the menu windows.

Language
Set the menu language.

Display Time
Set the on-screen display (OSD) menu to automatically disappear if the menu is not used for a specified period of time.

The displayed image may differ depending on the model.
FreeSync

The functions available may vary depending on the product model. Refer to the actual product. **FreeSync** is a DisplayPort 1.2 function, so the choice of the DisplayPort Ver. 1.1 in OSD, or when the access of HDMI signal, the FreeSync function is not available. Make sure to use a Samsung DP cable. DP cables not supplied by Samsung may not be compatible with the product.

Not available when PIP/PBP Mode is set to On.

The sound quality of the monitor may decrease if FreeSync is enabled.
- Off: Disable FreeSync.
- On: Enable the basic FreeSync functions of the AMD graphics card.

FreeSync technology is a solution that eliminates screen tearing without all the usual lag and latency. FreeSync can be operated when you use AMD’s graphic card with supporting FreeSync solution.

The displayed image may differ depending on the model.

If the FreeSync function is enabled, the screen may flicker when you play games.

FreeSync technology is a solution that eliminates screen tearing without all the usual lag and latency. FreeSync can be operated when you use AMD’s graphic card with supporting FreeSync solution.

FreeSync is only supported by AMD graphics cards. Select FreeSync Off if you are using a graphics card from a different manufacturer.

Please refer to the AMD’s official website related situation.

Only a few of the following types of AMD graphics card can support FreeSync, and need to install the AMD’s latest official FreeSync driver.
• Radeon R9 290X/290
• Radeon R9 285
• Radeon R7 260X/260
• AMD A10 “Kaveri” APU (ex. A10 7850K)

* For additional AMD graphics card models that support the FreeSync feature, visit the official AMD website.
* If the FreeSync function is enabled, the response rate during the game may fluctuate depending on the resolution. A higher resolution generally decreases the response rate.
* If the FreeSync function is enabled, the screen can flicker depending on the game option settings. Decreasing the game setting values might help to remove the flicker. Installing the latest drivers from the AMD website may also fix this issue.

Point the right mouse button, select the AMD Catalyst Control Center.
Eco Saving Plus

The **Eco Saving Plus** function reduces power consumption by controlling the electric current used by the monitor panel.

- This option is not available when **MagicBright** is in **Dynamic Contrast** mode.
- This menu is not available when **Game Mode** is enabled.
- This menu is not available when **Eye Saver Mode** is enabled.
- Not available when **PIP/PBP Mode** is set to **On**.

- **Off**: Deactivate the **Eco Saving Plus** function.
- **Auto**: The power consumption will automatically be reduced by about 10% over the current setting. (The reduction of power consumption depends on the customer screen brightness condition.)
- **Low**: The power consumption will be reduced by 25% over the default setting.
- **High**: The power consumption will be reduced by 50% over the default setting.

Off Timer

**Off Timer**: Turn on **Off Timer** mode.

**Turn Off After**: The off timer can be set within a range of 1 to 23 hours. The product will automatically power off after the specified number of hours.

- This option is only available when **Off Timer** is set to **On**.
- For products for the market in some regions, the **Off Timer** is set to automatically activate 4 hours after the product powers on. This is done in accordance with power supply regulations. If you do not want the timer to activate, go to **MENU → System** and set **Off Timer** to **Off**.

PC/AIV Mode

Set **PC/AIV Mode** to **AV**. The picture size will be enlarged.

This option is useful when you view a movie.

- Set to **PC** when connected to a PC.
- Set to **AV** when connected to an AV device.

- Supplied for the wide models only such as 16:9 or 16:10.

- If the monitor (when set to **HDMI 1**, **HDMI 2**, or **DisplayPort**) is in power saving mode or is displaying the message **Check Signal Cable**, press the **MENU** button to display the On Screen Display (OSD). You can select **PC** or **AV**.

DisplayPort Ver.

Select your Displayport. Displayport 1.1 supports High Bit Rate 1, while 1.2 supports High Bit Rate 2.

- Incorrect settings may cause the screen to go blank. If this occurs, check the device specifications.
- If the monitor (when set to **HDMI 1**, **HDMI 2**, or **DisplayPort**) is in power saving mode or is displaying the message **Check Signal Cable**, press the **MENU** button to display the On Screen Display (OSD). You can select **1.1** or **1.2**.
- If you select **1.1**, the maximum resolution of your screen drops to 2560 x 1440 due to the limitations in HBR1 transmission speeds.

Source Detection

- Not available when **PIP/PBP Mode** is set to **On**.

Select either **Auto** or **Manual** as the method to recognize input signal.
Key Repeat Time

Control the response rate of a button when the button is pressed. 

*Acceleration, 1 sec, or 2 sec* can be selected. If *No Repeat* is selected, a command responds only once when a button is pressed.

Power LED On

Configure the settings to enable or disable the power LED located at the lower part of the product.

- **Working**: The power LED is on when the product is turned on.
- **Stand-by**: The power LED is on when the product is turned off.

Reset All

Return all the settings for the product to the default factory settings.

Information

View the current input source, frequency and resolution.

The displayed image may differ depending on the model.
Easy Setting Box

Easy Setting Box enables users to use the monitor by partitioning multiple sections.

To install the latest version of Easy Setting Box, download it from the Samsung Electronics website at http://www.samsung.com.

- The software may not work properly if you do not restart the computer after the installation.
- The Easy Setting Box icon may not appear depending on the computer system and the product specifications.
- If the shortcut icon does not appear, press the F5 key.

Restrictions and Problems with the Installation

The Easy Setting Box installation may be affected by the Graphics Card, Motherboard and the Networking Environment.

System Requirements

<table>

Requirements Before Contacting Samsung Customer Service Center

Before calling Samsung Customer Service Center, test your product as follows. If the problem persists, contact Samsung Customer Service Center.

Testing the Product

Check if your product is operating normally by using the product test function.
If the screen is turned off and the power indicator blinks even though the product is properly connected to a PC, perform a self-diagnosis test.

1. Power off both the PC and product.
2. Disconnect the cables from the product.
3. Power on the product.
4. If the message **Check Signal Cable** appears, the product is working normally.
   — If the screen remains blank, check the PC system, video controller and cable.

Checking the Resolution and Frequency

For a mode that exceeds the supported resolution (refer to **Standard Signal Mode Table**), the message **Not Optimum Mode** will appear for a short time.

— The displayed resolution may vary, depending on the computer system settings and cables.

Check the following.

**Installation issue (PC mode)**

- The screen keeps switching on and off.
  - Check the cable connection between the product and PC, and ensure the connectors are locked.

**Screen issue**

- The power LED is off. The screen will not switch on.
  - Check that the power cable is connected properly.

- The message **Check Signal Cable** appears.
  - Check that the cable is properly connected to the product.
  - Check that the device connected to the product is powered on.

- **Not Optimum Mode** is displayed.
  - This message appears when the signal from the graphics card exceeds the maximum resolution or frequency for the product.
  - Change the maximum resolution and frequency to suit the product performance, referring to **Standard Signal Mode Table** (P.40).

- The images on the screen look distorted.
  - Check the cable connection to the product.
The screen appears unstable and shaky. There are shadows or ghost images left on the screen. Check that the resolution and frequency for the PC are within the range of resolution and frequency compatible with the product. Next, if required, change the settings, referring to Standard Signal Mode Table (P.40) in this manual and the Information menu on the product.

The screen is too bright. The screen is too dark.
Adjust Brightness and Contrast.

Screen color is inconsistent.
Change the Color settings.

The colors on the screen have a shadow and are distorted.
Change the Color settings.

White does not really look white.
Change the Color settings.

There is no image on the screen and the power LED blinks every 0.5 to 1 second.
The product is operating in power-saving mode.
Press any key on the keyboard or move the mouse to return to normal operating mode.

Video playback is choppy.
Playback of high-definition large video files can be choppy. This may be because the video player is not optimized for the computer resource.
Try playing the file on another video player.

Sound issue

There is no sound.
Check the connection of the audio cable or adjust the volume.

The volume is too low.
Adjust the volume.
If the volume is still low after turning it up to the maximum level, adjust the volume on your PC sound card or software program.

Source device issue

A beeping sound is heard when my PC is booting.
If a beeping sound is heard when your PC is booting, have your PC serviced.

The LED lights on the frame of the product may be seen depending on the user’s viewing angle. The light is harmless to people and has no bearing on product features and performance. The product is safe to use.
Q & A

Refer to the user manual for your PC or graphics card for further instructions on adjustment.

How can I change the frequency?
Set the frequency on your graphics card.

- Windows XP: Go to Control Panel → Appearance and Themes → Display → Settings → Advanced → Monitor, and adjust Refresh rate under Monitor settings.
- Windows Vista: Go to Control Panel → Appearance and Personalization → Personalization → Display Settings → Advanced Settings → Monitor, and adjust Refresh rate under Monitor settings.
- Windows 7: Go to Control Panel → Appearance and Personalization → Display → Screen Resolution → Advanced settings → Monitor, and adjust Refresh rate under Monitor settings.
- Windows 10: Go to Settings → System → Display → Advanced display settings → Display adapter properties → Monitor, and adjust Screen refresh rate under Monitor settings.

How can I change the resolution?

- Windows XP: Go to Control Panel → Appearance and Themes → Display → Settings, and adjust the resolution.
- Windows ME/2000: Go to Control Panel → Display → Settings, and adjust the resolution.
- Windows Vista: Go to Control Panel → Appearance and Personalization → Personalize → Display Settings, and adjust the resolution.
- Windows 7: Go to Control Panel → Appearance and Personalization → Display → Adjust Resolution, and adjust the resolution.
- Windows 8(Windows 8.1): Go to Settings → Control Panel → Appearance and Personalization → Display → Adjust Resolution, and adjust the resolution.
- Windows 10: Go to Settings → System → Display → Advanced display settings, and adjust the resolution.

How do I set power-saving mode?

- Windows XP: Set power-saving mode in Control Panel → Appearance and Themes → Display → Screen Saver Settings → Power options or BIOS SETUP on the PC.
- Windows ME/2000: Set power-saving mode in Control Panel → Display → Screen Saver Settings → Power options or BIOS SETUP on the PC.
- Windows Vista: Set power-saving mode in Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings → Power options or BIOS SETUP on the PC.
- Windows 7: Set power-saving mode in Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings → Power options or BIOS SETUP on the PC.
- Windows 8(Windows 8.1): Set power-saving mode in Settings → Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings → Power options or BIOS SETUP on the PC.
- Windows 10: Set power-saving mode in Settings → Personalization → Lock screen → Screen timeout settings → Power & sleep or BIOS SETUP on the PC.

---

- **Plug-and-Play**
  This monitor can be installed and used with any Plug-and-Play compatible systems. Two-way data exchange between the monitor and PC system optimizes the monitor settings. Monitor installation takes place automatically. However, you can customize the installation settings if desired.

- **Panel Dots (Pixels)**
  Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may be brighter or darker on the LCD panel. This does not affect product performance.

- **The above specifications are subject to change without notice to improve quality.**

- **This device is a Class B digital apparatus.**

(USA only)
Dispose unwanted electronics through an approved recycler.

---

**Horizontal Frequency**

The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

**Vertical Frequency**

Repeating the same picture dozens of times per second allows you to view natural pictures. The repeat frequency is called "vertical frequency" or "refresh rate" and is indicated in Hz.

---

Some resolutions listed in the table above may not be available depending on graphics card specifications.
Responsibility for the Pay Service (Cost to Customers)

When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.
- If a service technician gives instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If customer requests instructions on how to use because of another company’s product.
- If customer requests instructions on how to use the network or another company’s Program.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer's fault

Product damage caused by customer’s mishandling or wrong repair
- if a product damage is caused by;
  - External impact or drop.
  - Use of supplies or separately sold product unspecified by Samsung.
  - Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
  - Remodeling or repairing the product by customer.
  - Using it with incorrect voltage or non-authorised electrical connections.
  - Not following the "cautions" in User Manual.

Others

- If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
- If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)

If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.
