

FUTURA VARIO 50 + 10

Colour:	midnight-steel
Article ID:	3402118-3395
Weight:	2080 g
Volume:	50 litres
Size:	76 / 34 / 32 (H x W x D) cm
MSRP:	219,95 €

A spacious backpack for long mountain tours, pilgrimages or trekking tours. The Vari-Slide System allows exact adjustment to every back length. The ergonomic Aircomfort Sentic Vario mesh back system allows optimal ventilation. Active-Fit shoulder straps auto-adjust, agile Variflex ECL hip fins make energy-efficient and comfortable carrying possible. Their ergonomic pads custom fit the load perfectly on the hips and prevent the Futura Vario from shifting positions.

HIGHLIGHTS OF FUTURA VARIO 50 + 10

Aircomfort System

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 Deuter invented & patented the first mesh back system worldwide.

Active Comfort Fit

Spring Steel Frame

The round spring steel frame is very lightweight and flexible. It is extremely durable, provides stable tension for the back mesh and transfers the load to the hip belt. Its flexibility guarantees great freedom of movement and a perfect fit.

Adjustable Lid

a height adjustable lid provides additional space

Bottom Compartment

With removable separator for ideal gear access and load placement.

Pockets on the outside

stretch pockets on the side and in the front provide additional storage space

Front Opening

A zipped opening on the front of the pack provides easy access to lower packed items.

Padded Hip Belt

An additional padding on the hip belt provides more carrying comfort.

Vari Flex System

Deuter's Vari Flex System, leaving the generous hip fins fully mobile. The Vari Flex hip fins follow even the most complex movements allowing tricky sections to be negotiated without losing your balance - especially important when carrying a hefty load.

Sternum Strap

The sternum strap stabilizes the pack on the shoulders.

Rain Cover

removable rain cover with special pocket

Valuables Pocket

special pocket on the inside of the pack to keep valuable items safe

Stretch Compartment

stretch compartment on the inside of the back to stow sweaty/wet clothes

SOS-Label

provides the most important tips in case of emergency

Hydration System 3.0 L

Compatible
compatible with Streamer 2.0 I & Streamer 3.0 I

Hiking Pole Attachment

Attachment loops for hiking poles

Attachment for ice axe or hiking poles

Attachment loops for ice axe or poles

Lid pocket

This pocket integrated into the lid guarantees quick access to your gear.

Load Adjustment Straps

to individually adapt the pack's centre of gravity

Pull-Forward Hip Fin

allows an easy and precise adjustment

Vari Slide System

SUITABLE FOR

 Trekking

 Hiking

 Travelling

 Huts

 Camping

BACK SYSTEM: AIRCOMFORT SENSIC VARIO

1 ACTIVE-FIT SHOULDER STRAPS

Agile ActiveFit shoulder straps fit comfortably through their self-acting adjustment to width and angle of the shoulder area.

2 ARCHED PROFILE FRAME

Up to 70% of the load is transferred from the back to the hips via an arched profile frame made of permanently elastic, break-proof spring steel. Lightweight and flexible, its ergonomic shape ensures a perfect fit combined with freedom of movement.

3 VARIFLEX ECL HIP FINS

Save energy while carrying through auto-adjust Variflex ECL (Ergonomic Comfort Lock) hip fins. They custom fit to the hips and distribute weight comfortably thanks to ergonomic pads and a gap-free transition from the back system.

4 AIRCOMFORT MESH NET

Trekking backpack with maximum ventilation thanks to the Aircomfort mesh back system. A durable frame construction designed from flexible and break-proof spring steel provides stable tension for the Aircomfort mesh net creating a ventilation space between wearer and pack. Medium loads can be carried perfectly ventilated and comfortable with this combination of effective load distribution and back-length adjustment.

5 VARISLIDE ADJUSTMENT

The VariSlide System guarantees a perfect fit for every back lengths. A central, easy to access buckle allows fast and incredibly easy adjustment of the system.

MATERIAL

600D PES

Made from 600 den Polyester thread and with a thick PU coating, this multi-purpose fabric is robust and lightweight. It is most suitable for backpacks, used in average conditions to keep the weight to a minimum.

210D PA

We use the Nylon material in hard wearing 420 denier and 210 denier density. Special high density denier polyamide offers high abrasion resistance with its very tight weave. This top quality fabric is used for Guide backpacks and Travel range models. PU coating.
