

Blu-ray™ Disc Rewriter

Internal SATA 16x Super Multi Blue

BH16NS40

Write Blu-ray discs at 16x with the BH16NS40 with confidence. SATA interface technology allows for easier integration and faster performance while M-DISC™ (DVD) provides superior reliability in data storage that is perfect for archiving important data.

- 16X BD-R Write Capability
- Serial ATA Interface
- Write and Read Quad, Triple, Double Layer BD-R Discs
- M-DISC (DVD) Support
- Max. 16X DVD±R Write Speed
- Blu-ray Disc, DVD, and CD Family Read/Write Compatible
- 4MB Buffer & Buffer Under-Run Prevention Function Embedded
- RoHS Compliant
- Cyberlink Software Included
 - Power2Go
 - PowerDVD
 - PowerBackup
 - PowerProducer
- 3D Blu-ray Title Playback

Blu-ray™ Disc Rewriter

Internal SATA 16x Super Multi Blue

► **BH16NS40**

THE SUPER MULTI BLUE ADVANTAGE

Super Multi Blue Compatibility

LG Super Multi Blue optical drives can read and write most type of disc formats, including DVD M-DISC and BDXL™, that are in the market today. This gives you the option to choose the media best suited for each task.

Blu-ray

Blu-ray Disc is the next generation in optical storage, offering 25GB and 50GB of storage capacity on a disc.

BDXL™

The BDXL format supports high-capacity Blu-ray discs (up to 128GB write-once discs) for users that need to store a large amount of data.

Serial ATA Technology

Serial ATA is a 1.5Gbps evolutionary replacement for the Parallel ATA physical storage interface used to connect storage devices, such as hard disks, DVD and CD rewriters to the PC motherboard. Serial ATA is scalable, enables design of smaller PCs, and will allow future enhancements to the computing platform.

M-DISC (DVD)

Compared to other recordable DVDs on the market today, M-DISC offers superior reliability in data storage that provides the permanent optical data storage solution.

	Model	BH16NS40
TRANSFER RATES-WRITE	Type	Super Multi Blue Internal SATA 16x Blu-ray Disc Rewriter
