

RISE 32+ SL

Colour:	arctic-graphite
Article ID:	3301218-3445
Weight:	1430 g
Volume:	32 litres
Size:	70 / 26 / 22 (H x W x D) cm
MSRP:	159,95 €

The robust ski touring pack became a real athlete! The more slim and clean design combined with all the features make it the perfect companion for snowshoeing or ski touring. No matter how long your trip is, your security equipment is stored in the front compartment with easy access while everything else is accessible through the huge back opening. Ski, snowboard and snowshoes can be mounted individually through the flexible and stowable straps/hooks.

HIGHLIGHTS OF RISE 32+ SL

SL Women's Fit

On average, women's backs are not quite as long as men's. The SL carry system is thus slightly shorter than that of Deuter's standard rucksacks.

Alpine System

For alpine backpacks the combination of comfort, durability, functionality and low weight is essential. Deuter's Alpine System answers this challenge by focusing on a compact, secure yet comfortable fit with its two flexible softstripe back pads that are perfectly adapted to the anatomy and follow the wearer's movements. In combination with the pack's sleek shape this keeps the load always close to the centre of gravity – thus guaranteeing full pack control.

Delrin Frame

Tensioned Delrin® U Frame provides stability with little extra weight.

Adjustable Lid

a height adjustable lid provides additional space

Rear Access Zipper

The pack can be opened with a zipper on the back to access all items on the mountain while keeping the back system nice and clean.

Padded Hip Belt

An additional padding on the hip belt provides more carrying comfort.

Sternum Strap

The sternum strap stabilizes the pack on the shoulders.

Valuables Pocket

special pocket on the inside of the pack to keep valuable items safe

Stretch Compartment

stretch compartment on the inside of the back to stowe sweaty/wet clothes

SOS-Label

provides the most important tips in case of emergency

Sitting Mat

Removable Foam Mat to sit on and keep your pants warm and dry

Ski Fixation

attachment for skis

Board Fixation

attachment for snowboard or snowshoes

to individually adapt the pack's centre of gravity

Pull-Forward Hip Fin

allows an easy and precise adjustment

External Pockets (2)

Compression Straps

SUITABLE FOR

Mountain Climbing

Alpine Skiing

Ski Touring

Snowboarding

BACK SYSTEM: ALPINE SYSTEM (SKI)

- 1 **TO ENSURE A STABLE BALANCE AND TO CONSERVE**
energy when carrying medium to heavy loads in alpine terrain the Alpine Back System keeps the load close to the body's centre of gravity. The Softstripe pads on these slim-line alpine backpacks adapt to the wearers back with every movement for a close and reliable fit. The channel between the pads provides extra comfort by creating a "chimney" effect ventilation.
- 2 **CARRYING COMFORT AND A PERFECT FIT**
through ergonomically cut, S-shaped shoulder straps. The SL-backpack also boasts Soft-Edge comfort straps.
- 3 **GOOD LOAD TRANSFER COMBINED WITH MINIMUM WEIGHT**
thanks to an flexible Delrin® U-frame. It follows the most varied movements with absolute ease.

MATERIAL

1000D PA

A Polyamide-fabric that is extremely abrasion and tear resistant. For all larger backpacks this is used for the bottom panel. It has a thread of 1000 den and a thick PU coating on the inside.
