POLARIS

Silent RGB Case Fan

RGB Lighting | No Controller Required | Modular Connector | Silent Cooling Fan

Polaris's RGB Single Pack will not operate on its own, you must have the Polaris RGB Twin Pack first and daisy-chain them together.

RGB LED Lighting Module

There are six independent RGB LEDs stationed in the center of the fan. Gamers can control the LEDs with their motherboard control software.
No controller required!

Daisy Chain, Modular Connector Design

Our new modular connector design allows each fan to link with each other to create a daisy chain effect.
This new setup allows for easier installation and tidier cable management.
Users can create their own personal experience with flexible fan combinations.

Shockproof Rubber Stand

Four shockproof rubber stands strategically placed on the corners to reduce vibrations while in operation.

Silent Cooling Fan

Polaris can speed up to 1280 RPM and PWM mode allows users to control the fan speed automatically.
We modified the design of the blades and developed a dynamic balance, to effectively reduce the fan noise level.

Transparent Frame

The RGB LEDs penetrate from the center and expand throughout the transparent frame, increasing the visual lighting experience. Also, the PBT material is heat-resistant, which increases long-term durability.
