

## **Endorfy Fortis 5 ARGB (EY3A010)**

The Endorfy Fortis 5 ARGB is our favorite air cooler. It's super quiet, so quiet in fact that you'll barely hear your PC at all. Plus, it can fit in even the smallest of cases and looks awesome thanks to the ARGB backlight.

The Endorfy Fortis 5 ARGB is 15.5 cm tall, enough to easily keep CPU temperatures cool. It's supported by the Fluctus 140 PWM fan, which is attached to a densely-finned asymmetrical heatsink with unidirectional airflow. Ultra quiet and highly efficient, you can't go wrong with a cooler like this.

Mounting the Endorfy Fortis 5 ARGB is not rocket science – you can conveniently install it on today's most popular sockets, and with our video instructions it will take you just a few minutes....or maybe just a bit longer if you want to show your viewers, friends, or family the hardware you assembled yourself!

### **The silent ice age is coming!**

We often say that the Fortis 5 ARGB is one of the quietest coolers in its class. It has been rigorously tested through hours of podcast recordings, chatting with friends, as well as streaming. Thanks to this we can definitely say: it is quiet. Even when doing all the above at the same time!

A constant stream of airflow is supplied by the award-winning Fluctus 140 PWM fan, which also includes an optional semi-passive mode. The blades have been shaped in such a way as to blow as much air as possible through the densely arranged heatsink fins. The fan reduces temperatures to such an extreme degree that we have a theory: if our plans to create the Fluctus 1400m fan ever come to fruition, another ice age might be unleashed on the world. Don't worry though, you're safe. For now.

Each blade has a wavy edge, which further reduces fan noise (psychoacoustic optimizations used in Fluctus fans are patent pending).

### **Catch the colorful wind in your sails!**

You won't get far with an overheating CPU. Games and other tasks will begin to have issues during key moments, 3D projects might freeze or even disappear on you, resulting in hours of lost work and endless frustration. For that, we've got some advice: get yourself the Fortis 5 ARGB, catch the colorful wind in your sails, and say goodbye to hellish thermals once and for all!

The Fortis 5 features an asymmetrical heatsink with densely-packed fins that removes heat from the CPU like a pro. The optimized base and six heat pipes drastically improve the dissipation of heat. The Fortis 5 ARGB is also designed specifically for unidirectional airflow for the best cooling performance. Imagine how green with envy your friends will be when they see this!

### **Stay alpha RGB, baby**

If you enjoy hardware that both catches the eye and looks great on your desk, then you'll love the Fortis 5 ARGB. The colorful backlight will dazzle you in the dark without being overwhelming, and would make any nightclub owner jealous.

With the ARGB backlight you can easily match the look of your cooler to your other components and peripherals. Choose from a wide variety of colors, or even set individual illumination effects, including a shimmering rainbow or pulsating waves.

The Fortis 5 ARGB performs just as well as its non-ARGB counterpart. No amount of performance has been sacrificed for looks.

### **Nano-Reset Controller**

With the Fortis 5 PWM ARGB, you can shine bright even without a compatible motherboard or case. The Nano-Reset ARGB controller is included in the box, which allows you to choose from a wide variety of colors and illumination effects. Have fun with it!

### **It couldn't be easier**

Installing the Fortis 5 ARGB is quick and easy thanks to the mounting bracket, even if it's your first time assembling a PC. Step-by-step video instructions are available online that will guide you through the process. It truly couldn't be easier!

### **Non-creepy pasta paste**

The Fortis 5 ARGB comes with a tube of efficient and easy-to-apply Pactum PT-3 thermal paste, with an amount sufficient for up to 3-4 applications. There's nothing to fear here, we tested it ourselves.

### **6-year warranty**

Here at Endorfy, we have the highest levels of confidence in our products. That's why we offer a 6-year warranty on the entire Fortis 5 cooling system (although you probably won't have to use it anyway).

### **Endorfy Fortis 5 ARGB – main features:**

- High performance CPU cooling
- Bright ARGB LED illumination
- Nano-reset ARGB controller
- 140 mm Fluctus fan
- Extended fan speed range
- Optional semi-passive mode
- Multi-socket compatibility
- 6-year warranty
- Thermal compound included

### **Endorfy Fortis 5 ARGB – technical specifications:**

- Product code: EY3A010
- EAN: 5903018665870
- Product type: CPU air cooler
- Colour: black
- Radiator dimensions: 159×144×107 mm
- TDP: 220 W
- Radiator type: tower
- Heatpipes: 6
- Maximum number of fans: 2
- Fans (included): 1
- Included fans:
  - 1× Fluctus ARGB 140 mm
    - Fan dimensions: 140×140×25 mm
    - Fan speed: 250 (±100) – 1400 (±10%) RPM
    - Control (speed): PWM
    - Connector (fan): 4-pin (power, male + female)
    - Voltage (fan): 12 V
    - Current (fan, peak): 0.20 A
    - Control (LED): ARGB
    - Connector (LED): 3-pin (ARGB, male + female)
    - Voltage (LED): 5 V
    - Current (LED, peak): 0.55 A
    - Fan bearing: FDB
    - MTBF: 100 000 h
- CPU compatibility:
  - AMD: AM5, AM4, AM3(+), AM2(+), FM2(+), FM1
  - Intel: LGA1700, LGA1200, LGA1150, LGA1151, LGA1155, LGA1156, LGA2066, LGA2011-3, LGA2011 (square ILM)
- Warranty: 72 months

### **Endorfy Fortis 5 ARGB – logistics data:**

- Retail box dimensions: 165×140×200 mm
- Weight (net): 835 g
- Weight (gross): 1,169 kg
- Master carton dimensions: 590×510×220 mm
- Master carton weight (gross): 15,10 kg
- Product quantity in master carton: 12 pcs

### **Set includes:**

- Fortis 5 ARGB heatsink
- Fluctus ARGB 140 mm fan
- Nano-Reset ARGB controller
- Mounting accessories
- Pactum PT-3 thermal compound
- Safety instruction
