

Product name: ENDORFY Arx 500 Air
Product code: EY2A010

We've seen a lot when it comes to PC cases – but the ENDORFY Arx 500 Air still brings a big smile to our faces. No wonder, because we packed all our knowledge into it. Spoiler alert – it came out like a dream.

This is one of the largest (slightly shorter than the ENDORFY Arx 700 series) cases we've ever created. It measures 486×228×429 mm – enough to fit a tall cooling system (up to 179 mm), 7 fans (including 5 Stratus 140 PWM that we give you for a good start), and most graphics cards available on the market (up to 350 mm). Everything sits in a pleasant breeze, the finely perforated front and top panels let in fresh air and block dust. You can check it out through a tempered glass window.

Cold as in the fridge

We've heard that the Arx 500 Air is so cold it feels like you're in a refrigerator. We officially deny it - there are no Stratus 140 PWM fans in the fridges.

Our PC case fits up to 7 fans (yes, cooling is very important to us). Plus, finely perforated front and top panels serve as filters, so you don't have to add any extra dust protection – this is great, because every unnecessary layer on the case limits the airflow. And we all know that components love the breeze.

5 pre-installed fans

With the Arx 500 Air you get a miniature Ice Age starter pack – the 5 Stratus 140 PWM fans we developed in collaboration with Synergy Cooling. There's also a PWM splitter, so you can control your arctic blizzard from a single motherboard connector.

Without beating around the bush – the Stratus 140 PWM is one of our favorites. It's 14 cm tall and has an optional semi-passive mode so you can work without monotonous background noise even when other fans are screaming for help. And it spins on a durable FDB bearing for smooth operation in all conditions.

Let's make some breeze!

If the components in the Arx 500 Air ever threw a house party (we're open to such ideas), they'd probably start it off with a loud: "Let's make some breeze!". Because here – besides from having fun – we are all about low temperatures.

It's all thanks to the finely perforated steel front and top panels that work as filters. They allow more fresh air to circulate in the case, and you don't have to install additional dust covers. And the cherry on top – each element is easy to remove and clean with a cloth or vacuum cleaner. Rinsing under running water also works perfectly.

It's the inside that counts

Let's say it out loud – appearances are important, but it's the inside that (also) counts. And that's why the Arx 500 Air has a tempered glass side panel that elegantly exposes the components. Let everyone know that your PC is beautiful inside and out.

Like being on vacation

We like spacious PC cases that make your components feel like they're on vacation in a five-star hotel – so we've made sure the Arx 500 Air is one of our largest cases (at least for now). Probably because we also like spacious five-star hotels.

The Arx 500 Air measures 486×228×429 mm, so you can easily install your components – for example, a tall cooling system (up to 179 mm) and fans (up to 7, including 5 that we give you for a good start). You can also fit most graphics cards available on the market (up to 350 mm) and a power supply – just mount in the most convenient position for you. You can assemble it without too much hassle, because we've made sure to simplify the process for you (including a special mounting frame).

ENDORFY Arx 500 Air – main features:

- Tempered glass side
- Ample internal space
- Multi-radiator capacity
- Airy and accessible front
- High airflow design
- Convenient cable design

ENDORFY Arx 500 Air – technical specifications:

- Product code: EY2A010
- EAN: 5903018666297
- Product type: PC case
- Color: black
- Dimensions (H×W×L): 486×228×429 mm
- Motherboard form factor: ATX, microATX, ITX
- Graphics card clearance (GPU): 350 mm
- CPU cooler clearance: 179 mm
- Power supply clearance: 300 mm
- Expansion slots: 7
- Number of bays:
 - internal:
 - 1× 2.5"/3.5"
 - 6× 2.5"
- Cooling system:
 - Maximum number of fans: 7
 - Number of fans included: 5
 - Front: 3× Stratus 140 PWM fan (200–1200 rpm)
 - Rear: 1× Stratus 140 PWM fan (200–1200 rpm)
 - Top: 1× Stratus 140 PWM fan (200–1200 rpm)
- Radiator compatibility:
 - Front: 1× 120, 240, 280, 360 mm
 - Top: 1× 120, 240, 280 mm
 - Rear: 1× 120, 140 mm
- Dust filters:
 - Front
 - Top
 - Bottom
- Front I/O:

- 1× USB-C
- 2× USB-A
- 1× headphones (minijack 3.5 mm)
- 1× microphone (minijack 3.5 mm)
- 1× POWER button
- 1× RESET button
- Warranty: 36 months

ENDORFY Arx 500 Air – logistics data:

- Retail box dimensions: 485×297×530 mm
- Weight (net): 7.6 kg
- Weight (gross): 8.8 kg

Set includes:

- 1× ENDORFY Arx 500 Air case
- 5× Stratus 140 PWM fan
- 1× Installation accessories
- 1× User and safety manual
