

KSK-5210U (DE) **Mini Keyboard with Trackball**

Effective with little space

The KSK-5210RF is a mini keyboard with built-in trackball. The built-in 9 mm optical trackball with mouse function and the modern design in noble, matt black SoftSkin coating it is a nice and comfortable keyboard. It is optimal for living rooms (HTPC), mobile usage as well as for training, programming, conference & presentation facilities.

With Trackball

You can use this keyboard without a mouse because it has a trackball with two mouse buttons that perform this function well. The sensitivity of the mouse can be adjusted in the system options of the operating system.

Integrated number pad

The keypad has been integrated to the letter keys and is activated via a function key. The writing experience with the keyboard is quiet and pleasant with soft-touch membrane technology.
