CE85
SLOW JUICER

DESCRIPTION

Do you like to taste your juice without lamps and pulp? With the extractor Girmi CE85, you can get healthy and nutritious fruit and vegetable juices, rich in vitamins, fiiber and nutrients, with the action of slow juicing, rather than crushing food that occurs with conventional centrifuges, the unit is able to maximize the amount of juice, making it at the same time more smooth and velvety. Very easy to clean and disassemble, equipped with a safety starter system that requires that all parts are correctly inserted to proceed, the CE85 extractor features the reverse function for maximum extraction efficiency and a system overload protection which automatically stops the operation of the machine when the load is too high. The slow juicer is equipped with a 400 watt motor which, however, works in a very silent way and it comes with a 1-liter container for juice and waste and a recipe handbook.

TECHNICAL FEATURES
