BE COOL handcuff lock - the everyday companion for securing your vehicle

The handcuff lock for e-scooters and bicycles offers a practical and reliable solution for keeping your vehicle secure. Made from high-quality A3 steel and ABS material, this lock is robust and resistant to external influences such as weather and mechanical stress.

With a cable length of 1 metre and a cable thickness of 8 mm, it offers sufficient flexibility to secure the lock around various bicycle and scooter frames. The set includes three keys to give you access to your vehicle, as well as a mounting bracket for easy attachment to the bike frame or handlebars of your scooter.

Our handcuff lock is ideal for everyday use in urban environments, when commuting or on excursions. It offers a simple and effective way to protect your vehicle from theft while you are on the move. With its compact design and user-friendly handling, it is the perfect security solution for scooters and bicycles.
