HP Counterbalanced Mobile

Mobile stand system with manual height adjustment

Item no.: 8221

The HP Counterbalanced Mobile is a mobile stand system with manual height adjustment. The stand system is suitable for screens and whiteboards with a size of 46 - 70 ″ | 117 - 178 cm screen diagonal and an even weight distribution. The included VESA mount can be equipped up to a maximum of VESA 800 x 600 mm.

The height of the system is infinitely variable, thanks to a mechanism that can be adjusted to the weight of the device. The screen holds - without locking - safely at the desired height.

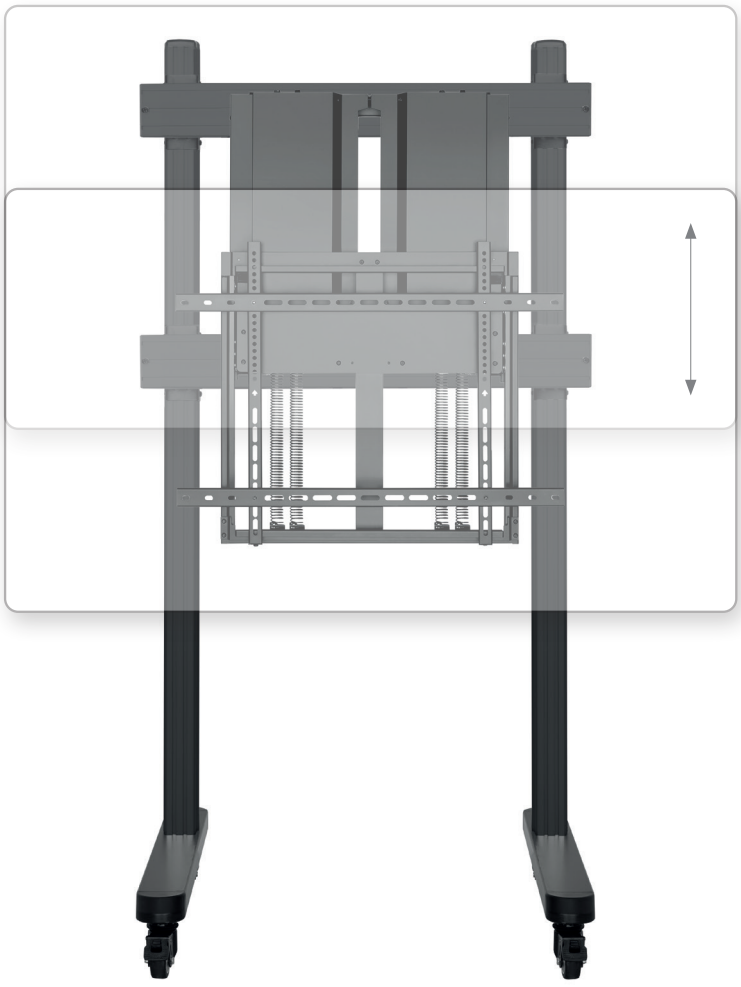

The travel distance is 400 mm.

The load capacity can be adjusted to the weight of the device and is between a minimum of 40 and a maximum of 60 kg.

The swivel castors are equipped with parking brakes and thus ensure mobility and a safe stance.

The surfaces of the HP Counterbalanced Mobile are finished with an impact- and scratch-resistant powder coating in black.

As an alternative, for larger and heavier screens, the HP Counterbalanced Mobile HD is available.
