Reference bookshelf speakers made in Europe!

Speaker Box 5S2 are respected for their extraordinary sound, wide, spacious, detailed and with punchy bass, they are sure to tickle every musiclover's fancy from the first moment onwards. The noble wooden chassis come in three high quality finishes: walnut, eucalyptus and rosewood. No other speaker in the 500€ segment can offer the superior soundquality of Speaker Box 5S2 while being manufactured entirely in Europe! With Speaker Box 5S2 we created a monitor speaker which will satisfy audiophiles as well as professional musicians. Only high quality materials were used when Speaker Box 5S was created. A 25mm silk dome tweeter delivers cristal-clear highs, the 150mm fiberglass cone gives full-bodied and lush mids as well as punchy and tight bass.

The recommended amplifier power is rated between 10 - 150 watts RMS, where it applies as for every speaker: the higher the power of an amplifier the less distortion can be found at lower volumes. Amplifiers with less power are driven to their limits faster at lower volumes, while having more distortion when reaching their peak, this can harm any loudspeaker!

Speaker Box 5S2 guarantees wonderful and unrivaled sound at a very attractive price!
