

Highlights

- **Powerful 2000 watts**
fast and efficient heat
- **2-in-1 function**
Fan heater and fan in one unit
- **Blade-less design**
safe for children and pets
- **70° oscillation**
optimal air distribution throughout the room
- **Remote control & LED touch display**
convenient control
- **Modern, minimalist design**
fits perfectly into any interior

This modern tower fan heater has been designed to ensure a comfortable indoor climate all year round and combines high-performance technology with a futuristic, rotorless design. With an output of 2000 watts, the appliance combines the functions of a fan heater and a fan, ensuring optimum comfort on cold winter days as well as during the warm summer months. At the same time, its slim, elegant design adds a stylish touch to any living space.

Thanks to its practical 2-in-1 function, the unit is versatile and can be used all year round. Two heat settings allow for rapid and even heating of the room in winter. In the warmer months, the tower fan heater operates as an efficient fan with three adjustable wind speeds, ensuring pleasant, even air circulation.

The bladeless design offers additional safety and convenience. As there are no exposed blades, the unit is particularly well suited to households with children or pets and is also much easier to clean than conventional fans. An integrated tilt and overheating protection system ensures safe and reliable operation.

For particularly convenient operation, the tower fan heater is equipped with an intuitive LED touch display and a handy remote control. The 70° oscillation distributes warm or cool air evenly throughout the room and improves air circulation. The 24-hour timer allows the running time to be flexibly adapted to your personal daily routine. In addition, the built-in ambient lighting creates a pleasant and cosy atmosphere in the evening.

Lieferumfang

- Tower fan heater
- User manual
- Remote control

Garantiezeit

- 2 years

Specifications:

- Voltage: 220–240 V AC 50/60 Hz
- Power: max. 2000W
- 2 heat settings
- 3 fan speeds
- 24-hour timer
- Adjustable temperature: 15°C–35°C
- LED display
- Touch control panel
- With 70° oscillation
- Overheating protection
- Anti-tip protection
- With remote control
- Ambient lighting

Dimensions:

- Product (W×H×D): 223×800×223 mm
- Packaging (W×H×D): 275×858×275 mm
- Net/Gross weight: 4.2 kg / 5.6 kg
