# ROBERT – the powerful air improver!

Humidifies and purifies the air

Touch display with motion sensor

Auto, night and clean mode

With fragrance dispenser

As an air washer, Robert humidifies and purifies the air and ensures a clean and pleasant room climate all year round. The powerful air improver evaporates up to 13.2 liters of water per day and is also suitable for large rooms. And uses from as little as 7 watt in energy. With his discs that turn in the water, Robert efficiently filters particles from the air and is thus also the ideal roommate for those suffering from allergies. Robert can be activated with an elegant movement of the hand and operated by a gentle touch of the buttons. By adding a few drops of the desired fragrance oil, Robert scents the room air discreetly and pleasantly. Robert's elegant look is rounded off by coated surfaces and sophisticated aluminium.
