Ninja 3 Product Specifications

M.A.P.S. (Multiple Airflow Pass-Through Structure)

The M.A.P.S. (Multiple Airflow Pass-Through Structure) lets the Ninja Rev.B Cooler make full use of the Scythe Slip Stream 120 PWM adjustable fan's characteristics. Thanks to the efficiency of the eight, u-shaped heatpipes the performance in passive mode could be improved by up to 7 %.

F.M.S.B.4. (Flip Mount Super Back-Plate 4)

The improved version of F.M.S.B (Flip Mount Super Back-Plate), the compatibility has been maximized as well as achieving the solid mounting of the cooler onto the motherboard. Scythe Ninja 3 Rev.B provides broad socket compatibilities for both AMD & Intel platforms.

Slip Stream 120 PWM Adjustable

Equipped with Scythe original Slip Stream 120mm PWM Adjustable fan, it allows the user to choose the fully automatic PWM feature fan speed control or alternatively adjust the PWM band range to fulfill demands from silent to high performance users.

Extended Compatibility

Subtly merging the already proven AMD clips with special screws makes the Ninja 3 Rev.B compatible with Intel's socket LGA 2011.
