

Endorfy GEM Plus (EY6A005)

The GEM Plus is a mouse for serious players –lightweight (67 g), agile, and always ready to fight. It slides across the mousepad on PTFE skates, as if it were a spaceship with a WARP drive. Its spectacular ARGB backlight gives it that futuristic look — are you ready to conquer?

At its heart lies the state-of-the-art PixArt PAW3370 sensor, capable of a maximum sensitivity of 19,000 DPI. This miniature beast can register and process movements up to almost supersonic speeds of 10.16 m/s. Its microswitches are also ultra-fast — Kailh GM 8.0. So don't worry — it'll easily keep up.

Heart of steel PixArt PAW3370

Every virtual warrior knows that to be efficient, you need to be quick and precise. And behind every fast move, there's an ultra-sensitive sensor. Inside of the GEM Plus beats its state-of-the-art PixArt PAW3370 heart.

The PixArt PAW3370 is so sensitive that it's hard to put into words – it can register the movement of a mouse moving at a speed of 10.16 m/s. That's over 36.5 km/s, that's almost as fast as the best sprinters. After a few hours of clicking, you can say that you had a good workout. But the high-tech sensor comes with other perks too — it's flexible and adapts to your playstyle. You can fine-tune its Lift-Off distance (1 or 2 mm), polling rate, and even debounce time for that extra edge against your opponents. Imagine the possibilities!

Light and PTFE-fast

If we were to describe GEM Plus in two words, we'd choose "lightweight" and "supersonic". It weighs only 67 g – as a result, it reaches the edge of the mousepad faster than you can say "Dang! That was fast!".

GEM Plus has PTFE feet that give it minimal resistance. This solution perfectly copes with various mousepads – including everything from standard to even "control" and "speed" types.

Kailh GM 8.0 – the toughest guy on the block

If you ever decide to start a biker gang for mice, the GEM Plus should be the Godfather. It's the toughest guy in the whole neighborhood – coming out of every fight in one piece. But in this case, fighting = clicking.

That's thanks to the esteemed Kailh GM 8.0 microswitches. They're fast, battle-proven, and durable – their lifetime estimated at 80 million clicks.

We have ARGB and won't hesitate to use it

If you're hunting for great-looking equipment that can instantly spice up your desk, then we've good news– your quest is complete. The GEM Plus features an ARGB backlight and won't hesitate to add some moody ambiance to your war room.

With the GEM Plus you can backlight the Endorfy logo, the scroll wheel, and even the strip around the back of the case. Pick your own color or use one of the predefined effects – you can quickly change the whole configuration using the dedicated software.

Long and soft

An unwieldy cable tugging at your mouse in the middle of a scrim is every technology hero's worst nightmare. We've cried over spilt ~~milk~~ [energy drinks](#) countless times, but you don't have to. GEM's long and soft cable is our new MVP.

Our "paracord" cable is more flexible than you'd expect. Its outer sheath of woven fiber has one job only — to protect the cable from damage. It's soft and light like your childhood teddy bear, so it won't interfere with your work. Additionally, it's 1.8 meters long — plenty enough for the GEM Plus to slide freely. across the mousepad.

Live [Click](#) as you like

With GEM Plus you ~~live~~ [click](#) as you like. Thanks to the dedicated software, you have full control over the mouse and all its perks. Make your own rules — change its sensitivity and LOD, customize the ARGB backlight, and record macros.
