

# SANI 1000 BLACK

Sani 1000 Black- bathroom infrared heater

Do you ever step into a cold bathroom in the morning? We have the perfect solution. With the Eurom Sani 1000 bathroom heater, you always step into a warm bathroom. The black infrared panel immediately gives the bathroom a modern, chic and unique look. In addition, it is also possible to hang your towel on the heater. Thanks to the stainless steel brackets attached to the infrared panel, there is always a warm towel hanging in front of you.

The Sani 1000 bathroom heater is an electric heater especially for the bathroom. An additional advantage is that this heater is also very suitable for large bathrooms due to its larger capacity. This infrared panel heats the bathroom quickly and has little or no warm-up time. The heat can be felt directly on the skin. Thanks to the adjustable weekly timer, this electric heater is also economical. Thus, you easily set the infrared heater when the heater should be on or off. As a result, the bathroom heater is no longer left on unnecessarily, nor can you forget to turn it off. So you save costs and are not shocked by a high energy bill.
