

Steel-O-Chain™ 9809K/110 black

Seite 1 von 2

THE CLASSIC CAN DO IT

The Steel-O-Chain™ 9809K chain lock is the ideal all-rounder for your bike and makes it much more difficult for thieves to get their hands on it.

The ABUS XPlus cylinder built into the lock body is even more picking-resistant than its predecessor and offers excellent protection against manipulation of the bicycle lock. The 9 millimetre square chain as well as the housing and structural parts of the locking mechanism are made of specially hardened steel. The lock has been awarded ABUS security level 12 out of 15. In order to protect the paintwork on the bike in the long run, the steel chain is covered with a textile sleeve. Even the keyhole has a cover to protect it from dirt and corrosion. Well secured, your bike can be parked with no worries.

Technologies

- 9 mm thick square chain
- The chain, housing and structural parts of the locking mechanism are made of specially hardened steel
- Automatic keyhole cover to prevent corrosion and the ingress of dirt
- ABUS XPlus cylinder for the greatest protection against manipulation such as picking
- Two keys included

Operation and use

- Great protection for when there is a high risk of theft
- Recommended for securing good bicycles, motorbikes and e-scooters
- Motorbikes
