

Argus ST-7215 – Your RJ45 adapter for the 10 Gigabit network

The Network adapter ST-7215 offers excellent performance and ensures fast data throughput. The built-in Intel® chipset X540 relieves the main processor and ensures a fast network data transfer by less CPU power. Standard network adapter in server environments, however, mostly use the CPU power for operation. The connection is made through a RJ45 port with a speed of up to 10 Gbit/s.
