

Endorfy LIX Onyx White Wireless (EY6A010)

It's a bolt, it's a flash, it's a quick silver strike of lightning — powered by the ultra-sensitive PixArt PAW3335 sensor and ultra-durable Kailh GM 4.0 mechanical switches, it never falls behind. With a maximum tracking speed of 10.16 m/s and a lifespan of 60 million clicks, the LIX Onyx White Wireless exceeds expectations and embraces any challenge.

Thanks to the slick PTFE feet and dazzling ARGB backlight, it glides across the mousepad effortlessly like a ballet dancer... If ballet dancers had sniper rifles.

You're breathtaking

The LIX Onyx White Wireless is a mouse made specifically to keep up with your fast-paced life. It could win a beauty pageant and a strongman competition all in one day!

We drew our inspiration for the Onyx White series from Mother Nature herself — modeling the mouse after a rare and durable mineral, the elegant white onyx. Famous among connoisseurs for its high strength and extraordinary beauty, the gemstone is like a better and prettier version of marble. Luckily, the mouse isn't heavy as a rock — at only 69 g, the LIX Onyx White Wireless is a true lightweight champion.

Need for speed

When you're giving your best — be it at work or in the game — you need hardware that can match your speed. That's why the LIX Onyx White Wireless is both: ultra-fast and ultra-precise, to give you that edge you deserve in any virtual duel.

Let it be your knight in shining armor!

It's all possible thanks to the battle-proven PixArt PAW3335 sensor you'll find inside of the LIX Onyx White Wireless. Extremely precise all the way up to 16,000 DPI, it's capable of tracking your movements at a maximum speed of 10.16 m/s. It's a true racing champion at heart! But the high-tech sensor comes with other perks too — it's flexible and adapts to your playstyle. You can fine-tune its Lift-Off distance (1 or 2 mm), polling rate, and even debounce time for that extra edge against your opponents. Imagine the possibilities!

Light, lighter, [LIX Onyx White Wireless](#)

When you're climbing to the top, things sometimes get heated. And usually, that's not a good thing unless you're snowed in at home during an apocalypse. That's why we designed the LIX Onyx White Wireless to be light and airy, to allow you to be at 100% for longer.

It's only 69 g, but full of awesome.

The breathable, "honeycomb" shell of the mouse keeps it slender, but it has other benefits too. It ensures proper air circulation, guaranteeing your hand remains sweat-free even after many hours of intense "work". Additionally, the LIX Onyx White Wireless is equipped with slick PTFE feet to make sure it'll slide across any mousepad effortlessly.

“Click” to win

The LIX Onyx White Wireless looks like a cute slice of white honey. But it’s actually a really tough cookie capable of withstanding any storm. Just click and watch the magic happen — instantly.

That’s all thanks to the Kailh GM 4.0 mechanical microswitches. They’re universally praised for their responsiveness and durability — with a lifespan estimated at 60 million clicks, there’s no such thing as “clicking too much”. If you’re in the market for reliable microswitches that’ll last years, then place your bets on the Kailh GM.

Unleash the Kraken mouse!

The early bounds of your desk no longer apply — take it where your conquest takes you (including the couch). The convenience of the LIX Onyx White Wireless is hard to overstate. Do whatever you want wherever you want, and do it with style!

2.4 GHz wireless connectivity ensures a stable connection with 100% precision and 0 delays, giving you the edge in any duel. Just sit down and do your thing, wherever. All you need to do is to plug the adapter (conveniently hidden in a magnetic compartment on the bottom) into your computer and voilà.

Shining, shimmering, splendid

Let’s face it — the LIX Onyx White Wireless looks epic. Make it truly unique by customizing the ARGB backlight to match the colors of your war room.

With the LIX Onyx White Wireless you can backlight the Endorfy logo, the scroll wheel, and even the strip around the back of the case. Pick your own color or use one of the predefined effects – you can also quickly change the configuration using the dedicated software.

Quick winning, quick charging

LIX Onyx White Wireless doesn’t tire easily. Outfitted with a heavy-duty battery and an extremely power-efficient sensor to prolong its wireless adventures, it doesn’t require your constant attention.

So you can focus on the game instead of worrying about the battery level.

When the power level drops to dangerous levels (below 25%), the scroll wheel starts flashing red. It’s a sign that a quick charging session is in order. But don’t worry, you can just plug in the USB-C cable and continue gaming without interruptions.

Trust your ~~guts~~ LIX’s software

With LIX Onyx White Wireless in your hand, you ~~live~~ [click](#) as you like. Thanks to the dedicated software, you have full control over the mouse and all its perks. Make your own rules — change the sensitivity or LOD, customize the ARGB backlight, and record macros.
