The DST Micro is a lightweight travel docking station, unlocking greater connectivity on your device, on the go. Part of Lindy's expert range of Laptop Docking Stations, this product has been designed to make travelling with your tech easy and stress-free.

Portability.

As laptops become slimmer with smaller form factors, key ports such as HDMI® and USB Type A, are increasingly hard to come by. However, if you travel with your tech, a full-sized USB Hub or Docking Station isn't always feasible and can add additional bulk and weight to your bag.

The DST Micro provides the solution to this. With an incredibly small form factor and retractable USB-C connector, this pocket-sized product allows you to expand your laptops connectivity without adding additional bulk to your travel bag.

Approximately 75x38.5x8.5mm, this docking station can easily fit in a pocket, laptop bag or case.

Versatile.

This micro docking station delivers an HDMI® port with Ultra HD 4k capability as well as a SuperSpeed USB Type A port [5Gbps]. There is also a USB-C charging port with pass-through charging up to 100W. Although this docking station may be small, its connectivity potential is mighty.

Plug-and-Play.

This micro docking station does not require any driver installation. This allows for seamless large-scale implementation and a hassle-free experience.
