

UltraBoard 940

Compact keyboard

The UltraBoard 940 Compact Keyboard from BakkerElkhuizen is a unique ergonomic keyboard that can be used wirelessly or via USB cable.

Pair up to 5 wireless Bluetooth devices and switch between them at the touch of a button.

Research has shown that 90% of keyboard users seldom, if ever, use the numeric pad so this section has been removed on compact keyboards. This means the mouse can be placed closer to the keyboard.

Working with a compact keyboard results in greater comfort because it reduces the reaching distance to the mouse (Cook, C., et al., 1998) putting less strain on the shoulder and forearm.

Dark letters on a light background make them easier to read (ISO 9241) and contribute to increased productivity (Snyder, 1990).

Compact, ergonomic and multi-pairing

Working in one place with one computer is rare these days. The emergence of mobile devices and the availability of Wi-Fi means that we increasingly work in different locations. Tablets, laptops and smartphones provide us with the freedom to work anywhere. The UltraBoard 940 Bluetooth keyboard enables switching between devices at the touch of a button. This provides the option to work comfortably and ergonomically, anywhere, anytime and on multiple devices.

Advantages of the UltraBoard 940 Compact Keyboard

Both wired and wireless connectivity
The UltraBoard 940 connects via USB cable bluetooth. Plug in with the cable when the keyboard needs to charge.

Multi-pairing

Multi-pairing allows you to connect the UltraBoard 940 with up to 5 different devices. This allows you to easily switch via a keyboard shortcut between your PC, tablet, smartphone and other devices.

Typing sensation
The UltraBoard boasts a light, responsive keystroke due to its scissor mechanism key design. This provides exceptional tactile feedback.

Mac and Windows OS compatible

The UltraBoard 940 supports both Mac and Windows operating systems. Switch between Windows and Mac devices via a simple keyboard shortcut.

Light key colour
Dark letters on a light background facilitate reading and support higher productivity.

Ultra thin

The UltraBoard is a very comfortable, compact keyboard, not only due to its compact shape but also its thickness of only 0.75 inches.

Knowledge Center

Research by Microsoft shows that an active computer user covers 32 km with his or her fingers daily. Therefore, the keyboard is an important part of the computer. This means that choosing the right keyboard is vital.

A compact keyboard ensures that the user adopts a good ergonomic...
