Ashura Product Specifications

Dual-Fan Efficiency

Higher performance due to dual-fan mounting: The Ashura makes this possible. The included high-performance fan, the GlideStream 140 PWM with its' unique rotor grooves, can be supported by a second fan, making the proven push-pull principle reality.

Compact Size

Due to its' narrow fin depth structure design, the Ashura is ideal for PCs with memory modules fitted with large heatsinks. 6 x 6 mm heatpipes are built-in in a variant layout to maximize heat dissipation.

New Mounting System

The Ashura is fitted with a newly developed retention system ensuring smooth mounting to all common sockets by making use of the supplied accessory. The installation procedure has been simplified and improved for more user-friendliness.
