

Yale

The Yale Safe Collection

You value it, we protect it.

Yale is trusted
by millions of
people every day
to keep what's
important safe.

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes. Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.

Today, and every day to come.

Motorised Safes

Things you can't afford to lose need maximum protection.

The Maximum Protection Motorised Safes are built to keep your most important belongings secure and safe with anti-drill plates, anti-saw bolts and a laser-cut door.

You can gain quick access through a handy PIN keypad. For added security, after three unsuccessful attempts the safe locks down automatically for one minute.

The internal light gives you clear visibility of your valuables and the internal hooks makes it more convenient for you to keep your things organised and clearly displayed.

Every safe in this range is Sold Secure Silver accredited, Secured by Design approved, and SKG** accredited to provide the best in security.

Whether that's your documents to your new home or a sentimental belonging, we have the right safe to suit you.

Security features

- Anti-drill plate and laser-cut door for protection against use of tools to open the safe
- Automatic lockdown for one minute after three incorrect PIN attempts
- Strong motorised locking mechanism with two anti-saw locking bolts (20mm)
- Maximum security mechanical over-ride lock that includes 1 double bitted key
- Emergency access: 9V external battery to gain emergency access to your safe (not included)

Product features

- Automatic door opening mechanism
- PIN code access through a clear LCD keypad
- Internal light, so you can easily see contents
- Internal hooks and shelf for easy organisation
- Mastercode option

Motorised Fingerprint Safes

These ultra-secure safes open instantly via fingerprint recognition access.

The Maximum Protection Motorised Fingerprint Safes can store and recognise up to 100 fingerprints, to give you easy access across a team or family. You can also open these safes with a PIN code, mastercode or key, ensuring complete flexibility.

Keep your most important belongings secure and safe with anti-drill plates, anti-saw bolts and a laser-cut door that protect the safe against tools.

For added deterrence, the safe automatically shuts down for a minute after three failed PIN attempts.

The internal light gives you clear visibility of your valuables and the internal hooks makes it more convenient for you to keep your things organised and clearly displayed.

Every safe in this range is Sold Secure Sliver accredited and Secured by Design approved.

Whether that's your camera to capture those special moments or a sentimental belonging, we have the right safe to suit you.

Document Fire Safes

Tests show Yale Document Fire Safes can withstand intense heat up to 972°C, humidity and any form of attacks so they will protect your most precious things if there's a fire at your home or premises.

These safes are built with the latest technology in fire insulation, which provides a high security rating and allows more room for your valuables inside your safe due to the thinner wall thickness. For added security, the safes locking bolts are on both hinge and frame side.

The safe will automatically lock down after 5 incorrect codes have been entered or you can even set the touchscreen lockdown mode for up to 48 hours, for added security while you're away.

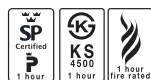

Security features

- Tested to withstand minimum one hour of intense heat (up to 972°C)
- Automatic lockdown for set time between 3 and 9 minutes after five incorrect PIN attempts
- Locking bolts on each side for added security (16mm bolts that slide into the frame and 18mm fixed bolts on hinge side)
- Emergency access: 9V external battery to gain emergency access to your safe (not included)

Product features

- Automatic door opening mechanism
- Touchscreen keypad entry
- Lockdown mode: lockdown the touchscreen for between one and 48 hours
- Silent input: Option to switch sound off for PIN code entry and safe opening
- Low battery indicator
- Mastercode option

Electronic Guest Safes

Yale Electronic Guest Safes give visitors personal security and peace of mind when staying at your home, hotel or rental property.

Guest access is through an easy to set three to six digit PIN code. You can also set a mastercode, so you have access in case of a forgotten PIN.

These safes feature external batteries, so the staff or guests can easily replace them when they run low with no need to unlock the safe.

To guarantee guests complete privacy, the safe allows to turn off the sound if required.

After four incorrect PIN entries, the keypad will be locked down for 3 minutes with a three-minute beep, stoppable by using a key to open the safe and pressing the inside reset button. This sequence will repeat after every four incorrect PIN entries.

Choose from three sizes, from a small guest safe, medium sized or laptop sized safe in order to find the right safe to suit your needs.

Security features

- Locking mechanism: Anti-bump solenoid with two 16mm locking bolts
- Automatic lockdown: The safe automatically locks down for three minutes after four incorrect PIN code attempts
- Mechanical over-ride: x2 radial key to open the safe

Product features

- Electronic lock with handle for easy opening
- Clear LCD display for three to six digit PIN code access
- Mastercode option
- Silent input: Option to switch sound off for PIN code entry and safe opening
- External batteries: the external batteries allow you to easily replace them when they run low

Electronic Guest Safes

Yale Electronic Guest Safes are an ideal addition to a guest house or spare room in your house to give visitors personal security in their stay.

Guests can easily create a three to eight digit code, on a clear LCD PIN keypad. You can also create a mastercode to ensure you have access in case of a forgotten PIN.

After four incorrect PIN entries, the keypad will be locked down for 3 minutes with a three-minute beep, stoppable by using a key to open the safe and pressing the inside reset button. This sequence will repeat after every four incorrect PIN entries.

Choose the right size for your space and needs from small, medium and laptop sized options.

Security features

- Locking mechanism: Anti-bump solenoid with two 16mm locking bolts
- Automatic lockdown: The safe automatically locks down for three minutes after four incorrect PIN code attempts
- Mechanical over-ride: x2 radial key to open the safe

Product features

- Electronic lock with handle for easy opening
- Clear LCD display for three to eight digit PIN code access
- Mastercode option

Electronic Safes

Yale Electronic Safes provide you with a basic level of security for those items you need more regularly, such as keys, passports, cash and cards.

Each safe is accessed via an easy to set three to eight digit PIN. Two keys are also supplied, in case of a forgotten PIN.

The safe features a two-stage lockdown mechanism. It first activates for 20 seconds if an incorrect PIN is entered three times. If three more incorrect PIN entries occur, the lockdown extends to 5 minutes. The lockdown can be stopped by using a key to open the safe.

The safes come in a variety of sizes from mini to laptop variants, allowing you to choose a safe that best suits your needs.

Security features

- Locking mechanism: Anti-bump solenoid with two 16mm locking bolts
- Automatic lockdown: The keypad locks down for 20 seconds after three incorrect PIN entries. After three more incorrect PIN entries, it locks down for 5 minutes
- Mechanical over-ride: x2 radial key to open the safe

Additional features

- Electronic lock with handle for easy opening
- LED light indicators: Green for successful open - red for code error/low battery
- Easy one-touch PIN reset button inside the safe

Electronic Alarmed Safes

Yale Electronic Alarmed Safes feature the added security of an integrated alarm to keep your valuables safe from intruders.

Each safe is accessed via an easy to set three to eight digit PIN. Two keys are also supplied, in case of a forgotten PIN.

In the event of an attempt of force attack on the safe or after three incorrect PIN entries, the built-in 130dB alarm will sound for 1 minute, stoppable by entering the correct code or using a key to open the safe. If two more consecutive incorrect PIN entries follow, the alarm will sound for 1 minute, and the keypad will be locked down for 3 minutes, also stoppable by using a key. After this, the system returns to its initial state.

The safes come in four different sizes from for you to choose the one that best suits your needs.

Security features

- Built-in 130dB alarm and automatic lockdown, triggered by a force attack attempt or incorrect PIN entries.
- Locking mechanism: Anti-bump solenoid with two 16mm locking bolts
- Mechanical over-ride: x2 radial key to open the safe

Product features

- Electronic lock with handle for easy opening
- LED light indicators: Green for successful open - red for code error/low battery
- Easy one-touch PIN reset button inside the safe
