Grand Kama Cross 2 Product Specifications

X-Structure & Top Mount Fan

The unique X-shaped structure creates a gap between the two heatsinks which in combination with the Top-Mount Fan delivers an improved airflow all the way down to the various components on the motherboard. The square-shaped base plate enables the Kama Cross Rev.B to be rotated 360° on all supporting Intel sockets.

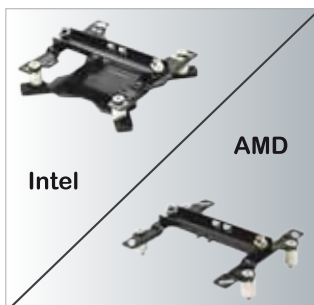

Glide Stream 140 mm PWM Fan

The fan mounted on the new Grand Kama Cross 2 belongs to the new Glide Stream series. Optimized fan blades and PWM-control ensure a quiet, highly effective operation. The 140 mm Glide Stream fan is fitted with 120 mm size mounting holes.

Socket Compatibility

The far-reaching product contents comprise the necessary Clips, Retention Brackets and Screws for all current Intel and AMD sockets including the new LGA2011 as well as 1150.
