SONNENKÖNIG OF SWITZERLAND

FACTSHEET : SILICA - mini dehumidifier

Excessive humidity can cause various problems such as mould, odours, insect infestation, e. g. maggots or mites, but also health problems such as the regulation of the body temperature or a circulatory collapse. There is a solution for these problems: SILICA – Mini Dehumidifier, it is ideal for your rooms and protects your health. The SILICA – Mini Dehumidifier is equipped with the Silica Gel Technology. The advantage of this technology is that the gel absorbs the humidity from the air **without a power connection or battery** and it is also **very silent.**
The Silica Gel can be **reused for more than 300 cycles** and has a **lifetime of 8 – 10 years.** The Mini Dehumidifier will only be connected to the mains during the recycling cycle. The SILICA – Mini Dehumidifier is **very cost-efficient and ecologically** excellent thanks to the reutilisation, the low power consumption (25 W/h) during recycling and its longevity. The changing colour of the gel (orange to dark green) indicates when to start the recycling. The Mini Dehumidifier is also **very safe,** as it consists of **non-flammable ABS plastics** and can therefore be **used in every cupboard and in every storage box and even in the car or in small lavatories.**

Technical informations

- Power: 25 W
- Colors: white
- Certified: CE
- Guarantee: 2 years

Specifications

- Very silent
- Room size up to 5 m²
- Economical
- Silica Gel Technology
- Ecological
- Dehumidification period: 2 – 4 weeks
- Recycling time: 19 – 21 hours
