GeminII M5 LED

The new GeminII M5 LED low-profile CPU air cooler packs even more performance into its compact design with a red LED and five heat pipes using Direct Contact technology. This is a great entry-level cooler finds its strength in smaller PC configurations like mini-ITX or HTPC. Not only does the unique horizontal configuration squeeze into tighter spaces, but it also provides a substantial boost over stock temperatures and added cooling relief to your motherboard components.

Features

A super low-profile, horizontally-mounted air cooler ideal for systems with less space

Comes with back plate for a sturdier fix to the motherboard

Five heatpipes pack in even more performance with Direct Contact technology

Less air friction with a thin fan design and red LED accent for style

Heatpipes form a unique C-shape for compact air cooling
