

ThinkStation P5 Gen 2

The new ThinkStation, equipped with up to a 300W Intel® Xeon® 600 Series processor supporting up to 48 cores, delivers formidable computational power that caters seamlessly to the needs of business professionals. This advanced processor architecture ensures high efficiency in multitasking, rapid application response times, and outstanding performance under heavy workloads. Furthermore, support of up to two NVIDIA® RTX PRO 6000 Blackwell Max-Q Workstation Edition (300W) delivers reliable everyday performance and unlocks powerful capabilities for 3D rendering, AI-driven applications, and advanced visualization tasks.

Elevate Professional Endeavors with Powerhouse Workstations

Designed for ultimate versatility, the ThinkStation P5 is the all-around industry workstation for demanding professionals. With scalable, future-proof solutions tailored to mission-critical environments, it features the latest processors and cutting-edge graphics cards, delivering unparalleled performance.

Built for business productivity and easy maintenance, the workstation features a convenient front diagnostic panel with a QR code that lets users instantly access support resources and diagnostics by simply scanning it with a smartphone. Additionally, an optional 15-in-1 card reader enables seamless data transfer from multiple memory card formats.

Engineered for business professionals who demand top-tier performance, this ThinkStation supports up to 1TB DDR5-6400 RDIMM ECC memory, ensuring exceptional speed and responsiveness for intensive multitasking, data analysis, and content creation.

The new-gen ThinkCentre combines powerful performance with responsible design. It supports optional ENERGY STAR® 9.0 certification and EPEAT™ Gold, helping organizations reduce energy consumption and meet sustainability goals without compromising productivity. With RoHS compliance, the system is designed using materials that limit hazardous substances, supporting safer manufacturing and environmental practices.
