* SuperSpeed USB (USB 3.1) requires total cable length to be 1 meter (1000mm) or shorter. So we recommend using external USB Type-C cable with length of 400mm or less due to KL07's internal USB Type-C cable already taking up 600mm of the total length requirement.

** 163mm is from CPU's top surface to wavy foam pad's surface.

*** Depend on drive cage's position.
