

iGAME G-ONE

i7 8750H RTX 2060

Gaming all in one, no more waiting

Waste time, to learn hardware knowledge

—— Or ——

Have fun, in playing games

Youth always lacks time.

The red light in the crossroads makes you wait;

The loading webpage bothers you a lot;

I just wanna reach the destination,

but always have to start over.

I just wanna play games, do I have to know

IGAME G-ONE

872 hours pre-delivery inspection and quality insurance

Intel Core CPU+RTX20 series graphics card, guaranteed performance

2560*1440, 144Hz,

95% DCI-P3 color gamut display for guaranteed visual experience

Independent HiFi audio decoder for hearing enjoyment

Integrated slim body with ensured space

Adjustable stand to ensure health

We' ve prepared everything that you want, please start enjoying the game.

G-ONE

not just fill the accessory into the display screen. Instead, it uses a better display screen to maximize performance.

NVIDIA® GEFORCE RTX™20SERIES GRAPHICS CARD

Maximum up to
6 times

Performance Improvement

AI Enhancement

Graphics Technology

The GeForce RTX graphics card features a Turing GPU architecture and a brand new RTX platform. Compared with the previous generation of graphics cards, its performance can be improved by up to 6 times, while introducing new real-time ray tracing and AI technology for the game.

3DMARK

Single core turbo boost can reach up to

4.1GHz | **6-Core** | **12-Thread**

Equipped with Intel® Core™ processor for i7-8750H.

With low power consumption and high performance, high quality running large console game with lower temperature.

Target found, target locked

For gamers, the display screen is like the scope lens of the sniper. 2K resolution, nothing can hide wherever you look. 144Hz can better release the performance of the graphics card and the high refresh rate becomes smooth and can lock-in the target in time and start hunting.

27" IPS Screen | 2560*1440 Resolution | 144Hz Refresh Rate

Seeing two worlds In one game

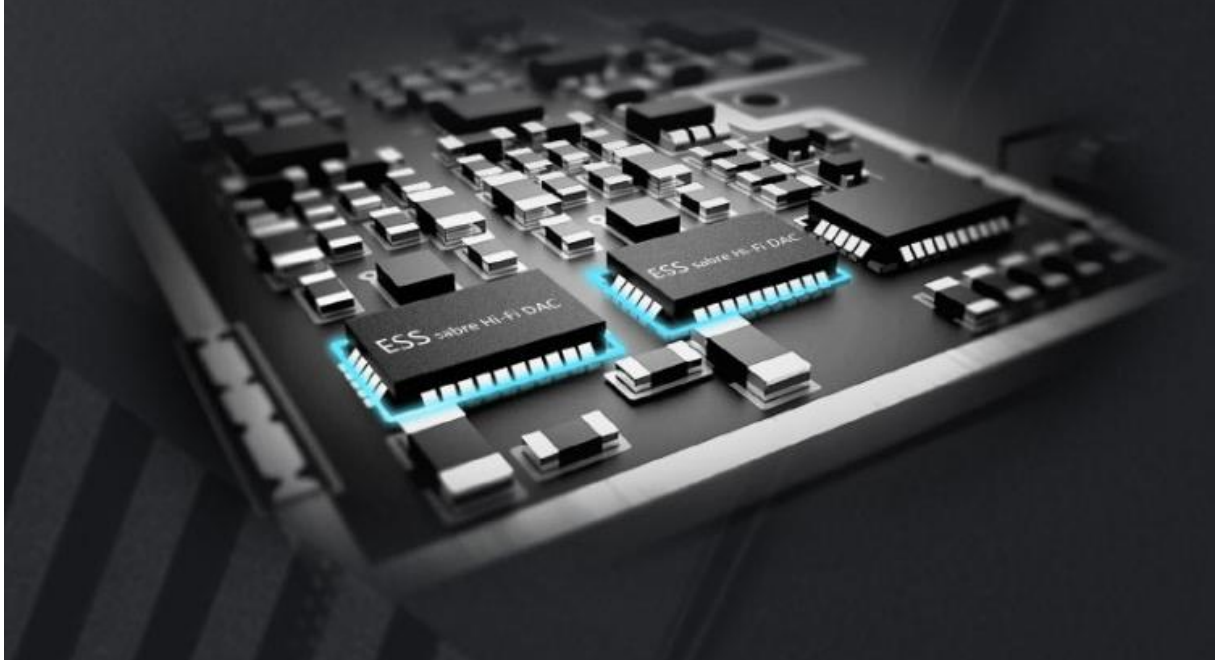

It has 95% DCI-P3 color gamut and DisplayHDR 400 high dynamic contrast, brightens the dark area of the game, while also allowing the highlights to restore more detail, giving the picture a higher dynamic range. The world of games not only has victory, but also a fantasy landscape that belongs to you.

Hush, footsteps!

We can't see the enemy behind the wall, but we can hear his footsteps. Use an independent audio decoding chip ESS Sabre Hi-Fi DAC (digital analog converter);

Enjoy a Hi-Fi quality immersive experience and restore the true sound of the game. You can go to the battlefield and listen to the footsteps; you can also live in fairyland, listen to the wind and feel the rain.

Speed is a matter of utmost importance

Killer Ethernet E2500 NIC enables low-latency and high-performance gaming experience, which not only automatically detects and accelerates high-quality transmission of game, voice and video data, but also prevents packet loss which may delay the game.

GIGABIT Ethernet throughput - TCP reception

KILLER 940 Mbps

Competitor 936 Mbps

Processing packets per second

KILLER (3 times better performance than competitors) 1102

Competitor

Wired LAN Card

Wireless LAN Card

M.2 SSD fast data processing performance, fast and stable, safe and reliable.

Much faster for starting the computer, loading the game and entering the map scene, etc., one step ahead, grasp the opportunity.

3000 MB/s

Sequential reading

1800 MB/s

Sequential writing

270000 IOPS

Random 4K reading

420000 IOPS

Random 4K writing

* NIC data comes from KILLER official.

* SSD data is from the iGame Institute.

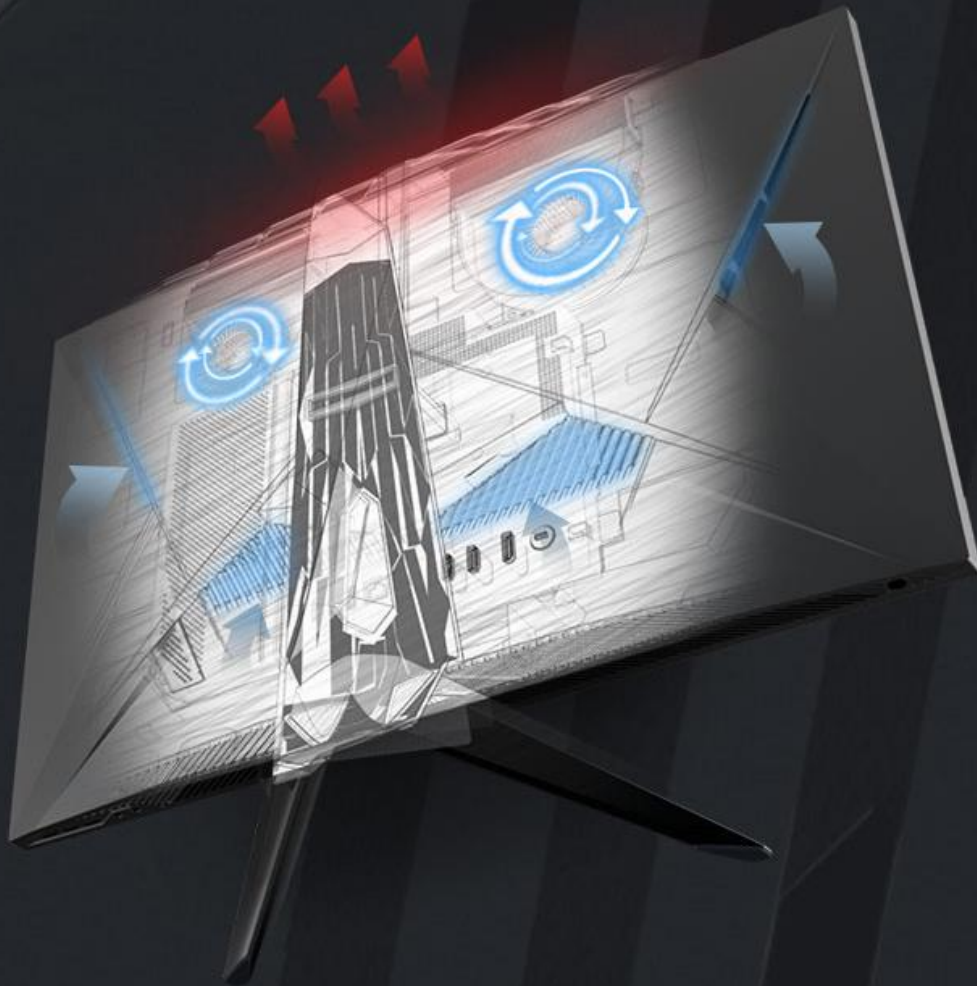

There may be differences in data due to factors such as usage environment, hardware and software.

Cooling is a headache for many players. But it is a piece of cake for G-ONE.

11mm 4 copper tube cooling module with twin turbofans;

The bottom air inlet is matched with the dust net inlet holes on both sides to reduce the dust in the air and keep the heat dissipation channel clean while ensuring the cold air transportation.

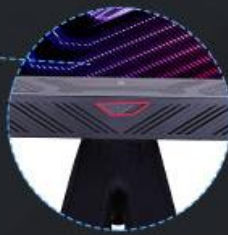

The top air outlet design follows the principle of hot air rises and quickly dissipates heat to keep the machine cool for a long time.

Only you, can open your computer

Safety and convenience are never contradictions. iGame G-ONE is equipped with Windows hello face recognition, freeing hands to unlock your computer instantly.

Physical anti-peeping

Physical anti-peep slap, pull to cover the camera to the left. Anti-hijacking, anti-peeping, safe and reliable.

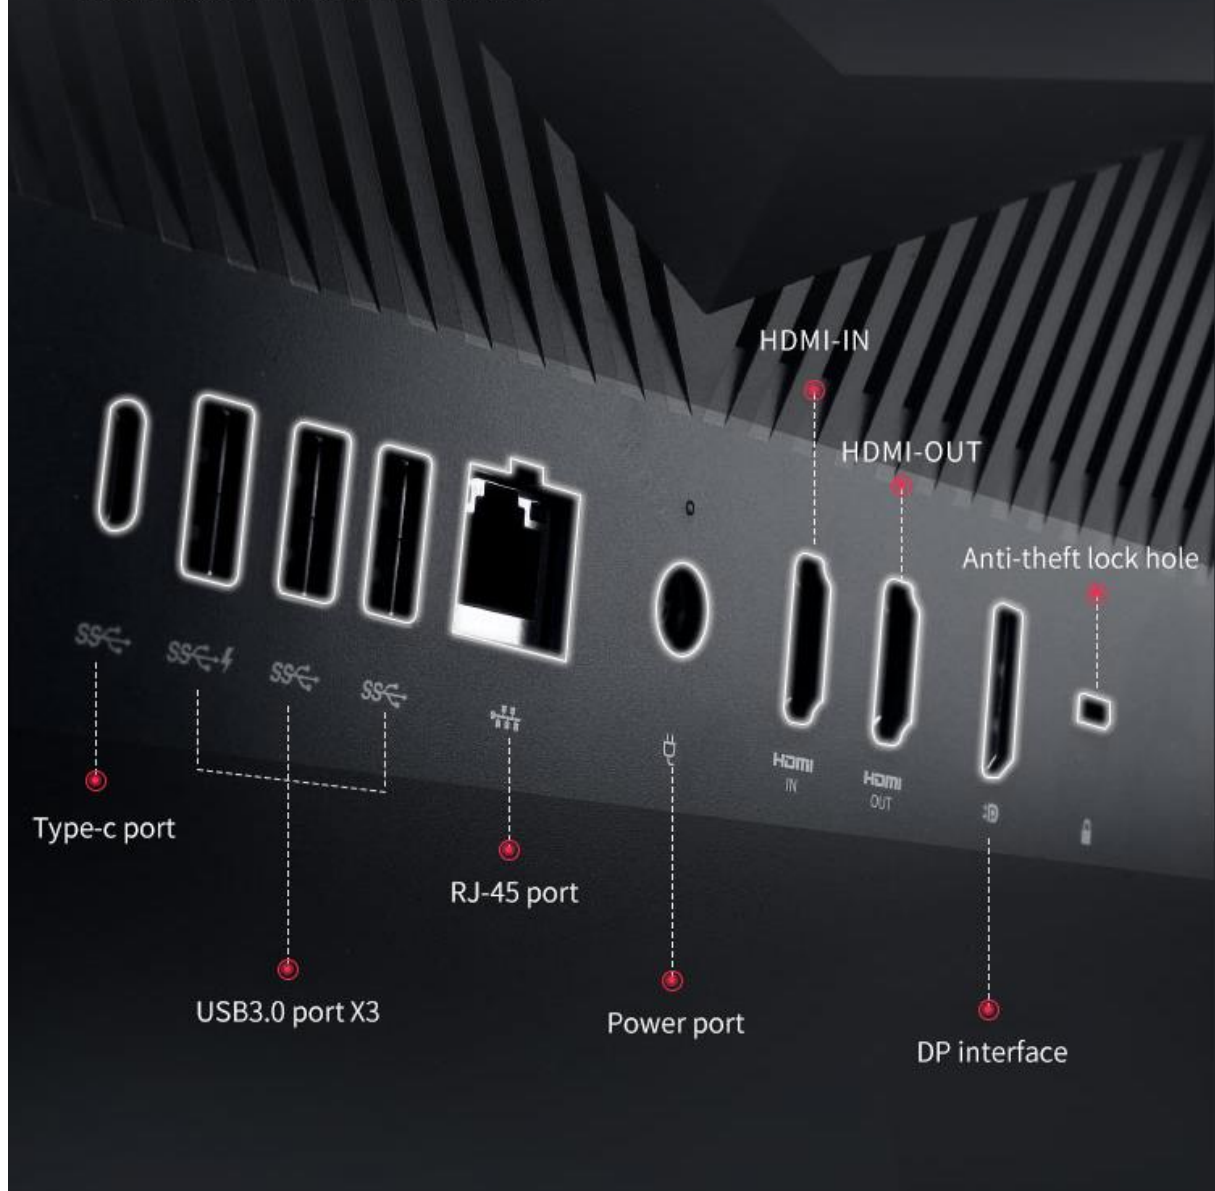

Cool and thin enough Save 70% space

The body thickness is 61.53mm, which saves 70% space compared to the desktop, and bids farewell to the messy computer cables. It is neat, simple and easy to clean.

You may not need it But I must offer it

The rich interface is a thoughtful companion, it does not affect the beauty of the computer, just lies where it should be.

Lift up or down

I adapt to you, not you adapt to me.

Adjustable stand, tilted forward and backward by 25°; this may not affect the game's victory, but it is always right to think about your health; you don't need to raise the table or lower the seat, I will always adapt to you.

Double care

Height adjustable (40mm)

Adjustable angle (-5°/20°)
