

Print your own CDs and DVDs!

CDs and DVDs with different coatings

To produce exceptional CD/DVD prints or product labels for all kinds of applications you not only need advanced print technology as integrated in DTM's CD/DVD/BD Disc Publishers but you also need high-quality material.

Whether you're duplicating audio, video, data, software, photos or any other digital information, the appearance of your digital output is a direct reflection on your company. Make a positive, lasting impression with DTM's new media. All DTM certified inkjet-printable media are the ideal choice for discs printed on Primera's Disc Publishers, where full process colour is used to add impact and/or functionality to the disc appearance. The following media is designed for high resolution printing on on-demand disc printers.

They have an excellent fast-drying time and are smudge- and smear-resistant. They deliver the fastest recording speeds, highest print quality, lowest reject rates and are suitable for the fast high volume duplication market while cost effective enough for simple periodic use.

White High Gloss Media

CDs/DVDs WaterSafe:

- Water- and scratch-resistant glossy inkjet coating
- Made for disc producers that want to print with low saturation but still achieve a good impression
- It gives your printed disc a vibrant colour appearance with a high gloss finish that can cover the entire disc surface to the center hub

CDs/DVDs WaterShield:

- Highly water and scratch-resistant glossy inkjet coating
- Made for discs that need great impression and photo-realistic printout
- White coating is perfect for full-colour photo-realistic printing
- Custom graphics won't wash away
- Glossy finish can cover the entire disc surface to the center club
