

Wireless Mouse

On Click 17

Our wireless mouse OnClick 17 blends control and reliability into a perfect solution for those who expect consistent tools. With a stable 2.4GHz connection and a 10-meter range, it declutters your workspace. No cables or lagging means you stay focused on what’s important.

The ergonomic shape makes long sessions easier, while the soft rubber-coated surface adds grip and prevents fatigue. No matter the task, the OnClick 17 remains comfortable from the first click to the last.

Performance is precise and consistent. The optical sensor with adjustable DPI (800 / 1200 / 1600) fine-tunes cursor speed, while the 125Hz polling rate, 3G acceleration, and 28 IPS tracking ensure smooth movement on various surfaces. From detailed work to fast navigation, it stays accurate.

With six multifunction buttons, the device easily adapts to any workflow. Built with switches rated for 3 million clicks, it’s made for years of daily use. 2 AA batteries are included.

Finished in classic black and certified to CE and RoHS 2.0 standards, the OnClick 17 balances comfort and durability, making it a dependable choice for home and office use.

RELIABLE 2.4GHZ WIRELESS PERFORMANCE

Enjoy a stable, interference-free connection with up to 10 meters of wireless range. With smooth cursor movement and responsive control, this is the right option for both work and everyday use.

PRECISION OPTICAL SENSOR UP TO 1600 DPI

Switch between 800, 1200, and 1600 DPI to match what's on your to-do list: there's precise control for detailed tasks and faster movement for quick navigation.

SOFT-TOUCH RUBBERIZED SURFACE

The rubber-coated top layer adds a comfortable, non-slip feel, which improves grip and reduces hand fatigue during long work sessions.

ERGONOMIC SHAPE FOR EVERYDAY COMFORT

Designed to fit naturally in your hand, the mouse supports a relaxed grip, which minimizes strain and makes it comfortable to use throughout the day.

SIX BUTTONS FOR SMARTER NAVIGATION

With six conveniently placed buttons, there is quick access to essential functions, which helps work more efficiently without unnecessary movements.

Button function: 1. Left button | 2. Right button | 3. Roll button | 4. DPI | 5. Forward | 6. Backward

BUILT TO LAST – 3 MILLION CLICKS

High-quality switches are engineered for durability and deliver a consistent and satisfying click response over millions of presses.
