THE CLASSIC WITH OPENING CODE AND LIGHT

Never grope in the dark again: The BORDO™ 6000C LED can be used to illuminate the set opening code. This way, you can unlock the bike lock at night without any problems.

The BORDO™ 6000 has become a real classic over many years - the clever design has won friends all over the world with its high level of security, flexibility and compact size. The 5 mm bars connected with specially designed rivets can be folded like a folding rule.

The BORDO™ 6000C LED adds another member to the BORDO™ 6000 family. The C in the product name indicates that this is a combo lock with code. The integrated LED light gives you enough light to see the set numbers even in the dark. Is there need to worry that the numbers might wear off or fade over time? Not at all - the numbers are not printed. Instead, we produce the code dials from two durable components that guarantee long-term readability.

Technologies

- 5 mm thick bars, extra-soft coating to prevent damage to paintwork
- The bars and the housing are made of specially hardened steel
- Bars are connected by special rivets
- Integrated LED lamp for illuminating the code dials
- A CR1220 button battery to power the LED lamp is included
- Two-component code dials ensures long-lasting legibility
- Opening code can be set individually
