Features

COLORFULLY CUSTOMIZED

Twenty circularly arranged addressable RGB LEDs provide a strong illumination, which can be controlled and customized via the software of compatible mainboards in 16.8 million colors.

CHOICE OF CONNECTIONS

For maximum compatibility, the RGB LEDs of the SHARK Blade RGB Fan are connected via a 3-pin 5V-D-G or a 4-pin 5V-D-coded-G header, depending on the mainboard.

EASY TO INTEGRATE

The SHARK Blades RGB Fan is certified for Asus Aura Sync, MSI Mystic Light Sync, Gigabyte Fusion and most other major market brands with matching pin layout, and is thus easily incorporated into existing systems.

HIGH-PERFORMING AND QUIET

The robust 120 mm fan with a fluid dynamic bearing produces an airflow rate of 94.8 m³/h at 1,200 rotations per minute and does not exceed 18.2 dBA even during maximum operation.

DECOUPLED MOUNTING

The rubberized contact points minimize vibration transfer, and an optimum low-noise operation is guaranteed.
