

 **Sharkoon**

**SHARK  
FORCE II**

GAMING MOUSE

# Full Power Ahead!

With the SHARK Force II gaming mouse, we are bringing back one of our most popular classics. While the unusual design, with its angular contours, has been kept in three different color versions, we have now given the mouse a small upgrade under the hood.

With a significantly more powerful sensor and now six selectable DPI levels, the mouse is more flexible and versatile, while the focus remains on the essential things that the SHARK Force II really needs.

DPI switch with six settings  
(400, 800, 1,600, 2,400, 3,200, 4,200)

Exact  
scroll wheel

Rubberized  
surface  
for maximum grip

Two comfortably  
accessible thumb buttons

# A Newly Defined Classic

The SHARK Force II returns with even more power.

A powerful PixArt PMW3519 optical sensor now works inside the mouse.

The sensor possesses a precise resolution of 4,200 DPI, making the mouse suitable for both gaming setups and on the office desk.

In order to allow even more flexibility whether for gaming maneuvers or for office work, six preset DPI steps can be smoothly selected at the touch of a button.

The illumination of the SHARK Force logo on the mouse shows which step is currently selected.

## Tried and Trusted Design for Optimal Use

Like its predecessor, the SHARK Force II also impresses with its proven, distinctive design. The sides of the mouse curve in at its rear to give a shape which is extremely ergonomic for right-handers. It has a pleasant feel thanks to its rubberized surface, which, together with the thumb rest, also ensures a firm hold.

There are also two thumb buttons on the side of the mouse, allowing additional operating options for gaming and browsing.

With three different color versions, the SHARK Force II provides versatility also with a choice of looks.
