

PRESS RELEASE

ASUS Republic of Gamers Announces ROG Bulwark Dock and ROG 100W Gaming Charger Dock

New offerings redefine convenience for hardcore and on-the-go gamers

KEY POINTS

- 7-in-1 ROG Bulwark Dock features HDMI® 2.1, USB-C®, USB Type-A, and Gigabit Ethernet ports, an audio jack, and 100W USB-C Power Delivery
- ROG Bulwark Dock has a flip-cover design that serves as a stand to keep a gaming handheld or mobile device screen visible
- Compact ROG 100W Gaming Charger Dock serves as an extremely portable charger and connectivity hub

TAIPEI, Taiwan, May 20, 2025 — ASUS Republic of Gamers today announced the ROG Bulwark Dock (DG300) and the ROG 100W Gaming Charger Dock (AC100-05). The Bulwark Dock packs 7-in-1 connectivity in a flexible design, allowing users to connect their laptop, ROG Ally, or mobile device to a display and peripherals for a fully-loaded setup. Meanwhile, the ROG 100W Gaming Charger Dock is the perfect compact charger and connectivity hub for users traveling light.

ROG Bulwark Dock: 7-in-1 connectivity

The ROG Bulwark boasts a diverse assortment of ports to offer users rich connectivity options to accommodate their headset, external monitor, peripherals, and other essential gadgets. The Bulwark Dock supports high-resolution video output via an HDMI® 2.1 port, offering up to 4K@144Hz or 8K@30Hz visuals for external displays. This allows gamers to experience their ROG Ally, laptop, or mobile devices on a larger screen. In addition, the dock features USB-C® with 100-watt Power Delivery, three USB Type-A ports, one Gigabit Ethernet port, and a 3.5mm audio jack.

The Bulwark Dock flips open to provide a stand for any connected ROG Ally or handheld at an optimal viewing angle, with its anti-slip rubber base ensuring firm footing on any surface. With this dock, a gamer can connect their ROG Ally to an external display, plug in a mouse, keyboard, or gamepad via the dock's ports, and charge the Ally all at the same time. The dock is built for gamers who frequently move their

gadgets around and want a quick cable management solution. The dock can also be used while closed when connected to a laptop. A bundled 90°-angle USB-C cable offers convenience that straight cables don't. Plus, the dock features Aura Sync RGB lighting and ROG accents to fit with existing gaming setups. The compact form factor of the Bulwark Dock works well in any setting and looks good alongside a variety of hardware.

ROG 100W Gaming Charger Dock: Compact charging and connectivity

The ROG 100W Gaming Charger Dock is a compact all-in-one charger and connectivity hub catering to handheld and mobile devices. Featuring HDMI 2.0, USB-C with Power Delivery, and two USB Type-A ports, it provides on-the-go gamers a wealth of utility. The USB-C port provides 100W of power while the USB Type-A ports provide 5–10W for a maximum 110W of total output to all connected devices. The HDMI 2.0 port enables 4K@60Hz or 1080p@120Hz video output to an external display. The bundled one-meter USB-C cable supports power delivery, audio, and display output up to 4K@60Hz. This compact dock can be used without being plugged into a power source, making it perfect for on-the-go gamers looking for a lightweight docking solution.
