

Small Business Networks: Upgrading to Aruba Instant On 1930 from HPE OfficeConnect 1920S Switch Series

Now more than ever, small business networks need to perform. Your network supports many of the same devices and applications that larger, enterprise networks do, but you don't have the IT staff or big budgets to install, configure, and monitor your network to deliver the performance that employees and customers both rely on and expect. You need a simple networking solution that offers blazing fast, secure connections at a price that doesn't break the bank.

GOOD NEWS! THE ARUBA INSTANT ON PORTFOLIO NOW INCLUDES SWITCHING.

That means not only do you get fast and secure Wi-Fi connectivity for your guests and employees, but also an affordable and reliable switching solution for uninterrupted power to the IoT devices that run your business.

The addition of wired solutions to complement our world-class wireless creates a comprehensive small business networking solution that's easily managed through a simple web interface or from an app on your smartphone. Now you can focus on running your business and be confident that you have a high-performing, reliable network that will support your growth.

CUSTOMER FIRST, CUSTOMER LAST SUPPORT

When your network is important to your business and you don't have IT staff, you need a partner that is there for you. With Instant On, you get free 24/7 90-day phone support followed up with 24/7 chat support that lasts as long as the warranty.

KEY BENEFITS

- **Ready To Grow With You:** Increase to up to 4 SFP+ ports for 10G connection options on 24- and 48- Class 4 PoE (i.e. PoE+) models.
- **Support IoT Devices:** Class 4 PoE (PoE+) ports with increased power budgets so you can connect more things.
- **Easy Installation:** Auto-discovered when you have an Instant On Wi-Fi network.
- **One Interface:** Mobile app-based or web portal setup and monitoring, the same as for Instant On Access Points
- **Peace of Mind:** Limited Lifetime Warranty means Aruba has your back down the road

WHY UPGRADE

- Higher PoE power to connect more devices without running separate electrical
- One management interface for wired and wireless through smartphone app or Web portal
- SFP+ wired ports – up to 10G throughput to eliminate traffic bottlenecks across your network
- Added security software features with ARP attacks and DHCP snooping to prevent against cybersecurity threats

INDUSTRY LEADING EXPERIENCE

Aruba has been selling networking gear since 2002, and our products have consistently been rated the best in the business. Aruba Instant On combines those years of experience with a tailored offering for small business to provide a high-performance, affordable solution right-sized for your business.

Aruba Instant On 1930 includes seven different models, all offering hardware improvements over HPE OfficeConnect 1920S. As you grow your network, migrate to Instant On 1930 based on features you need, but rest assured both systems work together, so you can update your network at your own pace.

Model Comparison	HPE OfficeConnect 1920S	Aruba Instant On 1930
8 Port	Ethernet 10/100/1000	Ethernet 10/100/1000 2 SFP Ports
8 Port PoE	Ethernet 10/100/1000 4 Ports PPOE+ 65W Total	Ethernet 10/100/1000 2 SFP Ports 8 Ports PoE+ 124W Total
24 Port	Ethernet 10/100/1000 2 SFP Ports	Ethernet 10/100/1000 4 SFP/SFP+ Ports
24 Port PoE	Ethernet 10/100/1000 2 SFP Ports 12 ports PPOE+ 185W	Ethernet 10/100/1000 4 SFP/SFP+ Ports 24 Ports Class 4 PoE+ 195W Total
