Troubleshooting
Read me first

Please read this manual before using the device to ensure safe and proper use.

- Descriptions are based on the device’s default settings.
- Some content may differ from your device depending on the region, service provider, model specifications, or device's software.
- Content (high quality content) that requires high CPU and RAM usage will affect the overall performance of the device. Apps related to the content may not work properly depending on the device's specifications and the environment that it is used in.
- Samsung is not liable for performance issues caused by apps supplied by providers other than Samsung.
- Samsung is not liable for performance issues or incompatibilities caused by edited registry settings or modified operating system software. Attempting to customize the operating system may cause the device or apps to work improperly.
- Software, sound sources, wallpapers, images, and other media provided with this device are licensed for limited use. Extracting and using these materials for commercial or other purposes is an infringement of copyright laws. Users are entirely responsible for illegal use of media.
- You may incur additional charges for data services, such as messaging, uploading and downloading, auto-syncing, or using location services depending on your data plan. For large data transfers, it is recommended to use the Wi-Fi feature.
- Default apps that come with the device are subject to updates and may no longer be supported without prior notice. If you have questions about an app provided with the device, contact a Samsung Service Center. For user-installed apps, contact service providers.
- Modifying the device's operating system or installing softwares from unofficial sources may result in device malfunctions and data corruption or loss. These actions are violations of your Samsung license agreement and will void your warranty.
- Depending on the region or model, some devices are required to receive approval from the Federal Communications Commission (FCC). If your device is approved by the FCC, you can view the FCC ID of the device. To view the FCC ID, tap Apps → Settings → About device.

✏️ **Note**: notes, usage tips, or additional information
Getting started

Package contents

Check the product box for the following items:

- Device
- Quick start guide

- The items supplied with the device and any available accessories may vary depending on the region or service provider.

- The supplied items are designed only for this device and may not be compatible with other devices.

- Appearances and specifications are subject to change without prior notice.

- You can purchase additional accessories from your local Samsung retailer. Make sure they are compatible with the device before purchase.

- Use only Samsung-approved accessories. Using unapproved accessories may cause the performance problems and malfunctions that are not covered by the warranty.

- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Samsung website.

- Back button
- NFC antenna (NFC-enabled models)
- GPS antenna
- Rear camera
- Flash
- Main antenna
- Volume button
- Speaker
• Connectivity problems and battery drain may occur in the following situations:
  – If you attach metallic stickers on the antenna area of the device
  – If you attach a device cover made with metallic material to the device
  – If you cover the device’s antenna area with your hands or other objects while using certain features, such as calls or the mobile data connection
• Using a Samsung-approved screen protector is recommended. Unapproved screen protectors may cause the sensors to malfunction.
• Do not allow water to contact the touch screen. The touch screen may malfunction in humid conditions or when exposed to water.

Using the SIM or USIM card and battery

Installing the SIM or USIM card

Insert the SIM or USIM card provided by the mobile telephone service provider.

- Only nano-SIM cards work with the device.
- Some LTE services may not be available depending on the service provider. For more information about service availability, contact your service provider.

1. Insert the ejection pin into the hole on the SIM card tray to loosen the tray.

   ► Dual SIM models:

   ![Dual SIM models diagram]

   ► Single SIM models:

   ![Single SIM models diagram]

Ensure that the ejection pin is perpendicular to the hole. Otherwise, the device may be damaged.
2 Pull out the SIM card tray gently from the SIM card tray slot.

- **Dual SIM models:**

- **Single SIM models:**
3 **Dual SIM models:** Place the SIM or USIM card on the SIM card tray with the gold-colored contacts facing downwards.

Place the primary SIM or USIM card on the SIM card tray 1 (1) and the secondary SIM or USIM card on the SIM card tray 2 (2).

The SIM card tray 2 also serves as the memory card tray. However, you cannot place both the SIM or USIM card and the memory card at the same time.

**Single SIM models:** Place the SIM or USIM card on the SIM card tray with the gold-colored contacts facing downwards.

Use caution not to lose or let others use the SIM or USIM card. Samsung is not responsible for any damages or inconveniences caused by lost or stolen cards.
4 Insert the SIM card tray back into the SIM card tray slot.

► Dual SIM models:

► Single SIM models:
Removing the SIM or USIM card

1. Insert the ejection pin into the hole on the SIM card tray to loosen the tray.
2. Pull out the SIM card tray gently from the SIM card tray slot.
3. Remove the SIM or USIM card.
   - Dual SIM models:
   - Single SIM models:
4. Insert the SIM card tray back into the SIM card tray slot.
Using dual SIM or USIM cards (dual SIM models)

If you insert two SIM or USIM cards, you can have two phone numbers or service providers for a single device.

Activating SIM or USIM cards

On the Home screen, tap Apps → Settings → SIM card manager. Select a SIM or USIM card, and then tap the switch to activate it.

Changing the display name and icon of SIM or USIM cards

On the Home screen, tap Apps → Settings → SIM card manager. Select a SIM or USIM card and tap Name or Icon. Set a display name and icon for each card.

Switching between cards

When two SIM or USIM cards are activated, card selection icons appear on the dashboard of the notifications panel. Open the notifications panel and then select a card.
Charging the battery

Use the charger to charge the battery before using it for the first time. A computer can be also used to charge the battery by connecting them via the USB cable.

Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

- When the battery power is low, the battery icon appears empty.
- If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.
- If you use multiple apps at once, network apps, or apps that need a connection to another device, the battery will drain quickly. To avoid disconnecting from the network or losing power during a data transfer, always use these apps after fully charging the battery.

Connect the USB cable to the USB power adaptor and then plug the end of the USB cable into the multipurpose jack.

Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.
• The device can be used while it is charging, but it may take longer to fully charge the battery.
• If the device receives an unstable power supply while charging, the touch screen may not function. If this happens, unplug the charger from the device.
• While charging, the device may heat up. This is normal and should not affect the device’s lifespan or performance. If the battery gets hotter than usual, the charger may stop charging.
• If the device is not charging properly, take the device and the charger to a Samsung Service Center.

After fully charging, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

To save energy, unplug the charger when not in use. The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The charger should remain close to the electric socket and easily accessible while charging.

Reducing the battery consumption

Your device provides options that help you save the battery power. By customizing these options and deactivating features in the background, you can use the device longer between charges:
• When you are not using the device, switch to sleep mode by pressing the Power button.
• Close unnecessary apps using the task manager.
• Deactivate the Bluetooth feature.
• Deactivate the Wi-Fi feature.
• Deactivate auto-syncing of apps.
• Decrease the backlight time.
• Decrease the screen brightness.
Using a memory card

Installing a memory card

Your device accepts memory cards with maximum capacities of 64 GB. Depending on the memory card manufacturer and type, some memory cards may not be compatible with your device.

- Some memory cards may not be fully compatible with the device. Using an incompatible card may damage the device or the memory card, or corrupt the data stored in it.
- Use caution to insert the memory card right-side up.

- The device supports the FAT and the exFAT file systems for memory cards. When inserting a card formatted in a different file system, the device asks to reformat the memory card.
- Frequent writing and erasing of data shortens the lifespan of memory cards.
- When inserting a memory card into the device, the memory card's file directory appears in the My Files → SD card folder.

1. Insert the ejection pin into the hole on the memory card tray to loosen the tray.
2. Pull out the memory card tray gently from the memory card tray slot.
3. Place a memory card on the memory card tray with the gold-colored contacts facing downwards.
4 Insert the memory card tray back into the memory card tray slot.

► **Dual SIM models:**

► **Single SIM models:**
Removing the memory card

Before removing the memory card, first unmount it for safe removal. On the Home screen, tap Apps → Settings → Storage → SD card → Unmount.

1. Insert the ejection pin into the hole on the memory card tray to loosen the tray.
2. Pull out the memory card tray gently from the memory card tray slot.
3. Remove the memory card.
4. Insert the memory card tray back into the memory card tray slot.

Do not remove the memory card while the device is transferring or accessing information. Doing so can cause data to be lost or corrupted or can damage the memory card or device. Samsung is not responsible for losses that result from the misuse of damaged memory cards, including the loss of data.

Formatting the memory card

A memory card formatted on a computer may not be compatible with the device. Format the memory card on the device.

On the Home screen, tap Apps → Settings → Storage → SD card → Format → FORMAT.

Before formatting the memory card, remember to make backup copies of all important data stored in the device. The manufacturer’s warranty does not cover loss of data resulting from user actions.

Turning the device on and off

Press and hold the Power button for a few seconds to turn on the device.

When you turn on your device for the first time or after performing a data reset, follow the on-screen instructions to set up your device.

To turn off the device, press and hold the Power button, and then tap Power off.

Follow all posted warnings and directions from authorized personnel in areas where the use of wireless devices is restricted, such as airplanes and hospitals.
Getting started

Restarting the device

If your device is frozen and unresponsive, press and hold the Power button and the Volume Down button simultaneously for more than 7 seconds to restart it.

Locking and unlocking the screen

Pressing the Power button turns off the screen and locks it. Also, the screen turns off and automatically locks if the device is not used for a specified period.

To unlock the screen, press the Power button or the Home button and flick your finger in any direction within the unlock screen area.

You can change the unlock code to unlock the screen. Refer to Changing the screen lock method for more information.
Basics

Using the touch screen

• Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.

• To avoid damaging the touch screen, do not tap it with anything sharp or apply excessive pressure to it with your fingertips.

• The device may not recognize touch inputs close to the edges of the screen, which are outside of the touch input area.

• Leaving the touch screen idle for extended periods may result in afterimages (screen burn-in) or ghosting. Turn off the touch screen when you do not use the device.

• It is recommended to use fingers when you use the touch screen.

Tapping

To open an app, to select a menu item, to press an on-screen button, or to enter a character using the keyboard on the screen, tap it with a finger.
Tapping and holding
Tap and hold an item or the screen for more than 2 seconds to access available options.

Dragging
To move an item, tap and hold it and drag it to the target position.

Double-tapping
Double-tap on a webpage or image to zoom in. Double-tap again to return.
Flicking
Flick left or right on the Home screen or the Apps screen to see another panel. Flick up or down to scroll through a webpage or a list of items, such as contacts.

Spreading and pinching
Spread two fingers apart on a webpage, map, or image to zoom in a part. Pinch to zoom out.
Home screen layout

Home screen

The Home screen is the starting point for accessing all of the device’s features. It displays widgets, shortcuts to apps, and more. Widgets are small apps that launch specific app functions to provide information and convenient access on your Home screen.

To view other panels, scroll left or right, or tap one of the screen indicators at the bottom of the screen. To customize the Home screen, refer to Managing the Home screen.
Home screen options

On the Home screen, tap and hold an empty area, or pinch your fingers together to access the available options.

Flipboard Briefing

Use this feature to view the latest articles in various categories. You can get up to date on news that interests you using this feature.

1. On the Home screen, tap or swipe to the right to open Flipboard Briefing.
2. Tap START READING when launching this feature for the first time.
3. Swipe upwards to browse articles in each news category.

To deactivate Flipboard Briefing, tap and hold an empty area on the Home screen. Then, tap Home screen settings and deselect Flipboard Briefing.
Apps screen

The Apps screen displays icons for all apps, including newly installed apps.

On the Home screen, tap Apps to open the Apps screen. To view other panels, scroll left or right, or select a screen indicator at the bottom of the screen. To customize the Apps screen, refer to Managing the Apps screen.
Indicator icons

Indicator icons appear on the status bar at the top of the screen. The icons listed in the table below are most common.

The status bar may not appear at the top of the screen in some apps. To display the status bar, drag down from the top of the screen.

**Notifications and quick setting panels**

**Using the notifications panel**

When you receive new notifications, such as messages or missed calls, indicator icons appear on the status bar. To see more information about the icons, open the notifications panel and view the details.

To open the notifications panel, drag the status bar downwards. To close the notifications panel, drag the bar from the bottom of the screen upwards.
You can use the following functions on the notifications panel.

- Activate or deactivate options. Tap and hold a button to view more detailed settings.
- Adjust the brightness.
- Launch **S Finder**.
- Tap a notification and perform various actions.
- Launch **Quick connect**.
- Clear all notifications.
- Select a SIM or USIM card. (dual SIM models)
- View all quick setting buttons.

**Rearranging quick setting buttons**

To rearrange quick setting buttons on the notifications panel, tap →, tap and hold an item, and then drag the item to another location.
Using the quick setting panel

You can activate or deactivate some features on the notifications panel. To activate or deactivate more features, open the quick setting panel.

To open the quick setting panel, drag the status bar downwards with two fingers. Alternatively, tap 📲 on the notifications panel. To close the quick setting panel, drag the bar from the bottom of the screen upwards.

Tap the following options to activate or deactivate them. You can view more detailed settings if you tap and hold a button.

- **Wi-Fi**: Refer to Wi-Fi for more information.
- **Location**: Refer to Location for more information.
- **Sound / Vibrate / Mute**: Select a sound mode.
- **Screen rotation**: Allow or prevent the interface from rotating when you rotate the device.
  
  Some apps do not allow screen rotation.

  - **Bluetooth**: Refer to Bluetooth for more information.
  - **Mobile data**: Refer to Data usage or Mobile networks for more information.
  - **U. power saving**: Refer to Ultra power saving mode for more information.
  - **Multi window**: Refer to Multi window for more information.
  - **Airplane mode**: Refer to Airplane mode for more information.
  - **Mobile hotspot**: Refer to Tethering and Mobile hotspot for more information.
  - **Screen Mirroring**: Refer to Screen Mirroring for more information.
  - **NFC (NFC-enabled models)**: Refer to NFC (NFC-enabled models) for more information.
• **Sync**: When you activate this feature, the device automatically syncs apps, such as calendar or email.

• **Smart stay**: When you activate this feature, the screen stays on as long as you look at it.

• **Power saving**: Refer to **Power saving feature** for more information.

• **Private mode**: Refer to **Private mode** for more information.

### Opening apps

On the Home screen or the Apps screen, select an app icon to open it.

To open the list of recently-used apps, tap and select an app icon to open.

### Closing an app

Tap END next to an app to close it. To close all running apps, tap END ALL. Alternatively, tap → .

### Installing or uninstalling apps

#### Galaxy Apps

Use this app to purchase and download apps.

Tap Galaxy Apps on the Apps screen.

This app may not be available depending on the region or service provider.

#### Installing apps

Browse apps by category or tap SEARCH to search for a keyword.

Select an app to view information about it. To download free apps, tap INSTALL. To purchase and download apps where charges apply, tap the button that shows the app's price.

To change the auto update settings, tap MORE → Settings → Auto update apps, and then select an option.
Play Store

Use this app to purchase and download apps.
Tap Play Store on the Apps screen.

Installing apps

Browse apps by category or tap the search field to search for a keyword.
Select an app to view information about it. To download free apps, tap INSTALL. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

To change the auto update settings, tap → Settings → Auto-update apps, and then select an option.

Managing apps

Uninstalling or disabling apps

To disable default apps, open the Apps screen and tap → Uninstall/disable apps. 📦 appears on the apps that you can disable. Select an app and tap TURN OFF.
To uninstall downloaded apps, open the Apps screen and tap → Downloaded apps → → Uninstall. Alternatively, on the Apps screen, tap Settings → Application manager, select an app, and then tap UNINSTALL.

Enabling apps

On the Apps screen, tap → Show disabled apps, select apps, and then tap DONE.
Alternatively, on the Apps screen, tap Settings → Applications → Application manager → → Turned off, select an app, and then tap ENABLE.

• Hiding apps: Hide apps in the Apps screen only. You can continue to use hidden apps.
• Disabling apps: Disable selected default apps that cannot be uninstalled from the device. You cannot use disabled apps.
• Uninstalling apps: Uninstall downloaded apps.
Entering text

Keyboard layout

A keyboard appears automatically when you enter text to send messages, create memos, and more.

Text entry is not supported in some languages. To enter text, you must change the input language to one of the supported languages.

- Enter uppercase. For all caps, tap it twice.
- Enter punctuation marks.
- Change the keyboard settings.
- Delete a preceding character.
- Break to the next line.
- Enter a space.

Changing the input language

Tap ⚙ → Select input languages, and then select the languages to use. If you select two or more languages, you can switch between the input languages by sliding the space key left or right.

Changing the keyboard layout

Tap ⚙, select a language under Input languages, and then select a keyboard layout to use.

On 3x4 keyboard, a key has three or four characters. To enter a character, tap the corresponding key repeatedly until the desired character appears.
Using additional keyboard functions

Tap and hold 📀 to use various functions. Other icons may appear instead of 📀 depending on the last function that was used.

- 🗣: Enter text by voice.
- ✒️: Switch to handwriting mode.
- 📋: Add an item from the clipboard.
- 🛡️: Change the keyboard settings.

This feature may not be available depending on the region or service provider.
Basics

- 😊: Enter emoticons.
- 🌌: Switch to the floating keyboard. You can move the keyboard to another location by dragging the tab.

Switch to the standard keyboard.

Copying and pasting

1 Tap and hold over text.

2 Drag 👉 or 👈 to select the desired text, or tap Select all to select all text.

3 Tap Copy or Cut. The selected text is copied to the clipboard.

4 Place the cursor where the text is to be inserted and tap 👉 → Paste. To paste text that you have previously copied, tap 👉 → Clipboard and select the text.
Screen capture

Capture a screenshot while using the device.
Press and hold the Home button and the Power button simultaneously. The image is saved in the **Gallery → ▼ ▼ ▼ → Album → Screenshots** folder. After capturing a screenshot, you can edit the image and share it with others.
You can also capture screenshots using other methods. Refer to [Palm swipe to capture](#) for more information.

⚠️ It is not possible to capture a screenshot while using some apps.

My Files

Use this app to access various files stored in the device or in other locations, such as cloud storage services.
Tap **My Files** on the Apps screen.

- Search for files or folders.
- Access additional options.
- View files by categories.
- View the download history.
- View files stored in the device.
- View files saved in cloud storage services.
Power saving feature

Power saving mode

Save the battery power by limiting the device's functions.

On the Apps screen, tap **Settings → Battery → Power saving mode**, and then tap the **Power saving mode** switch to activate it. Alternatively, open the quick setting panel and tap **Power saving** to activate it.

Select from the following options:

- **Restrict all background data**: Prevent apps that are running in the background from using a mobile data connection.

Ultra power saving mode

Use this mode to extend the device's battery power. In ultra power saving mode, the device performs the following:

- Displays colors on the screen as gray tones.
- Restricts the available apps to essential and selected apps only.
- Deactivates the mobile data connection when the screen turns off.
- Deactivates the Wi-Fi and Bluetooth features.

On the Apps screen, tap **Settings → Battery → Ultra power saving mode**, and tap the **Ultra power saving mode** switch to activate it. Alternatively, open the quick setting panel and tap **U. power saving** to activate it.

To add an app to the Home screen, tap 🎨 and select an app.

To remove an app from the Home screen, tap ☯ → **Remove**, select an app with 🔄, and then tap **OK**.

To change the settings for ultra power saving mode, such as network connectivity or sound, tap ☯ → **Settings**.

To deactivate ultra power saving mode, tap ☯ → **Turn off Ultra power saving mode**.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.
Viewing help information

To view help information to learn how to use the device and apps, open the Apps screen and tap **Settings → Help**.

To view help information for an app while you are using the app, tap 

Some apps may not include help information.
Network connectivity

Mobile data

Connect the device to a mobile network to use the Internet or share media files with other devices. Refer to Data usage for additional options.

► Dual SIM models: On the Apps screen, tap Settings → Data usage → a SIM or USIM card, and then tick Mobile data.

► Single SIM models: On the Apps screen, tap Settings → Data usage, and then tick Mobile data.

Alternatively, open the quick setting panel and tap Mobile data to activate it.

Wi-Fi

Connect the device to a Wi-Fi network to use the Internet or share media files with other devices. Refer to Wi-Fi for additional options.

Turn off Wi-Fi to save the battery when not in use.

1 On the Apps screen, tap Settings → Wi-Fi, and then tap the Wi-Fi switch to activate it.

2 Select a network from the Wi-Fi networks list. Networks that require a password appear with a lock icon.

3 Tap CONNECT.

Once the device connects to a Wi-Fi network, the device will reconnect to that network each time it is available without requiring a password.

To prevent the device connecting to the network automatically, select it from the list of networks and tap FORGET.
Tethering and Mobile hotspot

About tethering and mobile hotspots

Use this feature to share the device’s mobile data connection with computers and other devices if an Internet connection is unavailable. Connections can be made via Wi-Fi, USB, or Bluetooth.

You may incur additional charges when using this feature.

Using the mobile hotspot

Use your device as a mobile hotspot to share your device’s mobile data connection with other devices.

1. On the Apps screen, tap **Settings → Tethering and Mobile hotspot → Mobile hotspot**.

2. Tap the **Mobile hotspot** switch to activate it.
   - A  symbol appears on the status bar. Other devices can find your device in the Wi-Fi networks list.
   - To set a password for the mobile hotspot, tap ➕ → **Configure hotspot** and select the level of security. Then, enter a password and tap **SAVE**.

3. On the other device’s screen, search for and select your device from the Wi-Fi networks list.

4. On the connected device, use the device’s mobile data connection to access the Internet.
Using USB tethering

Share the device’s mobile data connection with other devices via a USB cable.

1. On the Apps screen, tap Settings → Tethering and Mobile hotspot.
2. Connect your device to the computer via the USB cable.
3. Tick USB tethering.

ıp appears on the status bar when the two devices are connected.
4. On the computer, use your device’s mobile data connection.

Using Bluetooth tethering

Share the device’s mobile data connection with other devices via Bluetooth. Ensure that the computer that you connect to supports the Bluetooth feature.

1. Pair your device with the other device via Bluetooth. Refer to Pairing with other Bluetooth devices for more information.
2. On the Apps screen of your device, tap Settings → Tethering and Mobile hotspot.
3. Tick Bluetooth tethering.
4. On the connected device, open the Bluetooth settings screen, tap → Internet access.
5. On the connected device, use the device’s mobile data connection to access the Internet.

The connection methods may vary depending on the connected devices.
Motions & usability features

Motions and gestures

Excessive shaking or impact on the device may result in unintended inputs. Control motions properly.

Smart alert

On the Apps screen, tap Settings → Motions and gestures → Smart alert, and then tap the Smart alert switch to activate it.

If you have missed calls or new messages, the device will vibrate when you pick it up.

This feature may not work if the screen is turned on or the device is not on a flat surface.
Mute/pause

On the Apps screen, tap Settings → Motions and gestures → Mute/pause, and then tap the Mute/pause switch to activate it.

Placing palm on screen

Cover the screen with your palm to mute incoming calls or alarms.

Turning device over

Turn the device over to mute incoming calls or alarms.
Palm swipe to capture

On the Apps screen, tap **Settings** → **Motions and gestures** → **Palm swipe to capture**, and then tap the **Palm swipe to capture** switch to activate it.

Place the side of your hand on the screen and sweep it across the screen from the right to the left or vice versa to capture a screenshot. The image is saved in the **Gallery** → → **Album** → **Screenshots** folder. After capturing a screenshot, you can edit the image and share it with others.

⚠️ It is not possible to capture a screenshot while using some apps.
Multi window

About Multi window
Multi window lets you run two apps at the same time in a split screen.

⚠️ Only apps on the Multi window tray can run.

Launching Multi window

1. On the Apps screen, tap **Settings → Multi window**, and then tap the **Multi window** switch to activate it. Alternatively, open the quick setting panel and tap **Multi window** to activate it.

2. Tap and hold ⬅️ to open the Multi window tray.

3. Tap and hold an app icon and drag it from the tray to the screen. Then, drag another app icon to a new location on the screen.

App icons marked with ⬅️ can be launched in separate windows on the screen at the same time.
Launching Multi window from the list of recent apps

1 Tap 📷.

2 Tap ☑️ to launch an app in Multi window.

3 Select another app to launch in Multi window.

Creating a Multi window combination

Use this feature to save the combination of the currently-running Multi window apps.

1 Launch two apps in a split screen Multi window.

2 Open the Multi window tray and tap → Edit. → Create.

The Multi window combination is added at the top of the Multi window tray.

To delete Multi window combinations, open the Multi window tray, tap → Edit, select a Multi window combination, and then tap DELETE.
Motions & usability features

Adjusting the window size
Drag the circle between the app windows up or down to adjust the size of the windows.

Using Multi window options
When you use Multi window apps, select the app window and a blue frame will appear around it. Tap the circle between the app windows to access the following options:

- Switch locations between Multi window apps.
Motions & usability features

- 
  - Tap and hold: Drag and drop text or copied images from one window to another. Tap and hold an item in the selected window and drag it to a location in another window.
  - Tap: Switch to the full screen view.
  - Tap: Close the app.

Some apps may not support this feature.
One-handed operation

You can switch to one-handed operation mode to conveniently operate the device with one hand.

On the Apps screen, tap Settings → Display and wallpaper → One-handed operation, and then tap the One-handed operation switch to activate it.

To switch to one-handed operation mode, hold the device in one hand. Then, quickly drag your thumb from the edge of the screen to the center of the screen and back again.
Personalizing

Managing the Home and Apps screens

Managing the Home screen

Adding items
Tap and hold an app or a folder from the Apps screen, and then drag it to the Home screen. To add widgets, open the Home screen, tap and hold an empty area, tap Widgets, tap and hold a widget, and then drag it to the Home screen.

Moving and removing an item
Tap and hold an item on the Home screen, and then drag it to a new location. To move the item to another panel, drag it to the side of the screen. You can also move frequently-used apps to the shortcuts area at the bottom of the Home screen. To remove an item, tap and hold the item. Then, drag it to Remove that appears at the top of the screen.

Creating a folder

1 On the Home screen, tap and hold an app, and then drag it to Create folder that appears at the top of the screen.

2 Enter a folder name.

3 Tap +, select the apps to move to the folder, and then tap DONE.
Personalizing

Managing panels
On the Home screen, tap and hold an empty area to add, move, or remove a panel.
To add a panel, scroll left to the last panel, and then tap +.
To move a panel, tap and hold a panel preview, and then drag it to a new location.
To remove a panel, tap and hold a panel preview, and then drag it to Remove at the top of the screen.
To set a panel as the main Home screen, tap .

Managing the Apps screen

Changing the sorting method
On the Apps screen, tap → Sort by and select a sorting method.

Hiding apps
Hide apps that you do not want to see on the Apps screen.
On the Apps screen, tap → Hide apps, select apps, and then tap DONE.
To display hidden apps, tap → Show hidden apps, select apps, and then tap DONE.

Moving items
On the Apps screen, tap → Edit. Tap and hold an item and drag it to a new location.
To move the item to another panel, drag it to the side of the screen.
To move an item to a new panel, drag it to Create page that appears at the top of the screen.

Creating folders
1 On the Apps screen, tap → Create folder. Alternatively, tap → Edit, tap and hold an app, and then drag it to Create folder that appears at the top of the screen.
2 Enter a folder name.
3 Tap +, select the apps to move to the folder, and then tap DONE.
Setting wallpaper and ringtones

Setting wallpaper

Set an image or photo stored in the device as wallpaper for the Home screen or the locked screen.

1. On the Home screen, tap and hold an empty area, and then tap Wallpapers. Alternatively, on the Apps screen, tap Settings → Display and wallpaper → Wallpaper.

2. Select a screen to change or apply wallpaper to.

3. Scroll left or right and select from images displayed at the bottom of the screen.
   To select photos taken by the device's camera or other images, tap From Gallery or .

4. Tap SET AS WALLPAPER or SAVE.

Changing ringtones

Change ringtones for incoming calls and notifications.

On the Apps screen, tap Settings → Sounds and notifications.

► Dual SIM models: To set a ringtone for incoming calls, tap Ringtone → a SIM or USIM card → Ringtones, select a ringtone, and then tap OK. To use a song stored in the device or in your account as a ringtone, tap ADD.

To set a ringtone for notifications, tap Ringtone → a SIM or USIM card → Notifications, select a ringtone, and then tap OK.

► Single SIM models: To set a ringtone for incoming calls, tap Ringtones, select a ringtone, and then tap OK. To use a song stored in the device or in your account as a ringtone, tap Add ringtone.

To set a ringtone for notifications, tap Notification ringtone, select a ringtone, and then tap OK.
Changing the screen lock method

You can change the way that you lock the screen to prevent others from accessing your personal information.

On the Apps screen, tap **Settings** → **Lock screen** → **Screen lock**, and then select a screen lock method. The device requires an unlock code whenever unlocking it.

ɐ If the unlock code is forgotten, take the device to a Samsung Service Center to reset it.

**Pattern**

Draw a pattern by connecting four dots or more, and then draw the pattern again to verify it. Set a backup PIN to unlock the screen when you forget the pattern.

**PIN**

A PIN consists of numbers only. Enter at least four numbers, and then enter the password again to verify it.

**Password**

A password consists of characters and numbers. Enter at least four characters including numbers and symbols, and then enter the password again to verify it.
Personalizing

Private mode

About private mode
Use this mode to prevent others from using or accessing specific content, such as images and documents, stored on the device. You can save content to a specific location and deactivate private mode to hide items securely.

Hiding content

1. On the Apps screen, tap Settings → Private mode, and then tap the Private mode switch to activate it. Alternatively, open the quick setting panel and tap Private mode to activate it.
   
   When you activate private mode for the first time, set an unlock code and a backup PIN.

2. Enter the private mode unlock code.
   
   When this mode is activated,  ♦  appears at the top of the screen.

3. To select items to hide, tap and hold an item in the list, tick items to select, and then tap ♦ → Move to Private, or tap Move → Private → MOVE HERE.
   
   Items that are moved to private mode appear with  ♦  on them.

4. When you have selected the items to hide, open the Apps screen, tap Settings → Private mode, and then tap the Private mode switch to deactivate it. Alternatively, open the quick setting panel and tap Private mode to deactivate it.
   
   The selected items will disappear from the screen.

Ensure that all files are saved or moved properly before deactivating private mode.
Personalizing

**Viewing hidden content**

You can only view hidden items when private mode is activated.

1. On the Apps screen, tap **Settings → Private mode**, and then tap the **Private mode** switch to activate it. Alternatively, open the quick setting panel and tap **Private mode** to activate it.

2. Enter the private mode unlock code.

3. On the Apps screen, tap **My Files → Private**.
   All items moved in private mode appear on the screen.

**Easy mode**

Easy mode provides an easier user experience by using a simpler layout and bigger icons on the Home screen. You can access the most popular apps and frequently-used settings, and add shortcuts to your favorite contacts.

On the Apps screen, tap **Settings → Easy mode → Easy mode**, select apps to apply simpler layout, and then tap **DONE**.

To return to standard mode, open the Home screen and tap **Easy settings → Easy mode → Standard mode → DONE**.

**Managing shortcuts**

To add a shortcut to an app to the Home screen, scroll left, tap , and then select an app.
To add a shortcut to a contact on the Home screen, scroll right, tap .
To delete a shortcut from the Home screen, tap → **Edit**, select an app or contact with .
Transferring data from your previous device

Using backup accounts
You can transfer backup data from your previous device to your new device using your Google or Samsung account. Refer to Backing up and restoring data for more information.

Using Samsung Smart Switch
You can transfer data of the previous device to a new device via Smart Switch. Visit www.samsung.com/smartswitch for more information.

Samsung Smart Switch is not supported on some devices or computers.

Using Smart Switch Mobile
Use this app to transfer data from your previous device to your new device. You can download the app from Galaxy Apps or Play Store.

1. On your device, tap Smart Switch.

2. On your device, select an option depending on the previous device type and follow the on-screen instructions.

   If the previous device is an Android device, ensure that the Smart Switch Mobile app is installed on the device. Refer to the help for more information.
Using Smart Switch with computers

Use this feature to import a backup of your data (from selected manufacturer’s mobile devices) from a computer to your device. You can download the app from www.samsung.com/smartswitch.

1. Back up data from a previous device to the computer. For more information, contact the device’s manufacturer.

2. On the computer, launch Smart Switch.

3. Connect your current device to the computer using the USB cable.

4. On the computer, click the manufacturer of the previous device and follow the on-screen instructions to transfer data to your device.

Using Samsung Kies

Import a backup of your data from your computer via Samsung Kies to restore data on your device. You can also back up data to the computer via Samsung Kies. Refer to Connecting with Samsung Kies for more information.

Setting up accounts

Adding accounts

Some apps used on your device require a registered account. Create accounts to have the best experience with your device.

On the Apps screen, tap Settings → Accounts → Add account and select an account service. Then, follow the on-screen instructions to complete the account setup.

To sync content with your accounts, select an account and tick items to sync.

Removing accounts

On the Apps screen, tap Settings → Accounts, select an account, and then tap  → Remove account.
Phone

Making calls

Tap Phone on the Apps screen.

► Dual SIM models: Tap Keypad, enter a phone number, and then tap 📞 or 📧 to make a voice call, or tap 📺 to make a video call.

- View call and message logs.
- Enter the number using the keypad.
- Add the number to the contacts list.
- View favorite contacts.
- View the contacts list.
- Access additional options.
- Preview the phone number.
- Delete a preceding character.
**Single SIM models:** Tap Keypad, enter a phone number, and then tap 📞 to make a voice call, or tap 📺 to make a video call.

You can also make calls to phone numbers listed in Log, Favorites, and Contacts.

**Making calls from call logs or contacts list**

Tap Log or Contacts, and then drag a contact or a phone number to the right to make a call.

To deactivate the call by dragging an icon to the right feature, tap ➔ Settings ➔ Contacts, and then deselect Swipe to call or message.
Making an international call

Tap Keypad.

► Dual SIM models: Tap and hold 0 until the + sign appears. Enter the country code, area code, and phone number, and then tap or .

To block outgoing international calls, tap → Settings → Call → More settings → a SIM or USIM card → Call barring. Then, select a call type and tick International calls.

► Single SIM models: Tap and hold 0 until the + sign appears. Enter the country code, area code, and phone number, and then tap .

To block outgoing international calls, tap → Settings → Call → More settings → Call barring. Then, select a call type and tick International calls.

Receiving calls

Answering a call

When a call comes in, drag outside the large circle.

Rejecting a call

When a call comes in, drag outside the large circle.

To send a message when rejecting an incoming call, drag the reject message bar upwards.

To create various rejection messages, open the Apps screen and tap Phone → → Settings → Call → Call rejection → Rejection messages → +.

Missed calls

If a call is missed, appears on the status bar. Open the notifications panel to view the list of missed calls. Alternatively, on the Apps screen, tap Phone → Log to view missed calls.
Options during calls

During a voice call

The following actions are available:

- • : Increase the volume.
- • Add call: Dial a second call.
- • Keypad: Open the keypad.
- • End call: End the current call.
- • Speaker: Activate or deactivate the speakerphone. When using the speakerphone, speak into the microphone at the top of the device and keep the device away from your ears.
- • Mute: Turn off the microphone so that the other party cannot hear you.
- • Bluetooth: Switch to a Bluetooth headset if it is connected to the device.

Tap to view more options.

When you launch apps during a call, a pop-up window for the call screen appears. You can continue your phone conversation while using apps.

To move the pop-up window, drag it to another location.

To delete the pop-up window, tap and hold it, and then tap OK.

To return to the call screen, tap the pop-up window.

During a video call

Tap the screen to use the following options:

- • Switch: Switch between the front and rear cameras.
- • Mute: Turn off the microphone so that the other party cannot hear you.
- • End call: End the current call.

Tap to view more options.
Contacts

Adding contacts

Moving contacts from other devices
You can move contacts from other devices to your device. Refer to Transferring data from your previous device for more information.

Creating contacts manually

1. On the Apps screen, tap Contacts → Contacts.

2. Tap + and enter contact information.

   • ☑️: Add an image.
   • ±/−: Add or delete a contact field.

3. Tap SAVE.

   To add a phone number to the contacts list from the keypad, tap Keypad, enter the number, and then tap Add to Contacts.

Importing and exporting contacts

Import contacts from storage services to your device or export contacts from the device to storage services.

On the Apps screen, tap Contacts → Contacts.

Tap ☑️ → Settings → Contacts → Import/export contacts, and then select an import or export option.
Searching for contacts

On the Apps screen, tap **Contacts → Contacts**.

Use one of the following search methods:

- Scroll up or down the contacts list.
- Drag a finger along the index at the right side of the contacts list to scroll through it quickly.
- Tap the search field at the top of the contacts list and enter search criteria.

Once a contact is selected, take one of the following actions:

- ★: Add to favorite contacts.
- ✆️ / ✉️: Make a voice or video call.
- ⌨️: Compose a message.
- 📧: Compose an email.

Adding shortcuts for contacts to the Home screen

Add shortcuts to contacts that you frequently communicate with on the Home screen.

1. On the Apps screen, tap **Contacts → Contacts**.
2. Select a contact.
3. Tap ☺ → Add shortcut to home screen.
Messages & email

Messages

Sending messages
Send text messages (SMS) or multimedia messages (MMS).

You may incur additional charges for sending or receiving messages when you are roaming.

1. Tap Messages on the Apps screen.
2. Tap 📩.
3. Add recipients and enter a message.
   ▶ Dual SIM models:
**Messages & email**

► **Single SIM models:**

![Message screenshot](image)

- Enter recipients.
- Enter a message.
- Attach files.
- Enter emoticons.
- Access additional options.
- Select contacts from the contacts list.
- Send the message.

4  ► **Dual SIM models:** Tap 📩 or 📩 to send the message.

► **Single SIM models:** Tap 📩 to send the message.

**Viewing incoming messages**

Incoming messages are grouped into message threads by contact. Select a contact to view the person's messages.

⚠️ You may incur additional charges for sending or receiving messages when you are roaming.

While viewing a message, tap ‡ to view more options.
Email

Setting up email accounts

Tap Email on the Apps screen.
Set up an email account when opening Email for the first time.
Enter the email address and password. Tap NEXT for a private email account or tap MANUAL SETUP for a company email account. After that, follow the on-screen instructions to complete the setup.

To set up another email account, tap → MANAGE ACCOUNTS → +.
If you have more than one email account, you can set one as the default account. Tap → MANAGE ACCOUNTS → → Set default account.

Sending emails

Tap Email on the Apps screen.
Tap 📧 at the bottom of the screen to compose a message.

- Save the message for later delivery.
- Discard the message.
- Send the message.
- Access additional options.
- Add a CC or BCC.
- Insert files into the message, or use editing options.
- Add recipients from the contacts list.
Reading emails

Tap Email on the Apps screen.
Tap , select an email account to use, and new messages are retrieved. To manually retrieve new messages, tap .

Tap a message to read.
Camera

Basic shooting

Taking photos or recording videos

1 Tap **Camera** on the Apps screen.

2 Tap the image on the preview screen where the camera should focus.

3 Tap 📷 to take a photo or tap 🎥 to record a video.
   - Spread two fingers apart on the screen to zoom in, and pinch to zoom out.
   - To capture an image from the video while recording, tap 📷.
   - To change the focus while recording a video, tap where you want to focus. To focus on the center of the screen, tap 🕵️‍♂️.
• The camera automatically shuts off when unused.
• Make sure that the lens is clean. Otherwise, the device may not work properly in some modes that require high resolutions.
• The front camera lens is suitable for taking wide-angle photos. Minor distortion may occur in wide-angle photos and does not indicate device performance problems.

Launching Camera on the locked screen

To quickly take photos of special moments, launch Camera on the locked screen. On the locked screen, drag 📷 outside the large circle. If 📷 is not shown, open the Apps screen, tap Settings → Lock screen, and then tick Camera shortcut.

This feature may not be available depending on the region or service provider.

Camera etiquette

• Do not take photos or record videos of other people without their permission.
• Do not take photos or record videos where legally prohibited.
• Do not take photos or record videos in places where you may violate other people’s privacy.
**Shooting modes**

**Auto**

Use this mode to allow the camera to evaluate the surroundings and determine the ideal mode for the photo.

On the Apps screen, tap **Camera → MODE → Auto**.

**Selfie**

Use this mode to take a self-portrait using the front camera.

1. On the Apps screen, tap **Camera**.
2. Tap 📸 to use the front camera.
3. Tap **MODE → Selfie**.
4. Show your palm to the screen or tap 📸 to take a photo of yourself.

**Wide selfie**

Use this mode to take a wide self-portrait using the front camera.

1. On the Apps screen, tap **Camera**.
2. Tap 📸 to use the front camera.
3. Tap **MODE → Wide selfie**.
4  Show your palm to the screen or tap 📷  to take a photo of yourself.

5  Slowly rotate the device left and then right to take a panoramic photo. The device combines the photos into a single panoramic image.

• Make sure to keep the blue frame inside the viewfinder window.
• The subjects should remain still while taking wide self-portraits.
• The resolution of a photo may be affected by lighting conditions.
• The top and bottom parts of the image displayed on the preview screen may be cut out of the photo depending on the shooting conditions.
• To get the best results, hold the device in your hand and stretch out your arm as far as possible.

Rear-cam selfie

Use this mode to allow the camera to detect and focus your face automatically when you take a self-portrait using the rear camera.

1  On the Apps screen, tap Camera → MODE → Rear-cam selfie.

2  Move the frame to the position where your face will appear and adjust the frame size.

3  Position the device so the rear camera is aimed at your face. When the face is detected, the device beeps. Then, the device automatically takes the photo after 2 seconds.

Panorama

Use this mode to take a photo composed of many photos strung together.

On the Apps screen, tap Camera → MODE → Panorama.

To get the best shot, follow these tips:

• Move the camera slowly in one direction.
• Keep the image within the frame on the camera’s viewfinder.
• Avoid taking photos of indistinct backgrounds, such as an empty sky or a plain wall.
**Night**

Use this mode to take a photo in low-light conditions, without using the flash.
On the Apps screen, tap **Camera → MODE → Night**.

**Animated GIF**

Use this mode to create an animated photo from a series of photos.
On the Apps screen, tap **Camera → MODE → Animated GIF**.

**Managing shooting modes**

Select the shooting modes to appear on the mode selection screen.

1. On the Apps screen, tap **Camera → MODE → Manage modes**.

2. Tick the modes to add to the modes list.
   - **Beauty face**: Take a photo with lightened faces for gentler images.
   - **Continuous shot**: Take a series of photos of moving subjects.
   - **HDR (Rich tone)**: Take photos with rich colors and reproduce details even in bright and dark areas.
   - **Shot & more**: Take a series of photos and modify them by applying various effects using the shooting modes.

**Downloading shooting modes**

Download more shooting modes from **Galaxy Apps**.
On the Apps screen, tap **Camera → MODE → Download**.
Camera settings

On the Apps screen, tap Camera → . Not all of the following options are available in both still camera and video camera modes.

- : Activate or deactivate the flash.
- : Set the device to take a number of photos at preset intervals when taking photos with the front camera.
- : Use this for delayed-time shots.
- : Select a filter effect to use when taking photos or recording videos.
- / : Select a resolution. Use higher resolution for higher quality. But it takes up more memory.

To use more options, tap .

- **Palm selfie**: Set the device to detect your palm, so you can use it to take self-portraits.
- **Beauty face**: Set the device to take a photo with lightened faces for gentler images.
- **Exposure value**: Change the exposure value. This determines how much light the camera's sensor receives. For low-light situations, use a higher exposure.
- **ISO**: Select an ISO value. This controls camera light sensitivity. It is measured in film-camera equivalents. Low values are for stationary or brightly-lit objects. Higher values are for fast-moving or poorly-lit objects.
- **White balance**: Select an appropriate white balance, so images have a true-to-life color range. The settings are designed for specific lighting situations. These settings are similar to the heat range for white-balance exposure in professional cameras.
- **Metering modes**: Select a metering method. This determines how light values are calculated. **Center-weighted** measures background light in the center of the scene. **Spot** measures the light value at a specific location. **Matrix** averages the entire scene.
- **Tap to take pics**: Tap the image on the preview screen to take photos.
- **Video size**: Select a resolution. Use higher resolution for higher quality. But it takes up more memory.
- **Recording mode**: Change the recording mode.
• **Location tags**: Set the device to attach the location tag to the photo.

  - To improve GPS signals, avoid shooting in locations where the signal may be obstructed, such as between buildings or in low-lying areas, or in poor weather conditions.
  - When you share a photo with the location tag attached, the location information may be exposed to others. To avoid this, when viewing the photo, tap → **More info** → 📊, and then tap 🛠 under **Location** to delete your location information.

• **Storage location**: Select the memory location for storage.

• **Save as flipped**: Invert the image to create a mirror-image of the original scene, when taking photos with the front camera.

• **Grid lines**: Display viewfinder guides to help composition when selecting subjects.

• **Voice control**: Set the device to take photos with voice commands.

• **The volume key**: Set the device to use the Volume button to control the shutter or zoom function.

• **Review pics/videos**: Set the device to show photos or videos after capturing them.

• **Reset settings**: Reset the camera settings.

⚠️ The available options vary depending on the mode used.
Gallery

Viewing content on the device

On the Apps screen, tap **Gallery** and select an image or a video. Video files show the ➤ icon on the preview thumbnail. To hide or show the menu bar and the preview thumbnails, tap the screen.

Send the image to others.  
Move to the previous screen.  
Search for other devices to view the image.  
Modify the image.  
Access additional options.  
Delete the image.  

Image and video preview thumbnails
Viewing content stored on other devices

Search for content that is stored in other devices and view it on your device.
Tap Gallery on the Apps screen.

Accessing content on a nearby device

To use this feature, open the Apps screen, tap Settings → NFC and sharing → Nearby devices, and then tap the Nearby devices switch to activate it. Refer to Nearby devices for more settings.

On the Gallery main screen, tap and select a device in Nearby devices to access content. You can view content on the devices with the content sharing feature activated.
Safety assistance

Emergency mode

About emergency mode

Use this mode to extend the device’s standby time when you are in an emergency situation. When this mode is activated, the screen brightness decreases and battery consumption is reduced by restricting some features. You can also turn on the flash, sound alarms, and send your location information to others in a message.

Activating emergency mode

Press and hold the Power button, and then tap Emergency mode. Alternatively, on the Apps screen, tap Settings → Safety assistance → Emergency mode, and then tap the Emergency mode switch to activate it.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.
Deactivating emergency mode

To deactivate emergency mode, press and hold the Power button, and then tap Emergency mode. Alternatively, tap → Disable Emergency mode. Emergency mode is deactivated.

Help message

About help message

You can preset contacts to send a message to in an emergency. Send messages to your primary contacts by quickly pressing the Power button three times.

On the Apps screen, tap Settings → Safety assistance.

Adding primary contacts

1. On the Apps screen, tap Settings → Safety assistance.

2. Tap Manage primary contacts → Create primary contact.

3. Tap Create contact and enter contact information or tap Select from contacts to add an existing contact as a primary contact.

Setting help messages

On the Apps screen, tap Settings → Safety assistance → Send help messages, and then tap the Send help messages switch to activate it. Select content to include in help messages.

Sending help messages

In an emergency situation, quickly press the Power button three times. The device sends messages to your primary contacts. The messages include your location information.
Useful apps and features

S Finder

Use this app to search for content on the device. You can apply various filters and view the search history.

Open the notifications panel and tap S Finder.

Searching for content

Tap the search field and enter a keyword, or tap and say a keyword.

To get more refined results, tap Filter and apply filters under the search field.

To select search categories, tap → Select search locations.

S Planner

Creating events or tasks

1 Tap S Planner on the Apps screen.

2 Tap . Alternatively, select a date with no events or tasks in it and tap the date again.

   If the date already has saved events or tasks in it, tap the date and tap ．

3 Select either event or task and enter details.

   • Add event: Set a start and end date for an event. You can set an optional repeat setting.

   • Add task: Add a task to do on a specific date. You can set an optional priority setting.
4 Tap **SAVE** to save the event or task.

**Syncing events and tasks with your accounts**

Tap **S Planner** on the Apps screen.

To sync events and tasks with your accounts, tap → **Sync now**.

To add accounts to sync with, tap → **Calendars** → **Add account**. Then, select an account to sync with and sign in. When an account is added, a green circle is displayed next to the account name.

To change an account’s syncing option, open the Apps screen, tap **Settings** → **Accounts**, and then select an account service.
**S Voice**

**About S Voice**
Use this app to command the device by voice to perform various features.

Tap **S Voice** on the Apps screen. Alternatively, press the Home button twice.

To deactivate the access by pressing the Home button, tap → **Settings**, and then deselect **Open via the home key**.

**Setting the language**

Tap → **Settings** → **Language**, and then select a language.

The selected language is applied to **S Voice** only, not to the language displayed on the device.

**Using S Voice**

When you launch **S Voice**, the device starts voice recognition and the microphone icon turns blue.

Say a voice command.

If the device recognizes the command, the device will perform the corresponding action.

**Tips for better voice recognition:**

- Speak clearly.
- Speak in quiet places.
- Do not use offensive or slang words.
- Avoid speaking in dialectal accents.

The device may not recognize your commands or may perform unwanted commands depending on your surroundings or how you speak.

**Waking up S Voice in standby mode**

If **S Voice** is not used for a certain period, it automatically switches to standby mode.

Tap the microphone icon or say “Hi Galaxy” to the device to resume voice recognition.
Changing the wake-up command

You can change the wake-up command from “Hi Galaxy”. The wake-up command is used to launch S Voice when the device is in standby mode.

Tap → Settings → Voice wake-up → Set wake-up command.

Internet

Introduction

Browse the Internet to search for information and bookmark your favorite webpages to access them conveniently.

Browsing webpages

1 Tap Internet on the Apps screen.

2 Tap the address field.

3 Enter the web address or a keyword, and then tap Go.

To view the toolbars, drag your finger downwards slightly on the screen.

- Refresh the current webpage.
- Access additional options.
- Open the homepage.
- View your bookmarks, saved webpages, and recent browsing history.
- Open the browser’s tab manager.
- Move to the previously-visited page.
**Using secret mode**

In secret mode, you can separately save and manage open tabs, bookmarks, and saved pages. You can lock secret mode using a password.

**Activating secret mode**

In the toolbar at the bottom of the screen, tap **Tabs** → **TURN ON SECRET**.

If you are using this feature for the first time, set whether to use a password for secret mode.

In secret mode, you cannot use some features, such as screen capture.

In secret mode, the device will change the color of the toolbars.

**Changing security settings**

You can change your password.

Tap **MORE** → **Settings** → **Privacy** → **Secret mode security** → **Change password**.

**Deactivating secret mode**

In the toolbar at the bottom of the screen, tap **Tabs** → **TURN OFF SECRET**.
Useful apps and features

Music

Playing music

Tap Music on the Apps screen.

Select a music category, and then select a song to play.

- Search for other devices to play the file.
- Access additional options.
- Adjust the volume.
- Set the file as your favorite song.
- Change the repeat mode.
- Open the playlist.
- Add the song to a playlist.
- Skip to the previous song. Tap and hold to move backwards quickly.
- Pause and resume playback.
- Skip to the next song. Tap and hold to move forwards quickly.

To listen to songs at equal volume levels, tap → Settings, and then tick Smart volume.

When Smart volume is activated, the volume may end up louder than the device volume level. Use caution to avoid long-term exposure to loud sounds to prevent damage to your hearing.

Smart volume may not be activated for some files.
To set a personalized sound while listening to songs with a headset, tap ⚙ → Settings → Adapt Sound → On.

When you activate this option for the first time, tap START to adjust the sound. The device starts a series of sound tests to adjust the sound level and starts to beep. Tap YES if you can hear the beep or NO if you cannot. Repeat this step for each test until the sound adjustment is finished. Then, tick Music sound and tap DONE to apply the option when you listen to music.

When you turn the volume up to level 14 or higher, the adapt sound option is not applied to music playback. If you turn the volume down to level 13 or lower, the option is reapplied.

Playing music stored on other devices

Search for music that is stored on other devices and play it on your device.

Tap Music on the Apps screen.

Accessing music on a registered device

To use this feature, sign in to your Samsung account.

On the Music main screen, tap DEVICES and select a device in REGISTERED DEVICES to access and play music. You can play the song on the devices that are registered to Samsung link. Visit link.samsung.com for more information.

- Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network.
- You may incur additional charges when you access content stored on other devices via the mobile network.

Accessing music on a nearby device

To use this feature, open the Apps screen, tap Settings → NFC and sharing → Nearby devices, and then tap the Nearby devices switch to activate it. Refer to Nearby devices for more settings.

On the Music main screen, tap DEVICES and select a device in NEARBY DEVICES to access and play music. You can play the song on the devices with the content sharing feature activated.
**Video**

**Playing videos**

Tap **Video** on the Apps screen.

Select a video to play.

- **Search for other devices to play the file.**
- **Adjust the volume.**
- **Access additional options.**
- **Pause and resume playback.**
- **Switch to the pop-up video player.**
- **Move forwards or backwards by dragging the bar.**
- **Change screen ratio.**
- **Skip to the previous video. Tap and hold to move backwards quickly.**
- **Skip to the next video. Tap and hold to move forwards quickly.**

To customize the control panel location during playback, tap \( \rightarrow \) **Settings**, tick **Mini controller**, and then tap **CLOSE**. Then, tap \( \leftarrow \) or \( \rightarrow \) to move the control panel to either side of the screen.

- **This feature is available only in landscape orientation.**
Playing videos stored on other devices

Search for videos that are stored in other devices and play them on your device.

Tap **Video** on the Apps screen.

**Accessing a video on a registered device**

To use this feature, sign in to your Samsung account.

On the Video main screen, tap **DEVICES** and select a device in **Registered devices** to access and play the video. You can play the video on the devices registered to Samsung link. Visit [link.samsung.com](http://link.samsung.com) for more information.

- Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network.
- You may incur additional charges when you access content stored on other devices via the mobile network.

**Accessing a video on a nearby device**

To use this feature, open the Apps screen, tap **Settings → NFC and sharing → Nearby devices**, and then tap the **Nearby devices** switch to activate it. Refer to [Nearby devices](#) for more settings.

On the Video main screen, tap **DEVICES** and select a device in **Nearby devices** to access and play the video. You can play the video on devices that have the content sharing feature activated.
Useful apps and features

## Clock

### Alarm

On the Apps screen, tap **Clock → Alarm**.

**Setting alarms**

Tap ‡ in the alarms list, set an alarm time, select the days on which the alarm will repeat, set other various alarm options, and then tap **DONE**. To activate or deactivate alarms, tap ✅ next to the alarm in the alarms list.

- **Snooze**: Set an interval and the number of times for the alarm to repeat after the preset time.
- **Smart alarm**: Set a time and tone for the smart alarm. A smart alarm starts at a low volume a few minutes before a preset alarm is scheduled to sound. The volume of the smart alarm increases gradually until you turn it off or the preset alarm sounds.

**Stopping alarms**

Drag ✗ outside the large circle to stop an alarm. If you have previously enabled the snooze option, drag ✗ outside the large circle to repeat the alarm after a specified length of time.

**Deleting alarms**

Tap and hold an alarm, and then tap ⏹️.
World clock
On the Apps screen, tap Clock → World clock.

Creating clocks
Tap ‒ and enter a city name or select a city from the cities list.
To apply summer time, tap and hold a clock, and then tap ☀️.

Deleting clocks
Tap and hold a clock, and then tap ⌠.

Stopwatch
On the Apps screen, tap Clock → Stopwatch.
Tap START to time an event. Tap LAP to record lap times.
Tap STOP to stop timing. To clear lap times, tap RESET.

Timer
On the Apps screen, tap Clock → Timer.
Set the duration, and then tap START.
Drag ⌚️ outside the large circle when the timer goes off.
**Calculator**

Use this app for simple or complex calculations.

Tap **Calculator** on the Apps screen.

Rotate the device to landscape orientation to display the scientific calculator. If **Screen rotation** is disabled, tap → **Scientific calculator**.

To see the calculation history, tap ‣ to hide the keypad.

To clear the history, tap ‣ → **CLEAR HISTORY**.

**Memo**

Use this app to create memos and organize them by category.

Tap **Memo** on the Apps screen.

**Composing memos**

Tap + on the memos list and enter a memo. While composing a memo, use the following options:

- ‼️: Create or set a category.
- 📸: Insert images.
- 🎤: Make a voice recording to insert.

To save the memo, tap **SAVE**.

To edit a memo, tap a memo, and then tap the content of the memo.

**Searching for memos**

Tap 📜 on the memos list and enter a keyword to search for memos that include the keyword.
Voice Recorder

Recording voice memos

Tap **Voice Recorder** on the Apps screen.

Tap ◎ to start recording. Speak into the microphone. Tap || to pause recording. To cancel recording, tap ×. Tap ◠ to finish recording.

While recording a voice memo, tap ◐ to insert a bookmark.

To set the device to remove background noise, tap ◗ → **Settings**, and then tick **Noise reduction**.
Useful apps and features

Playing voice memos

Tap Voice Recorder on the Apps screen.

Tap playhead and select a voice memo to play.

- : Trim the voice memo.
- : Set a portion of the voice memo for loop playback.
- x1.0: Adjust the playback speed.
- : Skip a silent portion in the voice memo.
- : Insert bookmarks in the voice memo.
- /: Pause or resume playback.
- /: Skip to the previous or next voice memo.

Dropbox

Use this app to save and share files with others via Dropbox cloud storage. When you save files to Dropbox, your device automatically syncs with the web server and any other devices that have Dropbox installed.

This app may not be available depending on the region or service provider.

Tap Dropbox on the Apps screen.

When you launch this app for the first time or restart it after performing a data reset, follow the on-screen instructions to finish the setup.

Use the following functions:

- **Files**: Upload or open files. Tap to upload files.
- **Photos**: View the uploaded photos or videos. Tap to share or delete files, or create albums.
- **Notifications**: View notifications.
Flipboard

Use this app to view live social network updates and news in a personalized magazine format. Tap Flipboard on the Apps screen.

This app may not be available depending on the region or service provider.

When you launch this app for the first time or restart it after performing a data reset, follow the on-screen instructions to finish the setup.

On the Flipboard main screen, select from various news articles and subscriptions.

Radio

Listening to the FM radio

Tap Radio on the Apps screen.

Before you use this app, you must connect a headset, which serves as the radio antenna.

The FM radio scans and saves available stations automatically when running for the first time.

Tap ☰ to turn on the FM radio. Select the radio station you want from the stations list.
Scanning radio stations

Tap **Radio** on the Apps screen.

Tap **STATIONS → SCAN**, and then select a scan option. The FM radio scans and saves available stations automatically.

Select the radio station you want from the stations list.
Google apps

Google provides entertainment, social network, and business apps. You may require a Google account to access some apps. Refer to Setting up accounts for more information.

To view more app information, access each app's help menu.

Some apps may not be available or may be labeled differently depending on the region or service provider.

Chrome
Search for information and browse webpages.

Gmail
Send or receive emails via the Google Mail service.

Google+
Share your news and follow updates that your family, friends, and others share. You can also back up your photos and videos, and more.

Maps
Find your location on the map, search for locations, and view location information for various places.

Play Music
Discover, listen to, and share music on your device.

Play Movies & TV
Watch videos stored on your device and download various content to watch from Play Store.
Useful apps and features

**Play Books**
Download various books from **Play Store** and read them.

**Play Newsstand**
Read news and magazines that interest you in one convenient location.

**Play Games**
Download games from **Play Store** and play them with others.

**Drive**
Store your content on the cloud, access it from anywhere, and share it with others.

**YouTube**
Watch or create videos and share them with others.

**Photos**
Manage photos, albums, and videos that you have saved on the device and uploaded to **Google+**.

**Hangouts**
Chat with your friends individually or in groups and use images, emoticons, and video calls while you are chatting.

**Google**
Search quickly for items on the Internet or your device.

**Voice Search**
Search quickly for items by saying a keyword or phrase.
Connecting with other devices

Bluetooth

About Bluetooth

Bluetooth creates a direct wireless connection between two devices over short distances. Use Bluetooth to exchange data or media files with other devices.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via Bluetooth.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.
- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes). Samsung is not responsible for the repercussion of illegal use of the Bluetooth feature.

Pairing with other Bluetooth devices

1. On the Apps screen, tap **Settings** → **Bluetooth**, tap the **Bluetooth** switch to activate it, and then tap **SCAN**.

   The detected devices are listed.

   To set the device as visible to other devices, tap the device name.
Connecting with other devices

2 Select a device to pair with.
   If your device has paired with the device before, tap the device name without confirming the auto-generated passkey.
   If the device you want to pair with is not in the list, request that the device turns on its visibility option.

3 Accept the Bluetooth authorization request on both devices to confirm.

Sending and receiving data

Many apps support data transfer via Bluetooth. You can share data, such as contacts or media files, with other Bluetooth devices. The following actions are an example of sending an image to another device.

Sending an image

1 On the Apps screen, tap Gallery.

2 Select an image.

3 Tap → Bluetooth, and then select a device to transfer the image to.
   If the device you want to pair with is not in the list, request that the device turns on its visibility option. Or, set your device as visible to other devices.

4 Accept the Bluetooth authorization request on the other device.

Receiving an image

When another device sends you an image, accept the Bluetooth authorization request. You can view received images in Gallery.
Connecting with other devices

Unpairing Bluetooth devices

1. On the Apps screen, tap Settings → Bluetooth. The device displays the paired devices in the list.

2. Tap 🔁 next to the device’s name to unpair.

3. Tap Unpair.

Wi-Fi Direct

About Wi-Fi Direct

Wi-Fi Direct connects devices directly via a Wi-Fi network without requiring an access point.

Connecting to other devices

1. On the Apps screen, tap Settings → Wi-Fi, and then tap the Wi-Fi switch to activate it.

2. Tap ☰ → Wi-Fi Direct. The detected devices are listed.

3. Select a device to connect to.
   To change the device name, tap ☰ → Rename device.

4. Accept the Wi-Fi Direct authorization request on the other device to confirm.
Connecting with other devices

Sending and receiving data

You can share data, such as contacts or media files, with other devices. The following actions are an example of sending an image to another device.

**Sending an image**

1. On the Apps screen, tap **Gallery**.
2. Select an image.
3. Tap ← Wi-Fi Direct, select a device to transfer the image to, and then tap **DONE**.
4. Accept the Wi-Fi Direct authorization request on the other device.

**Receiving an image**

When another device sends you an image, accept the Wi-Fi Direct authorization request. You can view received images in **Gallery**.

**Ending the device connection**

1. On the Apps screen, tap **Settings → Wi-Fi**.
2. Tap ‡ Wi-Fi Direct.
   The device displays the connected devices in the list.
3. Tap **END CONNECTION → OK** to disconnect the devices.
NFC (NFC-enabled models)

About NFC

Your device allows you to read near field communication (NFC) tags that contain information about products. You can also use this feature to make payments and buy tickets for transportation or events after downloading the required apps.

⚠️ The device contains a built-in NFC antenna around the rear camera lens. Handle the device carefully to avoid damaging the NFC antenna.

Using the NFC feature

Use the NFC feature to send images or contacts to other devices, and read product information from NFC tags. If you insert a SIM or USIM card that has a payment feature, you can use the device to make payments conveniently.

On the Apps screen, tap Settings → NFC and sharing → NFC, and then tap the NFC switch to activate it. Alternatively, open the quick setting panel and tap NFC to activate it.

Place the NFC antenna area on the back of your device near an NFC tag. The information from the tag appears.

Ensure that the device's screen is unlocked. Otherwise, the device will not read NFC tags or receive data.
Connecting with other devices

Making a purchase with the NFC feature

Before you can use the NFC feature to make payments, you must register for the mobile payment service. To register or get more information about the service, contact your service provider.

On the Apps screen, tap Settings → NFC and sharing → NFC, and then tap the NFC switch to activate it. Alternatively, open the quick setting panel and tap NFC to activate it.

Touch the NFC antenna area on the back of your device to the NFC card reader.

To set the default payment app, tap Tap and pay and select an app.

- The payment services list may not include all available payment apps.
- To make a payment with the SIM or USIM card, insert the NFC-enabled SIM or USIM card into the SIM card tray slot 1 (1). The SIM card tray slot 2 (2) does not support the NFC feature.

Sending data

Use the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.

1. On the Apps screen, tap Settings → NFC and sharing → NFC, and then tap the NFC switch to activate it. Alternatively, open the quick setting panel and tap NFC to activate it.

2. Tap Android Beam and tap the Android Beam switch to activate it.

3. Select an item and touch the other device’s NFC antenna to your device’s NFC antenna.

4. When Touch to beam. appears on the screen, tap your device’s screen to send the item.
S Beam (NFC-enabled models)

Use this feature to send data, such as videos, images, and documents.

1. Activate the S Beam feature on the receiving device.

2. On the Apps screen, tap **Settings** → **NFC and sharing** → **NFC**, and then tap the **NFC** switch to activate it. Alternatively, open the quick setting panel and tap **NFC** to activate it.

3. Tap **S Beam** and tap the **S Beam** switch to activate it.

4. Select a file and touch the other device’s NFC antenna to your device’s NFC antenna.

5. When **Touch to beam**. appears on the screen, tap your device’s screen to send the file.

- Do not send copyright-protected data via S Beam. Doing so may violate copyright laws. Samsung is not responsible for any liabilities caused by the illegal use of copyrighted data.
- If both devices try to send data simultaneously, the file transfer may fail.
**Quick connect**

**About Quick connect**

Use this feature to easily search and connect to nearby devices. You can also conveniently share content stored on your device with computers.

- If the device you want to connect does not support the Quick connect feature, activate its Wi-Fi Direct feature before launching **Quick connect** on your device.
- Connection methods may vary depending on the type of connected devices or the shared content.
- Device name may vary depending on the Bluetooth devices to pair with. For example, the device name can be shown as BT MAC.

**Connecting to other devices**

1. Open the notifications panel and tap **Quick connect**.
   - If you are using this feature for the first time, tap **START**.
   - When the panel opens, the Wi-Fi feature is activated automatically and the device searches for nearby devices.

2. Select a device to connect to.
   - The next steps may vary depending on the connected device. Follow the on-screen instructions to complete the connection between the devices.
   - To allow nearby devices to search for your device and connect to it, tap **MORE** → **Set device visibility** → **Device visibility**, and then select an option.

**Re-searching for devices**

If the desired device does not appear in the list, search for the device.

Tap **REFRESH** and select the device from the list of detected devices.
Connecting with other devices

Sharing content
Share content with the connected devices.

1. Open the notifications panel and tap **Quick connect**.
2. Select a device from the list of detected devices.
3. Tap **Share content** and select a media category.
4. Select the content to share and tap **DONE**.
   - Your device sends the content to the connected device.

Screen Mirroring

About Screen Mirroring
Use this feature to connect your device to a large screen with an AllShare Cast dongle or HomeSync and then share your contents.
Connecting with other devices

- This feature may not be available depending on the region or service provider.
- Some files may be buffered during playback, depending on the network connection.
- To save energy, deactivate this feature when not in use.
- If you specify a Wi-Fi frequency, AllShare Cast dongles or HomeSync may not be detected or connected.
- If you play videos or games on a TV, select an appropriate TV mode to get the best experience.

Viewing content on a TV

Before you connect your device to a TV, connect the screen mirroring-enabled device to the TV. To set up the connection, refer to the device’s user manual. The following actions are an example of viewing content on a TV connected via an AllShare Cast dongle.

1. Connect the AllShare Cast dongle to the TV using an HDMI cable.
2. On the TV, select a connection mode, such as HDMI mode, to connect an external device.
3. On the Apps screen, tap Settings → NFC and sharing → Screen Mirroring.
   The detected devices are listed.
4. Select a device to connect to.
   Your device’s screen appears on the TV screen.
   If you connect the device for the first time, tap and hold the dongle’s name in the list and enter the PIN shown on the TV screen.
5. Open or play a file, and then control the display with the keys on your device.
Mobile printing

Connect the device to a printer via Wi-Fi or Wi-Fi Direct, and print images or documents.

Some printers may not be compatible with the device.

Adding printer plug-ins

Add printer plug-ins for printers you want to connect the device to.

On the Apps screen, tap **Settings → NFC and sharing → Printing → Download plug-in**, and search for a printer plug-in in **Play Store**. Select a printer plug-in and install it.

Connecting to a printer

On the Apps screen, tap **Settings → NFC and sharing → Printing**, select a printer plug-in, and then tap the switch at the top right of the screen to activate it. The device searches for printers that are connected to the same Wi-Fi network as your device. Select a printer to use as the default printer.

To add printers manually, select a printer plug-in, tap **→ Add printer → ADD PRINTER**, enter details, and then tap **OK**.

To change print settings, select a printer plug-in and tap **→ Settings**.

Printing content

While viewing content, such as images or documents, tap **→ Print → All printers**, and then select a printer.
Device & data manager

Upgrading the device
The device can be upgraded to the latest software.

Upgrading over the air
The device can be directly upgraded to the latest software by the firmware over-the-air (FOTA) service.
On the Apps screen, tap Settings → About device → Download updates manually.

Upgrading with Samsung Kies
Download the latest version of Samsung Kies from the Samsung website. Launch Samsung Kies and connect the device to the computer. Samsung Kies automatically recognizes the device and shows available updates in a dialogue box, if any. Click the Update button in the dialogue box to start upgrading. Refer to the Samsung Kies help for more information about how to upgrade.

- Do not turn off the computer or disconnect the USB cable while the device is upgrading.
- While upgrading the device, do not connect other media devices to the computer. Doing so may interfere with the update process.
Transferring files between the device and a computer

Move audio, video, image, or other types of files from the device to the computer, or vice versa.

⚠️ Do not disconnect the USB cable from the device when you are transferring files. Doing so may cause data loss or device damage.

• Do not disconnect the device from the computer when you play files saved in the device on the connected computer. After you finish playing the file, disconnect the device from the computer.
• The devices may not connect properly if they are connected via a USB hub. Directly connect the device to the computer’s USB port.

Connecting as a media device

1. Connect the device to the computer using the USB cable.

2. Open the notifications panel, and then tap Transferring media files via USB → Transferring media files.
   If the computer cannot recognize your device, tap Transferring images.

3. Transfer files between your device and the computer.

Connecting with Samsung Kies

Samsung Kies is a computer app that manages media contents and personal information with Samsung devices. Download the latest Samsung Kies from the Samsung website.

1. Connect the device to the computer using the USB cable.
   Samsung Kies launches on the computer automatically. If Samsung Kies does not launch, double-click the Samsung Kies icon on the computer.

2. Transfer files between your device and the computer.
   Refer to the Samsung Kies help for more information.
Back up and restore data

Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information to a backup account and access it later.

Using a Google account

1 Tap Settings on the Apps screen.

2 Tap Backup and reset and tick Back up my data.

3 Tap Backup account and select an account as the backup account.

To restore data, you must sign in to your Google account via the setup wizard. You can launch and open the setup wizard by performing a factory data reset on the device. If you do not sign in to your Google account via the setup wizard, you cannot restore the backup data.

Using a Samsung account

On the Apps screen, tap Settings → Accounts → Add account → Samsung account, and then sign in to your Samsung account.

Tap Samsung account → Backup, select the items to back up, and then tap BACK UP NOW.

To restore data, open the Apps screen, tap Settings → Accounts → Samsung account → Restore, select the items, and then tap RESTORE NOW.

Performing a data reset

Delete all settings and data on the device. Before performing a factory data reset, ensure you back up all important data stored on the device. Refer to Backing up and restoring data for more information.

On the Apps screen, tap Settings → Backup and reset → Factory data reset → RESET DEVICE → DELETE ALL. The device automatically restarts.
Settings

About Settings

Use this app to configure the device, set app options, and add accounts.
Tap Settings on the Apps screen.
To search for settings by entering keywords, tap Q.
You can change the view mode to separate tabs or a list. Tap ➤ View as and select a view mode.

Quick settings

View the list of your favorite setting options.
To edit the list of favorite setting options, tap ➤ Edit quick settings, select a setting option, and then tap DONE.

Connections

Wi-Fi

Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices.
On the Settings screen, tap Wi-Fi, and then tap the Wi-Fi switch to activate it.
The device can maintain a stable network connection by automatically selecting either the Wi-Fi or mobile network to use the strongest signal. To automatically switch between networks, tick Smart network switch.
To use options, tap ☰:

- **Scan**: Search for available networks.
- **Wi-Fi Direct**: Activate Wi-Fi Direct and connect devices directly via Wi-Fi to share files.
- **Advanced**: Customize Wi-Fi settings.
- **WPS push button**: Connect to a secured Wi-Fi network with a WPS button.
- **WPS PIN entry**: Connect to a secured Wi-Fi network with a WPS PIN.
- **Help**: View help information for Wi-Fi.

**Setting Wi-Fi sleep policy**

Tap ☰ → **Advanced** → **Keep Wi-Fi on during sleep**.

⚠️ When the screen is turned off, the device automatically turns off Wi-Fi connections. When this happens, the device automatically accesses mobile networks if it is set to use them. This may incur data transfer fees. To avoid additional charges, set this option to **Always**.

**Bluetooth**

Activate the Bluetooth feature to exchange information over short distances.

On the Settings screen, tap **Bluetooth**, and then tap the **Bluetooth** switch to activate it.

To use more options, tap ☰:

- **Visibility timeout**: Set duration that the device is visible.
- **Received files**: View received files via Bluetooth.
- **Rename device**: Change the device name.
- **Help**: View help information for Bluetooth.
Tethering and Mobile hotspot

Use the device as a mobile hotspot to share the device’s mobile data connection with other devices. Refer to Tethering and Mobile hotspot for more information.

On the Settings screen, tap **Tethering and Mobile hotspot**.

- **Mobile hotspot**: Use the mobile hotspot to share the device’s mobile data connection with computers or other devices through the Wi-Fi network. You can use this feature when the network connection is not available.
- **USB tethering**: Use USB tethering to share the device’s mobile data connection with a computer via USB. When connected to a computer, the device is used as a wireless modem for the computer.
- **Bluetooth tethering**: Use Bluetooth tethering to share the device’s mobile data connection with computers or other devices via Bluetooth.

Airplane mode

This disables all wireless functions on your device. You can use only non-network services.

On the Settings screen, tap **Airplane mode**.

Data usage

Keep track of your data usage amount and customize the settings for the limitation.

On the Settings screen, tap **Data usage**.

- **Mobile data**: Set the device to use data connections on any mobile network.
- **Set mobile data limit**: Set a limit for mobile data usage.

To use more options, tap ꔦ:

- **Restrict background data**: Set the device to disable sync in the background while using a mobile network.
- **Show Wi-Fi usage**: Set the device to show your data usage via Wi-Fi.
- **Mobile hotspots**: Select mobile hotspots to prevent apps that are running in the background from using them.
Location
Change settings for location information permissions.
On the Settings screen, tap Location, and then tap the Location switch to activate it.

- **Mode**: Select a method to collect your location data.
- **Recent location requests**: View which apps request your current location information and their battery usage.
- **Location services**: View the location services your device is using.
- **My places**: Set up profiles that will be used for specific locations when you use GPS, Wi-Fi, or Bluetooth features to find your current location.

SIM card manager (dual SIM models)
Activate your SIM or USIM cards and customize the SIM card settings.
On the Settings screen, tap SIM card manager.

- **Calls**: Select a SIM or USIM card for voice calls.
- **Video call**: Select a SIM or USIM card for video calls.
- **Mobile data**: Select a SIM or USIM card for data service.
- **Dual SIM always on**: Set the device to allow incoming calls from the other SIM or USIM card during a call.

⚠️ When this feature is enabled, you may incur additional charges for call forwarding depending on the region or service provider.

NFC and sharing
Customize settings to control connections with other devices.
On the Settings screen, tap NFC and sharing.

NFC (NFC-enabled models)
Activate the NFC feature to read or write NFC tags that contain information.

- **Android Beam**: Turn on the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.
• **S Beam**: Activate the S Beam feature to send data, such as videos, images, and documents, to devices that support NFC and Wi-Fi Direct.

• **Tap and pay**: Set the default payment app for mobile payments.

⚠️ The payment services list may not include all available payment apps.

**Nearby devices**

Change settings for sharing content when you connect the device to nearby devices. All devices must support Wi-Fi direct or be connected to the same access point.

• **Device name**: View the media server name for your device.

• **Content to share**: Set the device to share your content with other devices.

• **Allowed devices**: View the list of devices that can access your device.

• **Denied devices**: View the list of devices that are blocked from accessing your device.

• **Download to**: Select a memory location for saving media files.

• **Receive files from other devices**: Set the device to accept uploads from other devices.

**Printing**

Configure settings for printer plug-ins installed on the device. You can search for available printers or add one manually to print files.

**Screen Mirroring**

Activate the screen mirroring feature and share your display with others.
More networks

Customize settings to control networks.

Mobile networks

- **Mobile data**: Set the device to use data connections on any mobile network.
- **Data roaming**: Set the device to use data connections when you are roaming.
- **Network mode SIM 1 / Network mode SIM 2** (dual SIM models): Select a network type.
- **Network mode** (single SIM models): Select a network type.
- **Access Point Names**: Set up access point names (APNs).
- **Network operators**: Search for available networks and manually register a network.

VPN

Set up and connect to virtual private networks (VPNs).

Device

Sounds and notifications

Change settings for various sounds on the device.
On the Settings screen, tap Sounds and notifications.

- **Sound mode**: Set the device to use sound mode or silent mode.
- **Vibration intensity**: Adjust the force of the vibration notification.
- **Vibrate when ringing**: Set the device to vibrate and play a ringtone for incoming calls.
• **Ringtone** (dual SIM models):
  - **Ringtones**: Add or select a ringtone for incoming calls.
  - **Notifications**: Select a ringtone for events, such as incoming messages and missed calls.
• **Ringtones** (single SIM models): Add or select a ringtone for incoming calls.
• **Vibrations**: Change the vibration settings.
• **Notification ringtone** (single SIM models): Select a ringtone for events, such as incoming messages and missed calls.

**Display and wallpaper**

Change the display settings.

On the Settings screen, tap **Display and wallpaper**.

• **Brightness**: Set the brightness of the display.

• **Wallpaper**:
  - **Home screen**: Select a background image for the Home screen.
  - **Lock screen**: Select a background image for the locked screen.
  - **Home and lock screen**: Select a background image for the Home screen and the locked screen.
  - **S View window**: Change the wallpaper of the S view window screen.

• **Font**:
  - **Font style**: Change the font type for display text.
  - **Font size**: Change the font size.

• **One-handed operation**: Activate one-handed operation mode for your convenience when using the device with one hand. Refer to **One-handed operation** for more information.

• **Screen rotation**: Set the content to rotate automatically when the device is turned.

• **Smart stay**: Set the device to prevent the display backlight from turning off while you are looking at the display.

• **Screen timeout**: Set the length of time the device waits before turning off the display's backlight.
• **Screen mode:**
  - **Adaptive display:** Use this mode for optimizing the display according to the display settings.
  - **AMOLED cinema:** Use this mode for dim surroundings, such as in a dark room.
  - **AMOLED photo:** Use this mode to make the display tone look like real colors.
  - **Basic:** Use this mode for normal surroundings.
• **Auto adjust screen tone:** Set the device to save power by adjusting the brightness of the display.
• **Daydream:** Set the device to launch a screensaver when the device is charging.
• **Touch key light duration:** Set the duration that the Recent apps button and the Back button’s backlight remains on.

**Lock screen**

Change the settings for the locked screen.

On the Settings screen, tap **Lock screen**.

• **Screen lock:** Change the screen lock method. The following options may vary depending on the screen lock feature selected.

• **Show information:**
  - **Show clock and date:** Set the device to show the date with the clock.
  - **Dual clock:** Set the device to show the dual clock.
  - **Clock size:** Change the clock size.
  - **Weather:** Set the device to show weather information on the locked screen.
  - **Owner information:** Enter your information that is shown with the clock.
  - **Help text:** Set the device to show the help text on the locked screen.
• **Camera shortcut:** Set the device to show the camera shortcut on the locked screen.

This feature may not be available depending on the region or service provider.

• **Unlock effect:** Select an effect that you see when you unlock the screen.
Themes
Change the theme for the Home, Apps, and locked screens.
On the Settings screen, tap Themes.

Multi window
Set the device to use Multi window.
On the Settings screen, tap Multi window, and then tap the Multi window switch to activate it.
• Open in Multi window view: Set the device to activate the Multi window feature when you open files from My Files or Video. Also, the device activates this feature when you view attachments in messages.

Notification panel
Customize the items that appear on the notifications panel.
On the Settings screen, tap Notification panel.

Motions and gestures
Activate the motion recognition feature and change the settings that control motion recognition on your device.
On the Settings screen, tap Motions and gestures.
• Smart alert: Set the device to alert you if you have missed calls or new messages when you pick up the device.
• Mute/pause: Set the device to mute incoming calls or alarms by using palm motions or placing the device face down.
• Palm swipe to capture: Set the device to capture a screenshot when you sweep your hand to the left or right across the screen.
Personalization

Accounts
Add email or SNS accounts.
On the Settings screen, tap Accounts.

Cloud
Change settings for syncing data or files with your Samsung account or Dropbox cloud storage.
On the Settings screen, tap Cloud.

Backup and reset
Change the settings for managing settings and data.
On the Settings screen, tap Backup and reset.
- Back up my data: Set the device to back up settings and app data to the Google server.
- Backup account: Set up or edit your Google backup account.
- Automatic restore: Set the device to restore settings and app data when the apps are reinstalled on the device.
- Factory data reset: Reset settings to the factory default values and delete all data.

Easy mode
Set the device to easy mode.
On the Settings screen, tap Easy mode.
- Standard mode: Set the device to standard mode.
- Easy mode: Set the device to easy mode.
- Easy applications: Select apps to apply simpler layouts.
Accessibility

Use this feature to improve accessibility to the device.

On the Settings screen, tap **Accessibility**.

- **Vision**: Customize the settings to improve accessibility for visually impaired users.
  - **TalkBack**: Activate TalkBack, which provides voice feedback. To view help information to learn how to use this feature, tap **SETTINGS → Launch “Explore by touch” tutorial**.
  - **Dark screen**: Set the device to turn the screen off at all times to keep the content on your screen private.
  - **Rapid key input**: Set the device to enter a character when you release your finger from the character on the keyboard. You can use this feature to enter characters instead of releasing your finger and double-tapping on the screen.
  - **Speak passwords**: Set the device to read the password aloud when you enter the password while TalkBack is activated.
  - **Font size**: Change the font size.
  - **Magnification gestures**: Set the device to magnify the screen and to zoom in on a specific area.
  - **Notification reminder**: Set the device to alert you to notifications that you have not checked at the interval.
  - **Negative colors**: Reverse the display colors to improve visibility.
  - **Color adjustment**: Adjust the color scheme for the screen when the device determines that you are color blind or having difficulty reading content.
  - **Accessibility shortcut**: Set the device to activate TalkBack when you press and hold the Power button, and then tap and hold the screen with two fingers.
  - **Text-to-speech options**: Change settings for the text-to-speech feature.

- **Hearing**: Customize the settings to improve accessibility for users with hearing impairment.
  - **Flash notification**: Set the flash to blink when you have incoming calls, new messages, or notifications.
  - **Turn off all sounds**: Set the device to mute all device sounds, such as media sounds, and the caller’s voice during a call.
- **Samsung subtitles (CC)**: Set the device to display closed captions on content supported by Samsung and to change the closed caption settings.

- **Google subtitles (CC)**: Set the device to display closed captions on content supported by Google and to change the closed caption settings.

- **Sound balance**: Set the device to adjust the sound balance when using a headset.

- **Mono audio**: Set the device to switch the sound output from stereo to mono when a headset is connected.

  • **Dexterity and interaction**: Customize the settings to improve accessibility for users who have reduced dexterity.

  - **Assistant menu**: Set the device to show the assistive shortcut icon that helps you access functions supported by external buttons or features on the notifications panel. You can also edit the menu on the shortcut icon.

  - **Press and hold delay**: Set the recognition time for pressing and holding the screen.

  - **Interaction control**: Activate interaction control mode to restrict the device’s reaction to inputs while using apps.

    • **Direct access**: Set the device to open selected accessibility menus when you press the Home button three times quickly.

    • **Answering and ending calls**: Change the method of answering or ending calls.

    • **Single tap mode**: Set the device to control incoming calls or notifications by tapping the button instead of dragging it.

    • **Manage accessibility**: Export or import the accessibility settings to share them with other devices.

    • **Services**: View accessibility services installed on the device.

**Private mode**

Set the device to prevent others from accessing your personal content by activating private mode.

On the Settings screen, tap **Private mode**, and then tap the **Private mode** switch to activate it.

  • **Private mode access type**: Set or change the unlock method to activate private mode.
**System**

**Language and input**

Change the settings for text input. Some options may not be available depending on the selected language.

On the Settings screen, tap **Language and input**.

**Language**

Select a display language for all menus and apps.

**Default**

Select a default keyboard type for text input.

**Samsung keyboard**

The available options may vary depending on the region or service provider.

- **English(UK)**: Select a default keyboard layout.
- **Select input languages**: Select languages for text input.
- **Predictive text**: Activate predictive text mode to predict words based on your input and show word suggestions. You can also customize the word prediction settings.
- **Auto replace**: Set the device to correct misspelled and incomplete words by tapping the space bar or punctuation mark.
- **My hot keys**: Set number shortcuts to frequently-used text. You can tap and hold a number key to insert the preset text.
- **Auto capitalize**: Set the device to automatically capitalize the first character after a final punctuation mark, such as a full stop, question mark, or exclamation mark.
- **Auto spacing**: Set the device to automatically insert a space between words.
- **Auto punctuate**: Set the device to insert a full stop when you double-tap the space bar.
• **Keyboard swipe:**
  - **None:** Set the device to deactivate the keyboard swipe feature.
  - **Continuous input:** Set the device to enter text by sweeping on the keyboard.
  - **Cursor control:** Enable the smart keyboard navigation feature to move the cursor by scrolling the keyboard.

• **Sound:** Set the device to sound when a key is touched.

• **Vibration:** Set the device to vibrate when a key is touched.

• **Character preview:** Set the device to display a large image of each character tapped.

• **Reset settings:** Reset Samsung keyboard settings.

### Google voice typing

• **Languages:** Select languages for text input.

• **Offline speech recognition:** Download and install language data for offline voice input.

• **Block offensive words:** Set the device to prevent the device from recognizing offensive words in voice inputs.

### Text-to-speech options

• **Preferred TTS engine:** Select a speech synthesis engine. To change the settings for speech synthesis engines, tap 📋.

• **Speech rate:** Select a speed for the text-to-speech feature.

• **Listen to an example:** Listen to the spoken text for an example.

• **Default language status:** View the status of the default language for the text-to-speech feature.

### Read notifications aloud

Set the device to read aloud notifications when you have incoming calls, messages, or events.

### Pointer speed

Adjust the pointer speed for the mouse or trackpad connected to your device.
Date and time

Access and alter the following settings to control how the device displays the time and date. On the Settings screen, tap **Date and time**.

If the battery remains fully discharged or removed from the device, the time and date is reset.

- **Automatic date and time**: Automatically update the time and date when moving across time zones.
- **Set date**: Set the current date manually.
- **Set time**: Set the current time manually.
- **Automatic time zone**: Set the device to receive time zone information from the network when you move across time zones.
- **Select time zone**: Set the home time zone.
- **Use 24-hour format**: Display time in 24-hour format.

Safety assistance

Activate emergency mode and set primary contacts and messages. Refer to **Emergency mode** for more information.

On the Settings screen, tap **Safety assistance**.

- **Emergency mode**: Set the device to activate emergency mode and reduce battery consumption by using basic functions, such as calling.
- **Send help messages**: Set the device to send help messages by pressing the Power button three times.
- **Manage primary contacts**: Select or edit the recipients for help messages.
**Accessories**

Change the accessory settings.

On the Settings screen, tap **Accessories**.

- **Automatic unlock**: Set the device to unlock automatically when the cover is flipped open. You can use this feature only for some screen lock methods.
- **S View window wallpaper**: Change the wallpaper of the S view window screen.
- **Select items to display**: Customize the information that appears on the S view window screen.

**Battery**

View battery power information and change power saving options.

On the Settings screen, tap **Battery**.

- **Power saving mode**: Activate power-saving mode and change the settings for power-saving mode. Refer to Power saving feature for more information.
- **Ultra power saving mode**: Extend standby time and reduce battery consumption by displaying a simpler layout and allowing limited access to an app.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

- **Percentage on status bar**: Set the device to display the remaining battery life.
Storage

View memory information for your device and memory card, or format a memory card.
On the Settings screen, tap Storage.

⚠️ Formatting a memory card permanently deletes all data from it.

⚠️ The actual available capacity of the internal memory is less than the specified capacity because the operating system and default apps occupy part of the memory. The available capacity may change when you upgrade the device.

Security

Change settings for securing the device and the SIM or USIM card.
On the Settings screen, tap Security.

- **Device administrators**: View device administrators installed on the device. You can allow device administrators to apply new policies to the device.
- **Unknown sources**: Set the device to allow the installation of apps from unknown sources.
- **Encrypt device**: Encrypt your device’s data to prevent others from accessing it if the device is lost or stolen. To use your encrypted device, you must decrypt the device’s data every time you turn on the device. You can set whether your device’s data will be decrypted automatically or whether an unlock code is required. It is not possible to back up or restore data when it is encrypted. If you enter the unlock code incorrectly several times in a row and reach the attempt limit, your device will perform a factory data reset.
- **Encrypt SD card**: Set the device to encrypt files on a memory card.

⚠️ If you reset your device to the factory defaults with this setting enabled, the device will not be able to read your encrypted files. Disable this setting before resetting the device.

- **Remote controls**: Set the device to allow control of your lost or stolen device remotely via the Internet. To use this feature, you must sign in to your Samsung account.
- **SIM change alert**: Activate or deactivate the Find my mobile feature which helps locate the device when lost or stolen.
• **Go to website**: Access the Find my mobile website (findmymobile.samsung.com). You can track and control your lost or stolen device from the Find my mobile website.

• **Reactivation lock**: Set the device to require your Samsung account after the device has been reset to prevent others from reactivating the device.

• **Set up SIM card lock**:
  - **Lock SIM card**: Activate or deactivate the PIN lock feature to require the PIN before using the device.
  - **Change SIM PIN**: Change the PIN used to access SIM or USIM data.

• **Make passwords visible**: Set the device to display passwords as they are entered.

• **Security policy updates**: Set the device to check and download security updates.

• **Send security reports**: Set the device to automatically send the updated security reports to Samsung.

• **Storage type**: Set a storage type for credential files.

• **Trusted credentials**: Use certificates and credentials to ensure secure use of various apps.

• **Install from device storage**: Install encrypted certificates stored on the USB storage.

• **Clear credentials**: Erase the credential contents from the device and reset the password.

**Help**

View help information to learn how to use the device and apps or configure important settings.

On the Settings screen, tap **Help**.

**About device**

Access device information, edit the device name, or update device software.

On the Settings screen, tap **About device**.
Applications

Application manager
View and manage the apps on your device.
On the Settings screen, tap Application manager.

Default applications
Select a default setting for using apps.
On the Settings screen, tap Default applications.

Application settings
Customize the settings for each app.
On the Settings screen, tap Application settings.
Troubleshooting

Before contacting a Samsung Service Center, please attempt the following solutions. Some situations may not apply to your device.

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

- **Password:** When the device lock feature is enabled, you must enter the password you set for the device.
- **PIN:** When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM or USIM card. You can disable this feature by using the Lock SIM card menu.
- **PUK:** Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
- **PIN2:** When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For more information, contact your service provider.

Your device displays network or service error messages

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again. While moving, error messages may appear repeatedly.
- You cannot access some options without a subscription. For more information, contact your service provider.

Your device does not turn on

When the battery is completely discharged, your device will not turn on. Fully charge the battery before turning on the device.
The touch screen responds slowly or improperly

- If you attach a screen protector or optional accessories to the touch screen, the touch screen may not function properly.
- If you are wearing gloves, if your hands are not clean while touching the touch screen, or if you tap the screen with sharp objects or your fingertips, the touch screen may malfunction.
- The touch screen may malfunction in humid conditions or when exposed to water.
- Restart your device to clear any temporary software bugs.
- Ensure that your device software is upgraded to the latest version.
- If the touch screen is scratched or damaged, visit a Samsung Service Center.

Your device freezes or encounters a fatal error

Try the following solutions. If the problem is still not resolved, contact a Samsung Service Center.

Restarting the device

If your device freezes or hangs, you may need to close apps or turn off the device and turn it on again.

Forcing restart

If your device is frozen and unresponsive, press and hold the Power button and the Volume Down button simultaneously for more than 7 seconds to restart it.

Resetting the device

If the methods above do not solve your problem, perform a factory data reset.

On the Apps screen, tap Settings → Backup and reset → Factory data reset → RESET DEVICE → DELETE ALL. Before performing the factory data reset, remember to make backup copies of all important data stored in the device.
Troubleshooting

Calls are not connected
- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the phone number you are dialing.
- Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call
- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly connected.

Sound echoes during a call
Adjust the volume by pressing the Volume button or move to another area.

A cellular network or the Internet is often disconnected or audio quality is poor
- Ensure that you are not blocking the device’s internal antenna.
- When you are in areas with weak signals or poor reception, you may lose reception. You may have connectivity problems due to issues with the service provider’s base station. Move to another area and try again.
- When using the device while moving, wireless network services may be disabled due to issues with the service provider’s network.

The battery icon is empty
Your battery is low. Charge the battery.
The battery does not charge properly (For Samsung-approved chargers)

- Ensure that the charger is connected properly.
- Visit a Samsung Service Center and have the battery replaced.

The battery depletes faster than when first purchased

- When you expose the device or the battery to very cold or very hot temperatures, the useful charge may be reduced.
- Battery consumption increases when you use messaging features or some apps, such as games or the Internet.
- The battery is consumable and the useful charge will get shorter over time.

Your device is hot to the touch

When you use apps that require more power or use apps on your device for an extended period of time, your device may feel hot to the touch. This is normal and should not affect your device’s lifespan or performance. If the device overheats or feels hot for a prolonged period, do not use it for a while. If the device continues to overheat, contact a Samsung Service Center.

Error messages appear when launching the camera

Your device must have sufficient available memory and battery power to operate the camera app. If you receive error messages when launching the camera, try the following:

- Charge the battery.
- Free some memory by transferring files to a computer or deleting files from your device.
- Restart the device. If you are still having trouble with the camera app after trying these tips, contact a Samsung Service Center.
Troubleshooting

Photo quality is poorer than the preview

- The quality of your photos may vary, depending on the surroundings and the photography techniques you use.
- If you take photos in dark areas, at night, or indoors, image noise may occur or images may be out of focus.

Error messages appear when opening multimedia files

If you receive error messages or multimedia files do not play when you open them on your device, try the following:

- Free some memory by transferring files to a computer or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate license or key to play the file.
- Ensure that the file formats are supported by the device. If a file format is not supported, such as DivX or AC3, install an app that supports it. To confirm the file formats that your device supports, visit www.samsung.com.
- Your device supports photos and videos captured with the device. Photos and videos captured by other devices may not work properly.
- Your device supports multimedia files that are authorized by your network service provider or providers of additional services. Some content circulated on the Internet, such as ringtones, videos, or wallpapers, may not work properly.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).

If the tips above do not solve the problem, contact a Samsung Service Center.
A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper driver installed and updated on your computer.
- If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer.
- Ensure that you have Samsung Kies or Windows Media Player 10 or higher installed on your computer.

Your device cannot find your current location

GPS signals may be obstructed in some locations, such as indoors. Set the device to use Wi-Fi or a mobile network to find your current location in these situations.

Data stored in the device has been lost

Always make backup copies of all important data stored in the device. Otherwise, you cannot restore data if it is corrupted or lost. Samsung is not responsible for the loss of data stored in the device.

A small gap appears around the outside of the device case

- This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur.
- Over time, friction between parts may cause this gap to expand slightly.
