Quick Guide

AiPaper Reader

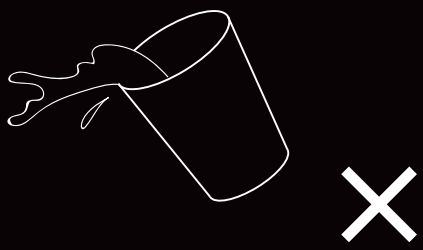

Get started

SIM tray
Power button /Fingerprint sensor
Default: Bluetooth volume control
Reading mode: Page-turning buttons
AI key
Microphone
Charging indicator light
USB-C port

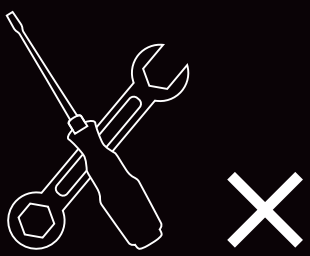

Important Safety Instructions

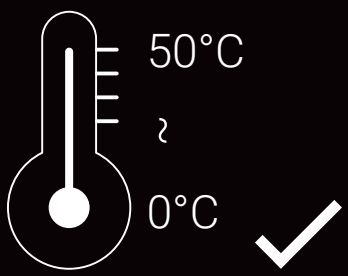

The screen is fragile.
Avoid impact and excessive pressure.

Contains a battery.
Do not expose to liquids.

Do not attempt to disassemble or modify the device.

Operating temperature:
0–50°C

For the full User Manual,
go to Settings > User Manual in the tablet

Warnings

1. This device contains a built-in lithium battery. Disassembling the device may compromise the safety features of the battery.
2. Disposing of a lithium battery in fire or a hot oven, or by mechanically crushing or cutting it, can result in an explosion.
3. Leaving a lithium battery in an extremely high-temperature environment can result in an explosion or the leakage of flammable liquid or gas.
4. Subjecting a lithium battery to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas.

Mises en garde

1. Ce dispositif est doté d'une batterie au lithium intégrée. Le démontage de l'appareil peut compromettre les dispositifs de sécurité de la batterie.
2. La destruction d'une batterie au lithium dans le feu ou dans un four chaud, ou en l'écrasant ou en la coupant, peut entraîner une explosion.
3. Laisser une batterie au lithium dans un environnement à très haute température peut entraîner une explosion ou une fuite de liquide ou encore de gaz inflammable.
4. Exposer une batterie au lithium à une pression atmosphérique extrêmement basse peut entraîner une explosion ou une fuite de liquide ou encore de gaz inflammable.

FCC Compliance Statements

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not

cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the
reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

IC Compliance Statements

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:
(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
(1) L'appareil ne doit pas produire de brouillage;
(2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

le dispositif utilisé dans la bande 5150-5250 MHz est réservé à une utilisation en intérieur afin de réduire le risque de brouillage préjudiciable aux systèmes mobiles par satellite dans le même canal.

RF Exposure Compliance

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. The portable device is designed to meet the requirements for exposure to radio waves established by the FCC/IC. These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body, with 10 mm separation.

Cet équipement est conforme aux limites d'exposition aux rayonnements ISED établies pour un environnement non contrôlé. L'utilisateur final doit suivre les instructions spécifiques pour satisfaire les normes. Cet émetteur ne doit pas être co-implanté ou fonctionner en conjonction avec toute autre antenne ou transmetteur.
Le dispositif portatif est conçu pour répondre aux exigences d'exposition aux ondes radio établie par le développement énergétique DURABLE. Ces exigences un SAR limite de 1.6 W/kg en moyenne pour un gramme de tissu. La valeur SAR la plus élevée signalée en vertu de cette norme lors de la certification de produit à utiliser lorsqu'il est correctement porté sur le corps, avec une séparation de 10 mm.

CE SAR

This equipment complies with Directive 2014/53/EU radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by European Union market(France).

SAR 10 g limit of 2 W/kg .

The highest SAR value 1.73 W/kg (5 mm distance)
