

Grip Mouse Wireless

Work ergonomically with a vertical mouse

 BAKKER ELKHUIZEN

Work Smart - Feel Good

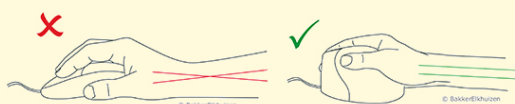

A vertical mouse that fits small hands!

A good mouse is important considering how often we hold and use a mouse. One option is the Grip Mouse Wireless.

The ergonomic vertical Grip Mouse supports the forearm in a neutral posture. The handshake position puts your hand in a natural grip.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be using a conventional mouse (Quemelo & Vieira, 2013).
