Overview

CORSAIR VENGEANCE RGB RT DDR4 memory punches up your PC's aesthetics while delivering outstanding performance optimized for AMD systems. Every module boasts ten individually addressable RGB LEDs for brilliant illumination and a dual-tone heatspreader for sharp looks and superb cooling. VENGEANCE RGB RT can automatically configure to maximum system speeds for faster load times and smoother multitasking. Take control with CORSAIR iCUE software and customize RGB lighting to match your setup, create custom lighting profiles, and synchronize with all iCUE-compatible devices across the entire iCUE ecosystem. A custom PCB provides high signal quality for superb performance and stability, while tightly screened memory chips unlock superior overclocking ability. For mesmerizing, customizable RGB lighting and remarkable DDR4 performance, equip your PC with VENGEANCE RGB RT.

Features and Benefits

Features	Benefits
Dynamic RGB Lighting	Illuminate your system with dynamic ten-zone RGB lighting with individually addressable RGB LEDs encased in a panoramic light pipe that offers unobstructed viewing from virtually every angle.
Create and Customize	Choose from dozens of preset lighting profiles, or create your own in CORSAIR iCUE software.
Optimized for AMD Motherboards	Achieve top bandwidth and tight response times on the latest AMD DDR4 motherboards to complement your cutting-edge Ryzen™ system.
